COINS AND COINAGE-PRECIOUS METALS.

The report of the Director of the Mint gives in detail the operations of the mints and assay offices during the year, together with statistics and inquiries in relation to the financial condition of our own and foreign countries.

The value of the gold deposited at the mints and assay offices during the year was \$50,839,905.53. Of this snm \$46,449,841.50 were composed of original deposits and \$4,390,064.03 were redeposits. Of the amount deposited \$33,286,167.94 was classed as of domestic production, \$8,541,027.11 foreign gold coin and bullion, \$3,830,176.02 old material, and worn and uncurrent domestic gold coins \$792,470.43.

The deposits and purchases of silver during the year aggregated 65,822,135.19 fine ounces, the coining value of the same in silver dollars being \$85,103,366.67. Of this sum \$73,666,045.23 was of domestic production and \$2,901,180.96 foreign bullion and coin; and of worn and uncurrent silver coin, \$6,913,179.96; old plate, etc., \$753,426.46, and redeposits, \$869,534.06.

The amount of silver purchased under the act of July 14, 1890, during the year was 54,008,162.59 fine ounces, costing \$45,531,374.53, and the average price, \$0.8430. The total amount of silver purchased under the act of July 14, 1890, from August 13, 1890, to November 2, 1893, inclusive, was 168,674,590.46 fine ounces, costing \$155,930,940.84, the average price per ounce being \$0.9244.

Of the silver purchased under this act. consumed in the coinage during the year, there were 4,133,029.56 fine ounces, costing \$3,784,417.64, and the number of silver dollars coined was \$5,343,715. The seigniorage on this coinage was \$1,559,297.36.

The coinage during the year consisted of 97,280,875 pieces, valued as follows:

Gold	 		 . \$30, 038, 140, 00
Silver dollars	 		 . 5, 343, 715, 00
Subsidiary silver	 		 7, 217, 220, 90
Minor coins	 		 . 1,086,102.90
		*.	
Total	 		 43 685 178 80

The total amount used in the coinage of silver dollars under the act of July 14, 1890, has been 27,911,259.48 fine ounces, costing \$29,110,-186.61.

The total number of silver dollars coined was 36,087,285. The total seigniorage was \$6,977,098.39, leaving a balance on hand at the mints of 140,699,760 fine ounces, costing \$126,758,218.

The total amount of silver purchased by the Government from March 1, 1873, has been as follows:

	Fine ounces.	Cost.
Under the act of 1873. Under the act of 1875. Under the act of 1878. Under the act of 1890. Under the act of 1887.	5, 434, 282 31, 603, 906 291, 272, 018 168, 674, 682 *6, 018, 921	\$7, 152, 564 37, 571, 148 308, 279, 260 155; 931, 002 7, 689, 036
Total	503,003,809	516, 623, 010

* Trade dollars.

The price of silver July 1, 1892, was 88 cents, the highest price attained during the fiscal year. The closing price on June 30, 1893, was 65 cents, a difference of 23 cents per ounce. The average price for the year was 84½ cents.

Late in June, India closing her mints to the coinage of silver, the price declined rapidly from $38\frac{3}{4}d$. to $30\frac{1}{2}d$., which was equal to a decline of $8\frac{1}{4}d$., or about 17 cents.

Imports and exports.

The movement of gold for the fiscal year shows an excess of exports over imports of \$86,897,275, while the excess for the fiscal year 1892 was only \$142,654.

The exports of silver exceeded the imports by \$7,653,813, being an increase over the fiscal year 1892 in the net exports of \$2,617,985.

Earnings and expenditures.

During the year the amount expended for the support of the Mint service aggregated \$1,344,005.07, as against \$1,500,494.03 for the fiscal year 1892. The total earnings of the mints and assay offices during the year were \$2,765,869.86, showing a difference between the earnings and expenditures of \$1,421,864.79.

Production of gold and silver in the United States.

During the calendar year 1892 the amount of the precious metals produced in the United States was estimated to have been:

	Fine ounces.	Commercial value.	Coining value.
Gold Silver	1,596,375	\$33,000,000	\$33,000,000
	58,000,000	50,750,000	74,989,900

FI 93—III

XXXIV REPORT OF THE SECRETARY OF THE TREASURY.

The production of gold and silver in the world was estimated to have been:

The world's coinage.

Information received as to the coinage of gold and silver by the various countries of the world for the calendar year 1892, shows the amount to have been:

Metallic stock of money in the United States.

The metallic stock of money in the United States, consisting of coin and bullion, on July 1, 1893, was estimated at \$1,213,559,169, of which \$597,697,685 was gold, and \$615,861,484 silver.

Use of gold and silver in the arts and manufactures.

The value of the gold and silver used in the industrial arts in the United States during the last calendar year, based upon the best information obtainable, was approximately, gold, \$16,616,408; silver, \$9,106,540. Of the gold \$10,588,703 and of the silver \$7,204,210 were new bullion.

PUBLIC MONEYS.

The monetary transactions of the Government have been conducted through the Treasurer of the United States, nine subtreasury officers, and 165 national bank depositaries. The number of such depositaries on November 1, 1893, was 153, and the amount of public moneys held by them on that date, including those to the credit of the Treasurer's general account and United States disbursing officers, was \$15,457,331.04, a reduction since November 1, 1892, in number of depositaries of six, and in amount of holdings of \$405,083.77.

LOANS AND CURRENCY.

The amount of United States interest-bearing bonds outstanding has been increased \$7,020 since November 1, 1892. This increase appears in the 4 per cent funded loan of 1907, and results from the issue of bonds on account of accrued interest on refunding certificates presented for redemption in such bonds as authorized by the act of Congress approved February 26, 1879.

No purchases of bonds were made during the twelve months ended November 1, 1893.

The volume of money in the country outside of the United States Treasury hás increased \$112,404,947 during the same period, as shown by the following table:

Money	outside	of the	Treasury.
-------	---------	--------	-----------

	Nov. 1, 1892.	Nov. 1, 1893.	Decrease.	Increase.

NATIONAL BANKS.

The report of the Comptroller of the Currency gives complete and detailed information as to the organization, condition, and management of all active and failed national banks during the year ended October 31, 1893.

One hundred and nineteen banks, with an aggregate capital of \$11,-230,000, were organized during the year, 46 went into voluntary liquidation, and 65 became insolvent, leaving a net increase of 8 for the year.

Of the new banks organized during the year, 44 are located in the Eastern States, 41 west of the Mississippi River, and 34 in the Central and Southern States.

The total number of banks in operation October 31, 1893, was 3,796, having an aggregate capital of \$695,558,120, and surplus and undivided profits on October 3, 1893, of \$339,153,447. The total amount of individual deposits was \$1,451,124,330, total bank deposits \$349,315,077, and total resources, \$3,109,563,284.

One hundred and fifty eight banks suspended during the year, having a capital stock of \$30,300,000. Of this number, however, 86, with a capital stock of \$18,205,000, resumed business. The general policy was inaugurated of permitting a bank to resume where it had not been improperly conducted and was perfectly solvent, but had been compelled to close through lack of currency caused by withdrawals on the part of depositors. The result of this policy proved to be of great benefit in restoring confidence and in checking widespread disaster to the banks.

The number that passed into the hands of receivers was 65, with a capital stock of \$10,885,000. Seven still remain in the charge of national bank examiners with prospects of speedy resumption.

A comparison of the figures appearing in the table showing the condition of the banks at the five dates upon which reports were called for by the Comptroller exhibits in the clearest light the effect of the financial stringency of the year. The aggregate resources or liabilities on October 3, 1893, were \$3,109,563,284, or \$400,531,613 less than on September 30, 1892, when the aggregate resources or liabilities were \$3,510,094,897, the highest point ever reached in the history of the system. This shrinkage is accounted for by the decrease in the following items of liabilities: Capital stock, \$8,032,677; individual deposits, \$314,298,653, and bank and bankers' deposits, \$181,338,125.

While national bank circulation secured by deposit of bonds increased \$40,080,015 during the year ended October 31, 1893, \$3,895,318 of that for which lawful money had been deposited was redeemed during the year, so that the net increase during the year amounted to \$36,184,697.

The gold held by the banks on October 3, 1893, the date of last report of condition of banks, as compared with the amount held September 30, 1892, showed an increase of \$8,410,815.

The liabilities of banks for all kinds of borrowed money, increased \$54,464,628, and surplus and undivided profits, \$9,701,265. The decrease in the items making up the resources are shown in loans and discounts, \$327,406,926; stocks, securities, etc., \$5,965,564, and due from banks and bankers, \$132,054,654, but cash of all kinds on hand increased \$30,968,606, and the United States bonds held for all purposes, \$40,601,250.

It is to be noted that the great proportion of this shrinkage occurred between May 4 and October 3, 1893.

The total assets of the banks suspending show a considerable excess over liabilities, but in some instances the assets of those which passed into the hands of receivers will fall below the liabilities, and there will therefore be a deficit in certain instances in dividends to creditors.

The general stringency of the money market throughout the greater part of the year seriously affected collections of assets by receivers, and, therefore, the amount of dividends paid has not reached as high a point as would have been the case under ordinary financial conditions. However, the general showing is, in view of all the circumstances, very creditable. In two instances banks which passed into the hands of receivers, with a million capital each and large liabilities, have already paid 70 per cent and in several others 50 per cent.

The number of insolvent banks placed on the inactive list during the year was 5, and the number whose affairs were closed and accounts settled was 4.

The Comptroller recommends—

- (1) That banks be allowed to issue circulating notes equal to the par value of bonds deposited to secure circulation.
- (2) That the tax on national-bank circulation be reduced to one fourth of 1 per cent.

- (3) That the Comptroller of the Currency, with the approval of the Secretary of the Treasury, be empowered to remove officers and directors of a bank for violation of law on proper showing.
- (4) That no executive officer of a bank or employé thereof be permitted to borrow the funds of such bank, except upon application to and approval of the board of directors.
- (5) That the assistant cashier, in the absence or inability of the cashier, be authorized to sign circulating notes.
- (6) That the law be amended by proper legislation to empower some class of public officers to administer the general oaths required by the provisions of the national-bank act.
- (7) That there be appointed by the Comptroller of the Currency, with the approval of the Secretary of the Treasury, two supervising examiners, to be paid for out of the public funds, whose duty it shall be to assist examiners in any matters that may seem to the Comptroller requiring unusual supervision.
- (8) That the law fixing the compensation of bank examiners outside of reserve cities be so amended as to allow the Comptroller of the Currency, with the approval of the Secretary of the Treasury, to fix such compensation in the same manner as that in which the compensation of examiners in reserve cities is now fixed.
- (9) That bank examiners be required to take an oath of office before entering upon the discharge of their duties, and to give bond in such amount and with such sureties as the Comptroller of the Currency may require.

In support of the various recommendations which are made the Comptroller submits certain suggestions calling the attention of Congress to the reasons why such amendments are pertinent and should receive attention. It is also suggested that some of these recommendations have been made heretofore, but have not received attention on the part of Congress.

Among other subjects which are discussed at length in the report of the Comptroller is that of clearing-house loan certificates and the functions which they are designed to discharge, showing that they are used simply to settle balances between banks belonging to the clearing-house association and do not circulate as money; also a general discussion of the provisions of the statute upon the subject of lawful money reserves.

The report contains the usual information in regard to State banks, which this year is more complete than ever before.

XXXVIII REPORT OF THE SECRETARY OF THE TREASURY.

FOREIGN COMMERCE.

The following table exhibits the foreign commerce of the United States for the fiscal year ended June 30, 1893:

Imports, exports, and tonnage movement.

	1892.	1893.
Imports: Merchandise: Dutiable	\$369, 402, 804 457, 999, 658	\$421, 856, 711 444, 544, 211
Total	827, 402, 462	866, 400, 922
Gold Silver	49, 699, 454 19, 955, 086	21, 174, 381 23, 193, 252
Exports: Merchandise: Domestic Foreign	1, 015, 732, 011 14, 546, 137	831, 030, 785 16, 634, 409
Total	1,030,278,148	847, 665, 194
Gold	50, 195, 327 32, 810, 559	108, 680, 844 40, 737, 319
Tonnage: Entered tons	21,013,424 21,161,033	19,581,816 19,760,746

The prominent facts disclosed by these figures are that the values of imports of merchandise attained the highest point in the commercial history of the country; and that the exports of gold reached a higher figure than ever before in a single year since the foundation of the Govern-In 1864 the exports of gold amounted to \$100,661,634, and this has been the largest amount of such exports until the last year. the net exports of gold were less than the net exports in 1864, being \$87,506,463 as compared with \$89,484,865 in 1864. The exports of 1864 were due to a pressure resulting from years of war and consequent derangement of commerce and industry, and to a general displacement of gold and silver from circulation by issues of bank and Government An outward movement of gold of nearly the same amount, occurring in a time of peace and apparently in defiance of commercial laws, will make the year 1893 memorable for this single fact in its financial and commercial experience. It is true the country was better able to lose \$87,500,000 in gold in 1893 than it was in 1864. An import and export trade of \$1,714,066,000 is evidence of an economic standing and capacity, immeasurably superior to the situation which prevailed in 1864, when the trade of the country was \$475,285,000, or only about one-fourth as great as in 1893.

There are other features worthy of mention. The imports as well as the exports of silver coin and bullion were greater in amount than is recorded in any one year in the history of the country. In 1873, which will be remembered as a year of panic and important monetary legislation, the exports of silver reached \$39,751,859—a point that had never been attained in previous years, and has never been exceeded or touched

in subsequent years until 1893, when the exports were \$40,737,319. In 1890 the imports of silver touched the high level of \$21,032,984—a movement probably due to some extent to the anticipated legislation on silver. In 1893 the imports were \$23,193,252, thus making a new record in the imports of silver. The year 1893 also exhibited a further decline in the relative importance of the American merchant marine in the foreign carrying trade of the country. Low as was the percentage of imports and exports carried in American vessels in 1892, so low as to give foundation to a belief that no lower point could be reached, there was an actual decrease in 1893, and 12.2 per cent must be recorded as the lowest point our relative participation in this industry has yet touched.

A number of circumstances combine to make the trade of the year 1893 an interesting study in the general course of international commerce. The previous two years were conspicuous on account of the enormous grain crop gathered in 1891 in the United States and a partial failure of the similar crop in European countries, thus giving this country a natural command over European markets. The prevalence of good prices for these grain products reacted greatly in favor of the An abnormally large cotton crop, coupled with an American farmer. unusually low price, would seem to have discriminated against the cotton grower in favor of the cotton manufacturer. Exports were largely increased and imports favored, the result being that the export trade figures for 1892 were larger than have ever before been attained in the commercial experience of the country. The influence of such an exceptional year was not confined to that period alone, but made itself felt in the succeeding year, with, however, constantly decreasing effect.

CUSTOMS ADMINISTRATION.

I concur in reports made to me by officers of this Department that under the existing system of conducting the collection of the revenue from customs many unnecessary ports with more or less expensive machinery exist.

A reference to the statement * contained in the appendix hereto of the customs business for the last fiscal year will, in my opinion, show that economy and good administration would be promoted by confining the customs business in the interior to the commercial centers. Custom-houses should be maintained on the frontier and seaboard, but a proper discrimination in their location should be exercised. The present system was established many years ago when importations were by sailing vessels principally, but now that the imports on the seaboard are concentrated at a few ports there is no apparent necessity for the continuance of many of the ports where business was formerly done, but at which there is now but little or no business transacted, as will be seen by the table referred to. It is true that section 253 of the Revised Statutes authorizes the Secretary of the Treasury to discontinue any port of

^{*} See table, page 1077.

delivery where the revenue received does not amount to the sum of \$10,000 per annum, but the authority contained in this section has been heretofore exercised in only a few instances, for the reason that it has not been considered safe, except in a few places, to dispense entirely with official supervision for the prevention of smuggling and other offenses against the revenue laws.

I am of the opinion that the service would be improved and the revenue collected with much less expense than at present if the law should be so amended as to authorize the Secretary of the Treasury to reduce the number of customs districts whenever in his opinion the interests of the service demand, and authorizing him to station proper officers wherever the necessities of commerce may require, with the power to enter and clear vessels and to perform similar duties connected with the navigation service. It is believed that this would materially diminish the expense of collecting the revenue, and at the same time secure as efficient service as can be had under the existing system. A provision recognizing the wisdom of this policy, but applying only to internal-revenue districts, was embodied in the bill making appropriations for the legislative, executive, and judicial expenses of the Government for the year ended June 30, 1877, as will be seen by reference to Statutes at Large, Vol. 19, p. 152.

I recommend the enactment of a law prohibiting any person from carrying on business as a custom-house broker or agent at the custom-house of any port of entry in the United States without a license from the collector or surveyor of the port, approved by the Secretary of the Treasury. Such license should be granted for the term of one year under such regulations as the Secretary may prescribe, and should be revokable for any violation of the customs laws or regulations, but bona fide clerks and private employés of importers should be exempted from the requirements of the law.

The act of April 25, 1890, respecting the World's Columbian Exposition at Chicago, placed the special importation of merchandise for the sole purpose of exhibition at said Exposition "under such regulations as the Secretary of the Treasury" might prescribe. the extraordinary character of the event and of the invitation extended by Congress to all nations to participate in it, and of the exemption from duties and charges of all merchandise imported for exhibition, it was considered proper, in conformity with the liberal intentions of Congress, to relieve such importations from many of the restrictions and formalities which are required under the general laws. Special regulations were, therefore, established for securing expedition and security to all imported exhibits and to simplify the proceedings on entry so as to afford the utmost convenience and dispatch. The regulations thus established appear to have been efficient for the protection of the revenue and to have given entire satisfaction to the importers.

The great influx of foreign goods at the port of Chicago entailed upon the customs officers at that port a vast amount of labor and supervision. The collector of the port, having estimated that an increase of his force would be indispensable, which, with other incidental expenses, would call for an additional outlay of \$250,000, my predecessor made application to Congress for a special appropriation of that amount, in addition to the regular allowance "for expenses of collecting the revenue from customs." Although the application was not successful, I deemed it my duty, in order to protect the revenue, to appoint a sufficient force for the collector's assistance. The work of withdrawing exhibits for consumption or for transportation and exportation is now in progress, and it may be safely stated that the income from importations at the Exposition will considerably exceed the expense incurred for their cus-Under date of November 7, 1893, the collector of toms supervision. customs reports: total receipts from duties to October 31, \$478,514.56; total expenditures, \$140,643.80; excess of receipts over expenditures, The receipts from duties will be largely increased by the **\$**337,870.76. removal of exhibits, while the expenditures will be gradually reduced.

It is proper to acknowledge in this report the efficiency of the customs service at the Exposition. The chief officer of the port and his assistants have shown praiseworthy skill and fidelity in the discharge of their difficult duties.

Expenses of collecting the revenue from customs.

The act of March 3, 1871, provides an annual appropriation for collecting the revenue from customs of \$5,500,000 "in additional to such sums as may be received from fines, penalties, and forfeitures connected with the customs, and from fees paid into the Treasury by customs officers, and from storage, cartage, drayage, labor, and services."

For the fiscal year 1871 these fines, penalties, forfeitures, etc., amounted to \$1,948,055.24. By the abolishment of many of the fees since that date these miscellaneous receipts have greatly diminished, and for the last fiscal year they only amounted to \$747,307.98. It will thus be seen that the regular appropriation for collecting the customs revenue for the last fiscal year was \$1,200,747.26 less than the sum available for the fiscal year 1871, and a deficiency appropriation of \$500,000 was made to meet the expenses of the past year.

Since the act of March 3, 1871, was passed the customs business has largely increased, not only by the growth of business at the principal ports but by the establishment of new ports and customs districts. The sum available for collecting the revenue from customs is always uncertain, and is insufficient to cover the absolute needs of the service. The Department is, therefore, very frequently compelled to refuse expenditures necessary to insure the proper enforcement of the revenue laws. I therefore recommend that at least seven millions be appropriated annually for this purpose, and that the miscellaneous receipts now credited to this appropriation be covered into the Treasury.

INTERNAL REVENUE.

The receipts from the several objects of taxation under the internalrevenue laws for the fiscal years ended June 30, 1892 and 1893, are as follows:

	Fiscal year ended June 30—			_
Objects of taxation.	1892.	1893.	Increase.	Decrease.
Distilled spirits Manufactured tobacco Fermented liquors Oleomargarine Miscellaneous collections	31,000,493.07 30,037,452.77 1,266,326.00 243,288.86	\$94, 720, 260, 55 31, 889, 711, 74 32, 548, 983, 07 1, 670, 643, 50 175, 390, 81	\$3, 410, 276, 90 889, 218, 67 2, 511, 530, 30 404, 317, 50	3.7.7
Total	153, 857, 544, 35	161, 004, 989. 67	7, 147, 445. 32	
The receipts from all sources o	f internal rev	enue for the	fiscal year	<u>!</u>
ending June 30, 1893, were				51, 004, 989. 67
The receipts from the same source were	•		, ,	53, 857, 544. 35

Making an increase in the receipts for the fiscal year just ended of.. 7, 147, 445. 32

The total cost of collection for the fiscal year ended June 30, 1893, was.. 4, 219, 769. 69 The total cost of collection for the fiscal year ended June 30, 1892, was.. 4, 315, 046. 26

The amounts herein stated are the receipts actually collected during the fiscal years mentioned, but in many cases the money collected on the last day of June is not deposited until the first day of July, thus causing a discrepancy between the collections and deposits.

A detailed statement of the receipts and expenditures will be found in the report of the Commissioner of Internal Revenue.*

It is estimated that the receipts from all sources of internal revenue for the fiscal year ended June 30, 1894, will aggregate \$150,000,000.

The percentage of cost of collection for the fiscal year ended June 30, 1893, was 2.62 per cent, as against 2.80 per cent for the fiscal year ended June 30, 1892.

The total production of distilled spirits, exclusive of fruit brandies, for the fiscal year ended June 30, 1893, was 128,651,782 taxable gallons; the total production for the fiscal year ended June 30, 1892, was 114,769,041 gallons, making an increase in the production of distilled spirits for the fiscal year just ended of 13,882,741 gallons.

There were also produced during the fiscal year ended June 30, 1893, 601,869 gallons of apple brandy, 57,589 gallons of peach brandy, and 1,699,090 gallons of grape brandy, making a total production of 2,358,548 gallons of brandy from fruits during the fiscal year ended June 30, 1893. A further comparison of the two fiscal years shows a decrease of 708,568 gallons in the production of apple brandy, a de-

^{*}See Appendix, page 548.

crease of 41,809 gallons in the production of peach brandy, and a decrease of 558,540 gallons of grape brandy for the fiscal year ended June 30, 1893, an aggregate decrease of 1,308,917 gallons of brandy produced from fruits as compared with the previous fiscal year.

The quantity of distilled spirits gauged for the fiscal year ended June 30, 1893, was 311,821,533 gallons; the quantity gauged for the fiscal year ended June 30, 1892, was 352,728,202 gallons, making a decrease in the quantity of spirits gauged for the fiscal year just ended of 40,906,669 gallons.

During the fiscal year ended June 30, 1893, 4,745 distilleries of all kinds were operated; for the preceding fiscal year 5,925 distilleries of all kinds were operated, a comparison showing a decrease of 1,180 in the number of distilleries operated for the fiscal year just ended.

During the fiscal year ended June 30, 1893, there were produced 34,591,179 barrels of beer; the number of barrels produced during the fiscal year ended June 30, 1892, was 31,856,626, making an increased production for the fiscal year just ended of 2,734,553 barrels.

For the fiscal year ended June 30, 1893, the total receipts from the taxes on tobacco, cigars, cigarettes, snuff, etc., were \$31,889,711.74. The receipts from the same sources for the fiscal year ended June 30, 1892, were \$31,000,493.07, showing an increase of \$889,218.67 for the fiscal year ended June 30, 1893.

Sugar bounty.

Total bounty paid upon sugar produced in the United states for the fiscal year ended June 30, 1893, was \$9,375,130.88; the bounty paid upon sugar for the fiscal year ended June 30, 1892, was \$7,342,077.79, making an increase of \$2,033,053.09 for the fiscal year ended June 30, 1893.

Expenses relating exclusively to the payment of the bounty on sugar for the fiscal year ended June 30, 1893.

	* .
Additional deputies, clerks, and employés	\$97, 890. 33
Laboratory supplies, etc	1, 265. 01
Sugar inspectors	30, 260. 93
Salaries of clerks, etc., in the office of Commissioner of Internal Revenue	9, 170. 00

The expenses for the same purpose in the fiscal year ended June 30, 1892, were \$147,831.61, making a decrease of \$9,245.34 for the fiscal year ended June 30, 1893.

I respectfully call attention to the various recommendations contained in the report of the Commissioner of Internal Revenue, and ask their favorable consideration by Congress.

ENGRAVING AND PRINTING.

One of the most pressing needs of this Bureau is additional room for the performance of its work, which has increased enormously since the original building in which it is located was designed in 1878. year the total number of sheets produced was 13,098,756, while in 1893 the number produced was 48,853,528, or an increase very nearly fourfold. Many of the employés required to execute this very large increase have been obliged to work in the cellar and other unsuitable places, and they have been greatly overcrowded in other parts of the building. informed that this has resulted in a condition of affairs that would not be tolerated in manufacturing establishments by many of the States. The best work can not reasonably be expected from such conditions. The remedy is for Congress to provide for the completion of the outbuilding of the Bureau, in which many of the processes now carried on in the main building can be conducted, and for an enlargement of the central projection of the building, plans for both of which have been prepared and estimates of the cost of which will be submitted to Con-The completion of the outbuilding would also provide for the proper accommodation of branches of the work that are now performed in temporary wooden sheds, and for the storage of valuable material. earnestly urge upon Congress the appropriation of the necessary money for this work.

At present this Bureau executes all of the work of engraving and printing required by the Treasury Department and much of that required by the other Departments of the Government. The most considerable work of this kind now executed outside of the Bureau is the postage stamps and postal notes required by the Post-Office Department. It might be well for Congress to consider the advisability of having this portion of the work of the Government also executed by this Bureau, as it has all the facilities for executing it and would afford perfect security to the Government. It would seem to present an anomalous condition of affairs for the Government to maintain a large establishment for the execution of this character of work, and yet have a part of it done in private establishments.

IMMIGRATION.

The Superintendent of Immigration reports for the fiscal year ended June 30, 1893, the arrival of 440,793 immigrants, of whom 439,730 were permitted to land, 1,063 were debarred according to law, and 577 were returned to the countries whence they came, having become public charges within one year after arrival. As compared with the preceding fiscal year there were 141,034 less arrivals, due in the main to the prevalence in the summer and autumn of 1892 of cholera. A rigid quarantine and long detention of vessels caused many steamship com-

panies to refuse thereafter to embark passengers. The spring of 1893 opened, however, with an augmented tide of immigration. Many who had been deterred from coming during the cholera period, together with others who were anxious to arrive before the restrictive measures of the act of March 3, 1893, went into effect came early in order to avoid the more thorough and rigid scrutiny authorized by that act.

The act of March 3, 1893, which went into effect May 12 last, has increased the efficiency of the service by providing a more systematic and careful examination of immigrants. Transportation lines have readily conformed to the new requirements, and have rendered valuable assistance in carrying out the provisions of the law. requirements of inspection previous to embarkation, and the compulsory listing of immigrants upon manifests, to be verified under oath by the captain of the vessel, or second in command, and the surgeon, before a consular agent of the United States, prior to departure, stating that they have made a personal examination, and that to the best of their knowledge and belief all on board their ship will be entitled to land, have contributed much to the betterment of the service. ship lines have, in order to avoid carrying persons likely to be debarred and returned at their expense, exercised a wholesome discretion in the sale of tickets to intending emigrants. In this way great numbers of the undesirable classes have abandoned their purpose to come or have been refused passage.

By a comparison of those now arriving with those who came in former years, the remedial effect of recent legislation becomes apparent. Few now are rejected as likely to become paupers. Only three persons were admitted on bonds as against 2,135 in the year 1891–'92, and the system of inspection is so faithfully conducted that if for want of proper examination abroad an idiot or insane person, pauper, or one likely to become a public charge, or one suffering from a loathsome or dangerous contagious disease, succeeds in embarking, almost certain detection awaits him here, and he is deported at the expense of the steamship company bringing him over.

Numerous complaints have been received from labor organizations protesting against Canadians coming into the United States day after day and returning each night to their homes, thereby taking advantage or the higher wages paid here and availing themselves of the low prices of living in Canada, thus enabling them to underbid our workmen in the home market and depriving American citizens of work.

A careful and economic use of the "Immigrant fund" has increased it from about \$25,000, April 1, to \$111,522.11, July 1, 1893; and the many salutary reforms introduced at the Ellis Island station, and others which are being perfected, give promise of a successful administration of the local affairs of immigration at the port of New York. The sale of privileges at Ellis Island alone, as provided in the act of March 3, 1893, has increased the revenues by \$18,810.

Alien contract-labor law.

The number of inspectors employed under this law during the fiscal year varied from 30 to 35, and 518 immigrants who were discovered to have entered into contracts in a foreign country to perform labor within the United States were deported, and many suits instituted against those seeking to employ them to recover the penalties prescribed by the statute. I recommend, as suggested by the Superintendent of Immigration in his report to the Department, that Congress will at an early date carefully revise and reënact the laws upon the subject, making them more certain, explicit, and comprehensive, and giving additional remedies to insure the enforcement thereof.

Chinese exclusion.

Much difficulty has been experienced by officers charged with the duty of assisting in the enforcement of the Chinese exclusion laws by reason of certain practices resorted to by Chinese persons of the cooly class.

Our laws require all Chinese of the exempt class, as a condition-precedent to landing, to submit to collectors of customs at the ports of first arrival certificates from the Chinese Government, or from such other Government as they may be citizens or subjects of, setting forth certain specified facts. The minister of China at this capital has notified our Government that consuls of China stationed in other countries have been authorized to issue certificates of the character referred Most, if not all, of the certificates thus far presented by Chinese seeking admission here have been issued by the Chinese consul at Ha-By permission of our Government Chinese laborers claiming to be destined for Havana, and who arrive at San Francisco, are permitted to pass through our territory en route. It has been ascertained that many such laborers subsequently claim and obtain admission to the United States as merchants, and in support of such claim they present certificates issued by the Chinese consul at Havana and viséd by the United States consul at that place.

It is not, of course, supposed that the Chinese or the American consuls intentionally aid in the violation of our laws, but there can be no doubt that many laborers have been admitted on merchants' certificates, obtained through misrepresentation and, probably, the corrupt use of money. Once landed, our officers have found it difficult and frequently impossible to secure the conviction and deportation of the holders of such fraudulent certificates, and I am of opinion that so long as our laws prohibit the landing of Chinese laborers, the privilege of passing through our territory can not be safely granted, and it should at once be revoked. If this privilege is continued, it will be impossible to secure an efficient execution of the laws passed by Congress for the exclusion of Chinese laborers.

By the terms of a joint resolution of Congress approved August 5, 1892, the laws prohibiting the coming of Chinese persons into the United States were practically suspended so far as to permit exhibitors at the World's Columbian Exposition and their employés to enter the United States without other requirement than evidence that they were bona fide exhibitors or employés whose services were required by exhibitors at Under this authority nearly 500 Chinese persons, repthe Exposition. resented to be actors and employés of firms holding concessions from the World's Columbian Exposition were admitted at San Francisco. No provision was made in the law for the return of these persons, who are entitled to remain one year after the close of the Exposition. inquiries made by officers of this Department it appears that a majority of the Chinese persons so admitted have not attended as exhibitors or employés at the World's Fair, and those who did so attend have been discharged by the exhibiting company which brought them here, and the present whereabouts of all of them are unknown. if not all of the Chinese so admitted will remain in the United States. and it will be very difficult and probably impossible to identify them as persons unlawfully within the country.

The act approved September 1, 1893, relating to the California Midwinter International Exposition, specifically extends to that Exposition the provisions of the resolution above referred to relating to Chinese, and it follows, therefore, that there is great danger of the introduction of numbers of Chinese laborers under the guise of actors, exhibitors, etc. It is therefore suggested that supplementary legislation is required under which the Secretary of the Treasury may exact bonds from the persons holding concessions providing for the return of Chinese admitted as participants in the Exposition.

THE MARINE-HOSPITAL SERVICE.

The report of the Supervising Surgeon General of the Marine-Hospital Service shows that during the fiscal year ended June 30, 1893, the total number of cases treated was 53,317, of which number 14,857 were treated in hospital, the remainder being office or dispensary patients. There were 1,353 pilots examined for color blindness, of which number 48 were rejected. One thousand and ninety-five surfmen and keepers of the Life Saving Service were examined, of which number 41 were rejected for physical causes. Two hundred and seventy-nine seamen of the merchant marine were examined before shipment as to their physical fitness, and 22 were rejected.

The balance of funds available at the commencement of the fiscal year was \$139,199.34, and the receipts from all sources during the year (tonnage tax and repayments for care and treatment of foreign seamen), were \$554,200.86. The expenditures were \$586,238.02, leaving a balance on hand at the close of the fiscal year of \$107,162.18. The balance of the appropriation for the prevention of epidemic diseases, available June 30, 1893, was \$925,965.45.

The Surgeon General reports that the marine hospital at Port Townsend was destroyed by fire September 9, 1893, without the loss of life. The building was of little value, and will be replaced by a new one, for which appropriation was made by the last Congress, and for which plans have been prepared. The other eighteen hospitals of the service are reported as being in good condition.

Following the threatened inroad of cholera into the United States during the summer and fall of 1892, and in view of the certain revival with increased severity of cholera in Europe in the following spring and summer, Congress enacted the law entitled "An act granting additional quarantine powers, and imposing additional duties, upon the Marine-Hospital Service, '' approved February 15, 1893. In accordance with the terms of this act quarantine rules and regulations were made and promulgated both with regard to foreign and domestic ports, and for the purpose of enforcing the Treasury Regulations abroad, medical officers of the Marine-Hospital Service were detailed to serve in the ports of London, Liverpool, Southampton, Glasgow, Hamburg, Bremen, Antwerp, Havre, Marseilles, Genoa, and Naples. Great care was exercised in enforcing these regulations to interfere as little as possible with commerce, and a distinct benefit to commerce was demonstrated by the decrease in the number of days of detention imposed on vessels on arrival at American ports. As anticipated, cholera became widespread throughout Europe during the summer and fall just past, the disease appearing at nearly all the continental ports where officers were stationed, assuming in several, namely, Naples, Leghorn, and Antwerp, the proportions of an epidemic, besides prevailing in epidemic form in the interior of Russia, Austria, Italy, and France.

It is believed that never before was this disease prevalent at one time in so many different localities throughout Europe, and the danger of its conveyance to the United States was much greater than if it had been limited to a few ports, even though it had raged in the latter in more violently epidemic form. To the care exercised by the medical officers attached to the various consulates and by the consular service abroad may be properly ascribed the almost total exclusion of cholera from the shores of the United States.

The rules for the government of domestic quarantine include a general supervision of the local quarantines by the Marine-Hospital Service, and in conformity therewith inspections have been made from time to time of the various State and local quarantines, and at one port, namely, Brunswick, Ga., where it was found that the regulations made by the Treasury Department were not being fully complied with in accordance with the act of Congress, an officer of the Marine-Hospital Service was detailed by the President to assume charge of the quarantine. At the quarantine for the port of New York an inspector of the Marine-Hospital Service has been detailed to observe the enforcement of the regulations of the Treasury Department, his services also being

valuable in observing, through examination of the bills of health, and other ship's papers, the character of the work performed by the medical officers detailed in foreign ports.

The quarantine service of the Marine-Hospital Bureau during the past season has included the preparation and enforcement of the regulations to be observed at foreign ports, the regulations to be observed by ships at sea, the regulations to be observed by State and local quarantines of the United States, and the conduct of the nine national quarantine stations, extending from Sandy Hook, on the Atlantic coast, to Port Townsend, Wash., on the Pacific. These stations within the past year have been perfected and placed in a condition of great efficiency. At Camp Low, Sandy Hook, N. J., the station has been fitted up with complete steam disinfecting apparatus, bathhouses, and all necessary appliances for the proper care of a thousand immigrants held under suspicion. The station at Delaware Breakwater, at the mouth of the Delaware Bay, has been placed in like condition, and at the junction of the Delaware Bay and River a pier has been erected, to which the largest vessels may be moored for disinfection, which can not be done at the Breakwater on account of its exposed situation. On this pier, at Reedy Island, have been placed the most modern steam disinfecting chambers, sulphur blast furnace, tanks for disinfecting solutions, composing a complete plant for the rapid and thorough disinfection of an infected vessel. With this plant at Reedy Island and the accommodation for immigrants near the Delaware Breakwater, an efficient quarantine guard has been established for the city of Philadelphia and the other cities on the Delaware River and Bay. remaining quarantines are at the entrance of the Chesapeake Bay; at Blackbeard Island, off the coast of Georgia; at the Dry Tortugas, off the coast of Florida; Chandeleur Islands, in the Gulf of Mexico; San Diego, Cal.; Angel Island, San Francisco, Cal.; and Port Townsend, The quarantine station at Brunswick, Ga., formerly a local quarantine, will require a new location. The quarantine station at Chandeleur Islands, in the Gulf of Mexico, was destroyed by storm October 3, 1893. This station from its inception has been of invaluable aid to commerce and to the cities on the Gulf coast. Its reëstablishment at some new site is earnestly recommended.

To protect the United States from the invasion of cholera through Canada, the Canadian quarantine authorities, through the solicitation of the Surgeon General of the Marine Hospital Service, agreed, with the acquiescence of their government, to disinfect the baggage of all immigrants at Quebec, and to permit the presence of two medical officers of the Marine Hospital Service to certify to such disinfection for the benefit of the State and local quarantine officers in the several States to which the immigrants might pass from Canada. This disinfection has been faithfully carried on during the whole season, and has added no little to the security of the United States.

F1 93----IV

On June 27 it was reported there had been a case of yellow fever at Conquest's Camp on the Satilla River. An officer of the Marine-Hospital Service was immediately sent to this point, and took the most thorough and successful measures for preventing any further outbreak of the fever. It was ascertained that this patient had, previous to going to Conquest's Camp, taken his vessel, the Anita Berwind, to Brunswick, and an investigation showed that the quarantine regulations of the Department were only in part being enforced at the Brunswick quarantine. as before stated, the Government assumed charge of this quarantine and assigned a medical officer in charge. This officer himself contracted the yellow fever, as now believed, in Brunswick, for during his short period of service at the quarantine station he inspected no infected vessel and was exposed to no case of yellow fever. Moreover, investigation has proved that the city was probably infected before his detail. Other cases developed at points unconnected with the first case or with each Thorough disinfection, not only of the rooms and houses where the first cases appeared, but of suspected areas, was carried on, but without avail, and subsequent events have shown that the city was infected in a number of independent places. Sanitary cordons were established by the Marine-Hospital Service, and a detention camp provided for the benefit of those desiring to leave the infected territory. There was no development of the disease outside of the sanitary cordons. period of the epidemic in Brunswick, to November 23, 1893, at which date it was practically extinct, there were 1,001 cases and 53 deaths. Rules, to be observed for preventing the spread of the disease from one section of the country to another, have been promulgated by this Department.

On August 29 a case of cholera was reported in Jersey City, and immediately the Government assumed a supervisory charge over the preventive measures to prevent the spread of the disease. The origin of this case has not been officially determined, but there were no subsequent cases.

Relief for the sea islands of South Carolina.

After the violent storm of August 27, the attention of the Department was called to the unsanitary condition of the sea islands off the coast of South Carolina, by reason of the unburied bodies of men and animals, the pollution of the wells and obstruction of the drains caused by this storm, and a direct appeal was made for assistance. On approval of the President a limited amount was set aside from the epidemic fund for carrying out measures necessary to prevent the outbreak and spread of epidemic disease, and an officer of the Marine-Hospital Service was detailed to visit the stricken islands, superintend the clearing of the wells, the burying of dead animals, and treatment of the sick. This work, purely of a sanitary nature, is to be supplemented by the efforts of the Red Cross Society in relieving the physical necessities of the people.

In addition to the foregoing, the Marine Hospital Service, in accordance with the law, has published each week an Abstract of Sanitary Reports, both from its medical officers abroad and from the United States consuls, and also information concerning the health of the various parts of the United States; these abstracts being sent principally to the leading sanitarians and health officers of the United States and others interested in this subject.

REVENUE CUTTER SERVICE.

The performance of the regular duties of this service has continued in a faithful and efficient manner. Thirty-four vessels have been in commission, carrying a complement of 222 officers and 762 men.

The following is a statistical statement of the duties performed:

Aggregate number of miles cruised by vessels of the service	305,807
Number of merchant vessels boarded and examined	30, 502
Number of merchant vessels found violating the law in some particular	
and seized or reported to proper authorities	675
Fines or penalties of vessels so seized or reported	\$160, 814. 10
Number of vessels in distress assisted	119
Value of vessels and their cargoes imperiled by the sea thus assisted	\$2,838,250
Number of persons on board vessels assisted	945
Number of persons taken out of the water and saved from drowning	29

The expense of conducting the service has been \$920,342.89, of which sum \$21,941.81 were used in enforcing the provisions of the act of Congress approved May 16, 1888, regulating the anchorage of vessels in the bay and harbor of New York.

One new vessel of the third-class (steamer *Hudson*) has been completed during the year, placed in commission, and assigned to duty at the port of New York, and one vessel of the third class, the *Tench Coxe*, has been examined and found not worth repairing, and is recommended to be sold.

New vessels.

A number of new vessels are urgently needed for the proper maintenance of this service, viz: One cruising cutter of the first class on the New England coast, two on the Great Lakes, two on the Pacific coast, and a small steam vessel for boarding purposes at San Francisco; and the necessity for these new vessels is annually increasing. Many of the vessels are old and nearly worn out, the expense of keeping them in repair increases with their age, and the duties required of them constantly increasing can not be as efficiently performed as with abler vessels.

The command of the fleet, composed of four vessels of the Navy, viz, Mohican, Petrel, Ranger, and Albatross, and revenue steamers Rush, Corwin, and Bear, designated by the President for patroling the Bering Sea and waters of Alaska Territory for the protection of the Seal Islands and the enforcement of the provisions of the modus vivendi with Great

Britain, devolved upon Commander Nicoll Ludlow, U.S. Navy. That duty has been efficiently performed, and no vessels are reported as having entered or attempted to enter the Bering Sea in violation of the provisions of the convention.

"Rush."

From March 20 to April 18 the revenue steamer Rush, Capt. C. L. Hooper, commanding, was engaged in making a special cruise to Honolulu, Sandwich Islands, in the interest of the Department of State, for the purpose of conveying Special Commissioner Blount and party to those islands. This cruise, covering a distance of 5,155 miles, was successfully accomplished. Upon her return to San Francisco, April 18, she was assigned to duty with the Bering Sea fleet.

On July 2, a short distance north of Chirikoff Island, Alaska, the commanding officer of the *Rush* seized the American schooners *St. Paul* and *Alexander* for violation of section 1956, Revised Statutes, and delivered them into the custody of the United States district court at Sitka for trial. On September 28 the *Rush* returned to San Francisco, having cruised 12,611 miles on patrol duty in Bering Sea.

"Corwin."

The steamer *Corwin*, Capt. F. M. Munger, commanding, was assigned to duty with the Bering Sea fleet April 22, and was thus engaged until October 3, when she returned to San Francisco, having cruised a distance of 10,399 miles on this duty.

"Bear."

The revenue steamer Bear, Capt. M. A. Healy, commanding, sailed from San Francisco May 2 on her annual cruise to the Bering Sea and Arctic Ocean. She visited the Seal Islands en route north, inspected the refuge station at Point Barrow, and delivered the supplies necessary for the maintenance of the station for the ensuing year, and assisted a number of whaling vessels in those waters. By request of the Honorable the Secretary of the Interior the Bear made several trips to the coast of Siberia and transported to Port Clarence in all 127 domesticated reindeer, in furtherance of the enterprise of introducing them into the Territory for the benefit and eventually for the maintenance of the natives of Alaska. This enterprise is under the general supervision of the commissioner of education for Alaska. To August 31 the Bear had cruised 6,584 miles in Alaskan waters, and will remain as a guard in the vicinity of the Seal Islands until November 15 next, after which date there will be no danger of poachers raiding the seal rookeries on the islands.

"Perry."

On August 19, at Erie, Pa., the officers and crew of the revenue steamer *Perry* succeeded in preventing the destruction by fire of a large amount of property on shore near where that vessel was lying, and also the destruction of the steamers *Mystic*, *F. W. Bacon*, and *Erie*, and the schooner *Plow Boy*, by keeping them clear of the burning steamer *Annie Laurie*.

"Johnson."

October 28, at Milwaukee, Wis., the officers and crew of the steamer *Johnson* rendered efficient and at times hazardous service in their endeavors to extinguish a fire which proved very disastrous to that city.

The steamer *Boutwell*, at Savannah, Ga., rendered efficient aid in carrying supplies and relieving the distress of sufferers from the hurricane which swept the coasts of South Carolina and Georgia August 27 and 28, which service elicited the thanks of the Citizens' Relief Committee.

The steamer *Seward*, on Mississippi Sound, rendered similar service to the people of that locality immediately after the hurricane of October 1 and 2.

The officer charged with the enforcement of the act of Congress approved May 16, 1888, regulating the anchorage of vessels in the bay and harbor of New York, reports having found 755 vessels anchored in violation of the regulations, and ordered their removal. Some of these complied at once on being notified, but it was found necessary to use the force of the patrol steamer *Manhattan* in many cases, and 297 vessels were thus assisted by being moved from the channel ways to a proper anchorage.

Material assistance has been given to the Life-Saving Service as customary by the revenue cutters. Boats, stores, and supplies have been transported and delivered, and a distance of 6,454 miles cruised for this purpose alone.

The revenue cutters stationed at the ports on the Atlantic and Gulf coasts have coöperated with, and rendered valuable assistance to, the Marine-Hospital Service in preventing the importation and spread of epidemic diseases.

NAVIGATION.

The annual report of the Commissioner of Navigation states that the documented tonnage, by grand divisions of the country, is as follows:

Total tonnage.

	Grand divisions.	. 18	93.
Pacific coast		 No. 17, 913 1, 549 3, 761 1, 289	Tons. 2,807,690 457,422 1,261,060 298,890
Total	•••••••••	 24, 512	4,825,07

Documented iron and steel tonnage.

	Grand divisions.			1893.
Pacific coastGreat lakes			No. 575 40 172 32	Tons. 555, 407 69, 154 265, 727 5, 248
Total		•	819	895, 536

Documented tonnage built during the fiscal year 1893.

	Grand divisions.		1893.
Pacific coast		No. 599 91 175	Tons. 89, 109 13, 721 99, 271 9, 538
Total		956	211, 639

Tonnage of iron and steel vessels built during the last fiscul year.

Grand divisions.	•.	1893.
Atlantic and Gulf coasts	No. 28 1	Tons. 27, 941 3, 529
Great lakes. Western rivers. Total.	35 1 65	62, 82: 23 94, 53:

Increase of large vessels during the last fiscal year:

Vessels over 1,000 tons, documented.	18	392.]	1893.
Steam vessels Sailing vessels	No. 640 403	Tons. 1, 162, 222 586, 281	No. 647 393	Tons. 1, 214, 413 568, 879
Total	1,043	1,748,503	1,040	1,783,292

The documented tonnage of the United States at the end of the fiscal year of 1893 was 60,150 tons more than the tonnage reported the previous year. The foreign-going tonnage, not including that engaged in the whale fisheries, is 883,199 tons, of which 241 vessels, aggregating 257,147 tons, are propelled by steam, and 1,031 vessels, aggregating 626,052 tons, are other than steam. Of the total documented tonnage, 2,183,272 tons are steam and 2,641,799 tons are other than steam.

The registered vessels in the whale fishery aggregate 16,606 tons. The enrolled and licensed vessels include 3,854,693 tons engaged in the coasting trade along the seacoast, the rivers, and the Great Lakes of the United States, and 70,575 tons licensed for the fisheries. The registered vessels aggregate 1,343, with a tonnage of 899,803, and the enrolled and licensed vessels number 23,169, with a tonnage of 3,925,268.

The foregoing statistics do not embrace certain craft exempted by acts of Congress from the regulations relating to the documenting of vessels, Including such documented vessels owned in this country, the late census shows that at the beginning of the year 1890 the transportation fleet of the United States aggregated 7,633,676 tons gross, valued at \$215,069,296, the crews of the vessels numbering 106,436 men, and their wages amounting to \$36,867,305 per annum. The values of wharves, elevators, shipyards, and other similar plants are not embraced in these figures, nor are the wages of the persons employed in connection with them.

American vessels during the season of 1889 carried in the United States the equivalent of 15,518,360,000 tons a mile, which was equal to nearly one-fourth of the total ton-mileage reported for all the railways in the United States. The transportation tonnage, documented and undocumented, at the beginning of the year ending 1890 is reported in the census to be as follows:

	Grand divisions.		Grosstons.	Value.
Atlantic coast			2,794,440	\$123, 874, 17
Pacific coast			441, 939	3, 851, 27 23, 067, 37
				48, 941, 47- 15, 335, 00
Total		••••••	7, 633, 676	215, 069, 29

The annual "List of Merchant Vessels" published by the Bureau of Navigation shows that in addition to the tonnage mentioned above as having been built during the year a considerable number of war and other vessels have been constructed for the various services of the Government.

LIGHT-HOUSE SERVICE.

The number of light-houses and beacon lights on June 30, 1893, was	1, 041
Post lights	,
Light-ships	40
Buoys of all kinds	4, 491
Fog signals operated by steam, hot air, or clockwork	303
Steam and sailing tenders, including steam launches	40
Number of persons employed in the Light-House Service, including light-	
keepers, laborers in charge of river post lights, crews of light-ships, and	
. light and buoy tenders, etc	3, 463
The increase in light-stations was	8
Appropriations made for the support of the Light-House Establishment for	
the year to end June 30, 1894	\$2,558,500
Appropriations made by the sundry civil appropriation act approved March	
3, 1893, for increases to the Light-House Establisment	\$389, 500

The Light-House Board is making marked progress in replacing old methods with new. This is notably shown in the installation of electric lights on one light-ship and in setting up revolving lights on two other light-ships. The Board has made some progress in its studies as to the methods of making electric communication between light-ships and the shore, and it only waits for an appropriation for the purpose to attempt to carry its theories into practice. It has continued its efforts to use buoys carrying electric lights, and this was successfully done on the Chicago water front during the Columbian Exposition.

The exhibit made by the Light-House Board at the World's Fair of a light-house in full operation, attended by its staff of light-keepers, of the various buoys in use which were grouped about the light-house, of its lenses and lights of various kinds, and in certain cases revolving and flashing white or red light, and the various accessories to its lights, buoys, and fog signals, attracted much attention from the visitors, and showed something of the rank the United States Light-House Establishment holds with the light-house establishments of other maritime countries.

The severe storms of August and October, 1893, did much damage to the lights and buoys on our coasts. One light-ship was sunk at its moorings off Cape May, N. J., and four of the crew were lost. One was torn from her moorings and driven on shore on the South Carolina coast not far from Charleston, fortunately without loss of life. Many light-house structures were badly damaged, and many light-keepers lost all their effects, on the Atlantic and Gulf coasts. The attention of Congress has been invited elsewhere to the need of appropriations to repair these damages and to reimburse these keepers for their private losses, incurred by their devotion to their public duties.

Independent of this especial need, I invite attention to the necessity for making adequate provision for the maintenance of the Light-House Establishment. Last year a little more than two and a half millions was appropriated for the purpose. That is barely sufficient, with the severest economy, to keep up the service; but it does not enable the Board to properly man its stations; it does not enable the Board to replenish its stores of material kept to meet emergencies and which have been nearly exhausted for that purpose, nor does it enable it to keep the Establishment up with the advances made by the light-house establishments of other countries. The Board reports that the condition of the service leaves much to be desired, and that all that is needed is a proper supply of funds to enable it to bring our Light-House Service up to the desired standard. I recommend that due appropriation be made for the proper maintenance of our present Light-House Service, and that if the estimates of the Light-House Board can not all be met, reduction be made in the estimates for new works rather than in the estimates for the maintenance of those row in operation.

Regulations have been prepared by the Board, and approved and promulgated by me, making appointments and promotions in this service depend upon merit alone, thus placing it upon an absolutely nonpartisan basis. This has been considered necessary in order to promote the integrity and efficiency of this peculiar service, in which experience and skill are indispensable qualifications.

LIFE-SAVING SERVICE.

The statistics of the operations of the Life-Saving Service during the year are as follows:

The number of disasters to documented vessels was 427. On board these vessels were 3,565 persons, of whom 3,542 were saved and 23 lost. The value of the property involved is estimated at \$8,098,075, of which \$6,442,505 was saved and \$1,655,570 lost. The number of vessels totally lost was 88. Besides the foregoing there were 154 casualties to smaller craft, such as sailboats, rowboats, etc., on which there were 327 persons, of whom 321 were saved and 6 were lost. The value of the property involved in these instances is estimated at \$153,035, of which \$128,345 was saved and \$24,690 lost.

The following is the aggregate:

Total number of disasters	581
Total value of property involved	\$8, 251, 110
Total value of property saved	\$6,570,850
Total value of property lost	\$1,680,260
Total number of persons involved	3,892
Total number of persons lost	29
Total number of shipwrecked persons succored at stations	663
Total number of days' succor afforded	1,659
Number of vessels totally lost	88

Besides those included in the above table there were 47 other persons rescued who probably would have perished but for the aid of the life-saving crews. With the exception of a single year the extent of the assistance rendered in saving vessels and cargoes was greater than ever before, 504 vessels having been aided in getting afloat when stranded, repaired when damaged, piloted out of dangerous places, and assisted in similar ways by the station crews. In 235 instances vessels in danger of stranding were warned off by the signals of the patrolmen.

The number of stations embraced in the service at the close of the fiscal year was 244, and the cost of the maintenance of the service during the year was \$1,231,893.45.

Since the date of the last report new stations have been completed and put in operation at Brant Rock, Mass.; Fort Niagara, N. Y., and Kewaunee, Wis. A station is also approaching completion at Ashtabula, Ohio, and another between Point Lobos and Point San Pedro, California. The station authorized by act of Congress to be established on the grounds of the World's Columbian Exposition at Chicago, Ill., to serve the double purpose of a permanent and an exhibition station, was equipped and manned at the opening of navigation on the lakes. During the continuance of the Exposition it admirably fulfilled its design, not only by exhibiting the character of the various types of boats, apparatus, and appliances belonging to the service, and illustrating by frequent drills the methods employed in rescuing imperiled mariners, but on several occasions by effecting deliverances from actual shipwreck occurring within the scope of its operations.

The old Chicago station situated at the mouth of the river, which, owing to the limited dimensions of its site, was never fitted for the residence of a crew or an adequate depository for modern life saving appliances, and which the new station was designed to supersede, was utilized as an adjunct or auxiliary post, two surfmen being detailed to keep a lookout and be always present at this point where minor accidents by the capsizing of small boats, etc., are frequent; and it was connected with the new station by telephone. The experience of the past season has shown the necessity of the continuance of this plan.

The last report expressed the belief that the increased rates of compensation provided for the crews by the act of July 22, 1892, would result in checking the resignations which had menaced the efficiency of That expectation has been justified by the experience of the service. The present rates, together with the salutary method of making selections for employment in this service prescribed by section 10 of chapter 117, Laws of 1882, which provides "That the appointment of district superintendents, inspectors, and keepers and crews of lifesaving stations shall be made solely with reference to their fitness and without reference to their political or party affiliations," thereby giving assurance that party fluctuations will not affect the tenure of employment, have, it is believed, resulted in securing the best qualified men where changes have necessarily occurred, and not only afford promise of the continuance of the acknowledged past preëminence of the service, but encourage the hope of even better results in the future.

The occurrence of several furious storms along the Atlantic coast during the months of May and August of the present year, resulting in the serious loss of life and great destruction of property, has caused considerable public agitation of the question whether the period during which the stations are manned (now beginning the 1st of September and ending the 1st of May following) should not be extended to embrace these two months. In view of the frequency and violence of the tempests, which the experience of several recent years has shown are liable to devastate the Atlantic seaboard during these months, the suggestion that the active season be prolonged to include them would seem to be well worthy the consideration of Congress.

STEAMBOAT-INSPECTION SERVICE.

The Supervising Inspector-General reports the inspection, during the year, of 7,837 domestic steam vessels, with a net tonnage of 1,621,531.50. The officers licensed numbered 37,795.

The number of foreign passenger steamers inspected was 302; net tonnage, 584,247.24.

The number of passengers carried on steamers during the year is estimated at nearly 700,000,000. The number of lives lost was 228, being an increase over that of the previous year of 28. Of the lives lost, 48 were passengers, being the same number of passengers lost in the previous year; 180 of the persons lost were officers or others employed on the steamers.

The personnel of the service at the end of the fiscal year consisted of 165 officers, clerks, and messengers.

The expenses of the domestic service were, for salaries, \$248,785.24; contingent expenses, \$43,652.56; total \$292,437.80.

The expenses of the foreign service were only \$467.54.

The value of the inspection service as a preventive of the loss of life under the act of February 28, 1871, may be inferred from the fact that, though the number of vessels has increased since the act went into effect more than twofold, and the number of passengers carried more than threefold, the average loss of life annually is less than one half that occurring under previous laws, the average loss during the continuance of the law of 1852, nineteen years, having been 490.

Although the work of the service has more than doubled, the contingent expenses of the service under its present administration have been kept within the amount required when the inspections were less than one-half the present number, such expenses having been \$44,688.94 for the inspection of 3,444 steamers in 1872, while for the last fiscal year they were but \$44,120.10 to inspect 8,142 steamers.

The Supervising Inspector-General in his report, recommends several amendments to the inspection laws intended to meet more nearly the present requirements of the service. The recommendations are commended to Congress for its consideration.

COAST AND GEODETIC SURVEY.

Full details of the field and office work of the Coast and Geodetic Survey are given in the annual report of the Superintendent, which is required by law to be submitted to Congress in the month of December in each year. During the fiscal year seventy-six parties were employed upon the coasts or within the limits of fourteen States on the Atlantic and Gulf seaboard, two States and one Territory bordering on the Pacific Ocean and on Bering Sea, and in eight States and two Territories in the interior. Their work included the measurement of base lines; reconnoissance and triangulation; determinations of time, latitude, longitude, and azimuth; observations for the force of gravity and determinations of the variations of latitude; geodetic leveling; observations for the magnetic declination, dip, and intensity; topographic surveys, and hydrographic work involving inshore and offshore soundings, and observations of currents and tides.

The preliminary surveys needed for the location of the northeastern boundary line between the United States and the Dominion of Canada are advancing towards completion; the resurvey of Boston Harbor, made necessary by changes both natural and artificial during the past forty years, is in active progress. The survey of the Connecticut River to the head of tide water is nearly completed, and that of the Hudson

River has made good progress. Stations were occupied in the State of Tennessee for connecting the triangulation of that State with the triangulation of the State of Kentucky. A reconnoissance and triangulation resting upon the Atlantic base has been carried through Georgia and Alabama and nearly completed to the Gulf of Mexico. Progress has been made in the reconnoissance for a triangulation along the Rio Grande, which will result in a more precise location of that part of the boundary line between the United States and Mexico. Surveys have been begun for the location of the boundary line between California and Nevada from Lake Tahoe to the Colorado River; and officers of the Survey have been sent to southeastern Alaska under instructions to coöperate with officers detailed by the Dominion of Canada in locating the boundary line between Alaska and the British Possessions in North America.

In compliance with requests from national, State, or municipal authorities, and with the approval of the Department, certain officers of the Survey were detailed for special service as follows: One to cooperate with the Commission organized for the adjustment of the boundary line between the States of Delaware and Pennsylvania; one to delineate accurately upon suitable maps the boundaries of the natural oyster beds of the State of Virginia; one to act as a member of a Board of engineers to devise a system of sewerage and grading of streets for the city of San Francisco, and one to cooperate with the Harbor Line Commission of the State of Washington in harbor surveys on Puget Sound.

In accordance with law, one of the older officers of the Survey has continued to serve as a member of the Mississippi River Commission, and another is still serving, by appointment of the President, as a member of the International Boundary Commission organized for the location of that part of the United States and Mexican boundary line extending from the Rio Grande to the Pacific.

At the World's Columbian Exposition the Survey was represented by a carefully prepared collection of instruments and apparatus that were best adapted to illustrate the several branches of fieldwork; by a selection from the publications, and by sets of standard weights and measures. In order to exemplify fully the recent improvements in hydrographic work, particularly in apparatus for deep-sea sounding and observations of currents, the Coast and Geodetic Survey steamer *Blake*, supplied with a complete equipment of such apparatus, was moored at the Exposition wharf.

The regular work of the Office of Standard Weights and Measures has been somewhat interrupted during the past fiscal year by the extra labor involved in preparing a suitable exhibit for the World's Columbian Exposition. Some progress was made in the preparation of two complete sets of standard weights and measures for the States of North and South Dakota, and in compliance with a request from the State of Ohio the standards belonging to that State were polished and adjusted.

The usual amount of work was also done for other branches of the United States Government. For the Internal Revenue Bureau sugar flasks were graduated and comparisons were made of alcoholometers and quartz plates; for the Division of Customs, valuable aid was rendered in securing suitable sheet metal gauges to conform with the act of Congress of March 3, 1893, and a 72-inch scale for the Ordnance Office, War Department, was graduated and its corrections determined in terms of the national standard.

A bulletin was issued in April, 1893, by the Superintendent of weights and measures, approved by the Secretary of the Treasury, announcing that in the future the office would regard the international prototype meter and kilogram as fundamental standards, thus putting our weights and measures in direct relation with those of all other civilized nations.

PUBLIC BUILDINGS.

During the past year there were under the control of the construction branch of this Department 371 buildings, classified as follows:

Completed and occupied	••••	273
Under course of construction, repairs,	and modifications specially appropriated for	60
Active operations not yet commenced.		38
		371

The following statement shows the amount expended on public buildings during the year ending September 30, 1893:

For sites and in construction of new buildings	\$3, 787, 943. 47
For repairs and preservation of public buildings	190, 729, 44
For heating apparatus for public buildings	88, 856. 11
For vaults, safes, and locks for public buildings	53, 242, 10
For photographic duplication of plans	
· ·	

4, 126, 159, 25

The increased amount of work imposed upon the office of the Supervising Architect over that existing during previous years emphasizes the necessity for an increase of the allowance beyond that previously made for the required technical service, and this has been given consideration in the preparation of estimates to be submitted for the coming fiscal year.

DISTRICT OF COLUMBIA.

The net expenditures on account of the District of Columbia for the fiscal year 1893 were \$5,827,525.02. The net revenues deposited in the Treasury on this account for the same period were \$3,111,742.27.

On July 1, 1892, there were due and payable \$839,100 six per cent bonds, and on July 26, 1892, \$44,400 seven per cent bonds, making a total of \$883,500. To provide for the payment of these bonds there were issued and sold under the provisions of the act of March 3, 1891, \$400,000 three fifty per cent bonds, at a premium of 1.291 per cent, realizing the sum of \$405,164, which was applied to their redemption leaving \$478,300 to be absorbed by the sinking funds.

There have been issued during the fiscal year \$9,250 of the 3.65 per cent bonds in satisfaction of judgments of the Court of Claims.

The net reduction of the bonded debt during the fiscal year was \$558,000, and of the annual interest charge, \$43,224.

The bonded debt has been reduced since July 1, 1878, \$3,531,250, and the annual interest charge \$305,344.72.

At the close of the fiscal year 1892 the net surplus arising from the sale of bonds in which the retention from District contracts was invested was \$23,777.27. During the fiscal year 1893, in settlement of these accounts, the sum due the contractors is in excess of the amount realized from the sale of bonds, showing a net loss of \$1,603.88, reducing the surplus at the close of the fiscal year to \$22,173.39, which has been covered into the Treasury to the credit of the United States and District of Columbia in equal parts, as provided in the act of February 25, 1885.

All of the retentions from contractors to be settled under the provisions of this law have been disposed of, the five years for which they were to be held having expired.

Investments of retentions under the provisions of the act of March 3, 1887, are made only at the request and at the risk of the contractor, and at the end of the guaranty period settlement is made by delivering to him or his legal representative the securities in which the retention is invested.

The duties relative to District affairs devolving upon the Treasurer of the United States are of varied and diverse character and attended with great responsibility, and they are constantly being increased by Congressional enactments. These duties the Treasurer exercises in the capacity of a Federal officer by means of a separate department of his office, known as the sinking-fund office of the District of Columbia, but which is not a branch of the Treasury Department, but is in point of law legitimately and properly an office of the United States and a branch of the Treasurer's Bureau, for which he is as much responsible under his bond as for any other division of his office. To remedy this somewhat anomalous condition, the Treasurer recommends that Congress be asked to make the sinking-fund office a regular division of the Treasurer's office and incorporate the estimates for the service thereof in the appropriation bill for the service of the Department, placing the employés upon the rolls upon the same footing as far as practicable with the regular employés. It would only be necessary at the end of each fiscal year to charge one half of the expenses of the office to the District of Columbia, and would enable the Treasurer to detail clerks to assist in the duties of the office when necessary, and make an equitable adjustment of the expenses.

Detailed information in regard to the affairs of the District of Columbia, will be found in the report to be submitted by the District Commissioners and by the Treasurer of the United States, who is by law exofficio commissioner of the sinking-fund of the District.

WORLD'S COLUMBIAN EXPOSITION.

The exhibit of the Treasury Department at the World's Columbian Exposition was prepared from material furnished by the offices of the Coast and Geodetic Survey, Internal Revenue, Supervising Architect, Life-Saving Service, Marine-Hospital Service, the Mint, the Light-House Establishment, the Bureau of Statistics, the Register of the Treasury, and the Bureau of Engraving and Printing. Though the Treasury Department, owing to the nature of its functions, affords a less attractive field for display than other Executive Departments of the Government, its exhibits proved interesting, and in many respects instructive.

The allotment to the Treasury Department from the total appropriation for the United States Government exhibit was \$61,067.50. From this amount the sum of \$3,084.25 was deducted for the common expenses of the board of control, and the remainder was allotted to the abovenamed bureaus, as their exhibiting ability required. It is estimated that, after defraying all expenses incident to the packing and return of the exhibits, and the preparation of a final report and other incidental expenses, a balance of \$3,000 or \$4,000 will remain to be returned into the Treasury.

PACIFIC RAILROADS.

There are now outstanding \$64,623,512 of the 6 per cent bonds of the United States which were issued in aid of the construction of Pacific railroads, and are known to the public as "Currency sixes." They were authorized by the act of July 1, 1862, and July 2, 1864, and mature at various dates from January 16, 1895, to January 1, 1899. The amount maturing on the first-named date is \$2,362,000. These bonds are absolutely payable on the respective dates of their maturity, differing in this regard from the other outstanding interest bearing bonds of the United States, which are redeemable at the pleasure of the Government after certain dates. In view of this fact, it is important that Congress should take action at this session with respect to the payment, at least, of the \$2,362,000 which will mature within the fiscal year 1895. The following table shows the amounts and dates of maturity of the bonds issued by the United States:

Central Pacific Railroad.

Ma	turity of bond:	** ***	● .
	January 16, 1895	 	 \$2,362,000
	January 1, 1896		
	January 1, 1897		
	January 1, 1898		
	January 1, 1899		

Union Pacific Railroad.

Western Pacific Railroad.	
Maturity of bond:	
January 1, 1897	320, 000 1, 650, 560

Section 2 of the act of July 1, 1862, provided that these bonds should "constitute a first mortgage on the whole line of railroad and telegraph, together with the rolling stock, fixtures, and property of every kind and description," but section 10 of the act of July 2, 1864, modified and amended the preceding act so as to authorize the issue, by the respective railroad companies, of their own first-mortgage bonds "to an amount not exceeding the bonds of the United States, and of even tenor and date, time of maturity, rate, and character of interest with the bonds authorized to be issued to said railroad companies, respectively." It was further provided that the lien to secure the United States bonds should be subordinate to that of the first-mortgage bonds issued by the railroads, except as to certain provisions in the former act relating to the transmission of dispatches, and the transportation of mails, troops, munitions of war, supplies, and public stores for the Government of the United States.

In pursuance of the authority given by the act of July 2, 1864, the respective railroad companies issued first-mortgage bonds in the amounts and with dates of maturity as stated below:

Union Pacific Railroad.

	• •

The act of July 1, 1862, besides giving authority for the issue of United States bonds to the railroad companies, granted large tracts of the public domain to said companies, one of the conditions of the grants being that the railroad companies should pay at maturity the bonds issued to them by the Government; and to secure such payment in part, including the interest on the bonds, it was provided that the compensation due the railroads for services rendered the Government should be applied to such payment of bonds and interest until the whole amount should be fully paid. But in section 5 of the act of July 2, 1864, this provision was so modified as to require only one half of the compensation for services rendered for the Government by the companies to be applied to the payment of the bonds issued by the Government.

FI 93----V

LXVI REPORT OF THE SECRETARY OF THE TREASURY.

Subsequently it became apparent that the acts of 1862 and 1864 did not contain sufficient provision for the liquidation of the debts due by the respective companies to the United States, and by the act of May 7, 1878, commonly known as the Thurman Act, Congress restored the provisions contained in the act of 1862 for the retention of the whole amount of the compensation due the companies for services to the Government, one half of said compensation to be applied to the liquidation of the interest paid and to be paid by the United States on its bonds issued to the companies, and the other half to be used for the establishment of a sinking fund to be invested by the Secretary of the Treasury in bonds of the United States, said fund to be applied according to sections 7 and 8 of the act, as follows:

SEC. 7. That the said sinking fund so established and accumulated shall, at the maturity of said bonds so respectively issued by the United States, be applied to the payment and satisfaction thereof, according to the interest and proportion of each of said companies in said fund, and of all interest paid by the United States thereon, and not reimbursed, subject to the provisions of the next section.

SEC. 8. That said sinking fund so established and accumulated shall, according to the interest and proportion of said companies, respectively, therein, be held for the protection, security, and benefit of the lawful and just holders of any mortgage or lien debts of such companies, respectively, lawfully paramount to the rights of the United States, and for the claims of other creditors, if any, lawfully chargeable upon the funds so required to be paid into said sinking fund, according to their respective lawful priorities, as well as for the United States, according to the principles of equity to the end that all persons having any claim upon said sinking fund may be entitled thereto in due order; but the provisions of this section shall not operate or be held to impair any existing legal right, except in the manner in this act provided, of any mortgage, lien, or other creditor of any of said companies, respectively, nor to excuse any of said companies, respectively, from the duty of discharging out of other funds its debts to any creditor except the United States.

The authority for investing the sinking funds in bonds of the United States was, by the act of March 3, 1887, enlarged to include any of the first mortgage bonds of said railroads which, under any law of the United States, constitute a lien upon said railroads prior to the lien of the bonds issued by the Government.

Under these statutes the indebtedness of the several railroads to the United States was, on the 1st day of November, 1893, substantially as follows:

Principal	of bonds		· • • • • • • • • • • • • • • • • • • •			\$64, 623, 512. 00
Interest p	aid by United	States	· • • • • • • • • • • • • • • • • • • •	• • • • • • • • • • • • • • • • • • •	\$97, 996, 200. 66

July, 1896 January, 1897 July, 1897	. 197,000	268,000	Total *mount in Central Pacific fund		5,119,500

Union Pacific fund.

Maturity of bond.	Currency sixes.	First- mortgage bonds.	Maturity of bond.	Currency sixes.	Firet- mortgage bonds.
May, 1895		449,000 899,000	January, 1898 July, 1898 Jánuary, 1899 July, 1899	\$188,000	500,000
June, 1896. July, 1896. January, 1897. July, 1897.		432,000 902,000 442,000	Total Total amount in Union Pacific fund		12, 766, 500 12, 954, 500

Prior to March 3, 1887, the sinking funds were invested exclusively in United States bonds, as required by the Thurman Act, but the rapid reduction of the public debt then in progress and the resulting high prices of the bonds remaining in the market made it appear desirable that other sound securities be authorized by law for such investments; and as the first mortgage bonds, which constituted a prior lien to that of the Government bonds, were also, by the terms of section 8 of the Thurman Act, quoted above, a prior lien upon the sinking funds, the investment of said funds in such bonds seemed advantageous, and such investments were authorized by the act of March 3, 1887. to investing the moneys which after this date came into the sinking funds, the United States bonds which had previously been purchased for the funds were sold, and the proceeds applied to the purchase of first-mortgage bonds at prices which augmented the income from the investments and increased the principal of the bonds belonging to the The total amount of bonds added to the funds by this process. was \$374,250, and the increase in the annual income is \$116,010.

Since the first purchase of first-mortgage bonds for the sinking funds under the act of March 3, 1887, the interest thereon has been promptly paid when due until November 1, 1893, when the Union Pacific Railroad Company defaulted on the coupons due that day of bonds issued by the Central Branch, Union Pacific Railroad Company. The amount of such bonds held by the sinking fund was \$1,058,000 and the unpaid coupons amounted to \$31,740. The Department has been informed that the receivers of the Union Pacific Railroad Company have made application to the courts for authority to pay all the coupons upon which the road defaulted on the 1st ultimo, including those above mentioned.

LXVIII REPORT OF THE SECRETARY OF THE TREASURY,

Maturity, by fiscal years, of the bonds issued by the United States to Pacific railroads.

1900,	Central Pacific Railroad	1,858,000	11,237,000 1,858,000
	Total		64, 613, 000

The amounts of the indebtedness of the several companies to the United States will be increased to the extent of the interest hereafter accruing on the bonds, except such part of it as may be repaid by services; but, as the bonds mature, the sinking fund can be applied to their partial payment, unless the corporations should make default on obligations secured by prior liens, in which event the law heretofore quoted requires the assets held by the Government to be used for their satisfaction.

On account of the approaching maturity of both classes of these bonds and the magnitude of the interests involved, I respectfully submit that the subject should receive the early and earnest consideration of Congress, with a view to the adoption of some plan which will more certainly secure the ultimate payment of the indebtedness to the Government, and at the same time permit the companies to conduct the business for which they were created, under such limitations and restrictions as to management and expenditures as may be considered necessary to protect the rights of all parties interested in the property. It would be very unfortunate, in my opinion, if the Government should be forced by any combination of circumstances to take possession of and operate these lines of railway, and every reasonable effort should be made by all parties to avoid such a result.

CONDITION OF THE TREASURY.

During the first five months of the present fiscal year the expenditures of the Government have exceeded its receipts to the amount of \$29,918,095.66. There has been not only a decrease of receipts, but also an increase of expenditures during this period as compared with the corresponding five months of the last fiscal year. The revenues from customs have fallen off \$23,589,829.74; from internal taxes, \$7,866,667.96, and from miscellaneous receipts, \$324,152.39. The expenditures on account of the War Department in the execution of contracts made during the last fiscal year have increased \$6,162,132.42; on account of the Navy Department, for the same reason, the increase has been \$1,912,289.31; on account of Indians, \$538,078.55, and on account of interest, \$69,450.25; but there have been reductions in some other branches of the public service to the amount of \$6,352,206, as compared with the corresponding period last year.

The result of these changes is that on the first day of December, 1893, the actual net balance in the Treasury, after deducting the bank note 5 per cent redemption fund, outstanding drafts and checks, disbursing officers' balances, agency accounts, and the gold reserve, was only \$11,038,448.25, and of the total amount held \$12,347,517.80 was in subsidiary silver and minor coins.

It may be safely assumed that the worst effects of the recent financial disturbances, and consequent business depression, have been realized, and that the conditions will be much more favorable hereafter for the collection of an adequate revenue for the support of the Government; but it can scarcely be expected that the receipts during the remainder of the fiscal year will exceed the expenditures for the same time to such an extent as to prevent a very considerable deficiency. I have, therefore, estimated a probable deficiency of \$28,000,000 at the close of the year, and if Congress concurs in this view of the situation, it will be incumbent upon it to make some provision for raising that amount as soon as practicable, by taxation or otherwise. On account of the difficulty of securing such a sum within the time it will be required by the imposition and collection of additional taxes, I recommend that the

third section of the act to provide for the resumption of specie payments, approved January 14, 1875, which confers authority upon the Secretary of the Treasury to issue and sell certain descriptions of United States bonds, be so amended as to authorize him to issue and sell, at not less than par in coin, bonds to an amount not exceeding two hundred million dollars, bearing a lower rate of interest and having a shorter time to run than those now provided for, and that he be permitted to use, from time to time, such part of the proceeds as may be necessary to supply any deficiencies in the public revenues that may occur during the fiscal years 1894 and 1895. The section referred to provides that:

To enable the Secretary of the Treasury to prepare and provide for the redemption in this act authorized or required, he is authorized to use any surplus revenues from time to time in the Treasury not otherwise appropriated, and to issue, sell, and dispose of at not less than par in coin, either of the descriptions of bonds of the United States described in the act of Congress approved July 14, 1870, entitled "An act to authorize the refunding of the national debt."

The bonds authorized by the act of July 14, 1870, are described as follows:

- (1) Bonds not exceeding in the aggregate two hundred million dollars, in such form as the Secretary may prescribe, and of denominations of fifty dollars, or some multiple of that sum, redeemable in coin of the then standard value, at the pleasure of the United States, after ten years from the date of their issue, and bearing interest payable semi-annually in such coin at the rate of 5 per cent per annum.
- (2) Bonds not exceeding in the aggregate three hundred million dollars, the same in all respects as those above described, but payable at the pleasure of the United States after fifteen years from the date of their issue, and bearing interest at the rate of 4½ per cent per annum.
- (3) Bonds not exceeding in the aggregate one thousand million dollars, the same in all respects, but payable at the pleasure of the United States after thirty years from the date of their issue, and bearing interest at the rate of 4 per cent per annum.

In the present condition of the public credit nothing less than the existence of a great and pressing financial emergency would, in my opinion, justify the issue and sale of any of these classes of bonds. On the first class the interest would amount, at the maturity of the bonds, to one-half the principal; on the second class it would amount to more than two-thirds of the principal, and on the third class it would exceed the principal by 20 per cent. If any one of these methods of raising money were now presented as an original measure for consideration in Congress, I am satisfied it would not receive the approval of that body or of the people. Whatever may have been their merits nearly a quarter of a century ago, when the credit of the Government was to a certain extent impaired by the existence of a large interest-bearing public debt and the general use of a depreciated paper currency, not then redeemable in any kind of coin, our financial standing is now so high that our public obligations, bearing any of the rates of interest authorized by the law re-

ferred to, would have to be sold at a premium so great as to prevent large classes of our people, who might otherwise invest in them, from becoming purchasers. The United States 4 per cent bonds, payable in 1907, are now selling at a rate which yields investors less than 3 per cent upon their cost, and I am confident that a bond, bearing interest at the rate of 3 per cent, payable quarterly, and redeemable at the option of the Government after five years, could be readily sold at par in our own country.

If the authority now existing should be so modified as to empower the Secretary of the Treasury to issue the bonds in denominations or sums of twenty five dollars and its multiples, they could be readily disposed of through the subtreasuries and post-offices without the agency or intervention of banks or other financial institutions and without the payment of commissions. Such bonds would afford to the people at large an opportunity to convert their surplus earnings into a form of security which, while it would be perfectly safe, would not only increase in value by reason of accumulating interest, but be at all times available as a means of procuring money when needed; and the experience of this and other countries justifies the confident belief that such a plan would be popular and successful.

In case Congress should not consider it advisable to authorize the Secretary to use, for the purpose of supplying deficiencies in the revenues, any part of the proceeds of the bonds herein suggested, I recommend that he be empowered to execute from time to time, as may be necessary, the obligations of the Government, not exceeding in the aggregate fifty million dollars, bearing a rate of interest not greater than 3 per cent and payable after one year from date, and that he be permitted to sell them at not less than par, or use them at not less than par, in the payment of public expenses to such creditors as may be willing to receive them. The condition of the Treasury is such that unless some available means are promptly provided by law for supplying the growing deficiency, the public service will be seriously impaired and pensioners and other creditors subjected to great delay and inconvenience. Congress alone has the power to adopt such measures as will relieve the present situation and enable the Treasury to continue the punctual payment of all legitimate demands upon it, and I respectfully but earnestly urge that immediate attention be given to the subject.

The necessity for the extension of the power of the Secretary to procure and maintain a larger reserve for the redemption of United States currency must, I think, be evident to everyone who has given serious thought to the subject. At the date of the resumption of specie payments, January 1, 1879, the only form of currency, except coin certificates, which the Government was required or authorized by law to redeem in coin on presentation, was the old legal-tender notes, then and now amounting to \$346,681,016, and it was considered by the Secretary of the Treasury that a coin reserve of a hundred million dollars would constitute a sufficient basis for the maintenance of that amount of cur-

rency at par. The correctness of this conclusion was shown by the fact that, so long as there was no material increase in the volume of paper redeemable by the Government, the reserve remained unimpaired and no serious disturbances occurred in our monetary system; but under the act of July 14, 1890, additional Treasury notes have been issued to the amount of \$155,930,940, of which there are now outstanding \$153,318,224, thus making the direct Government obligations in use as currency amount to the sum of \$499,999,240, all of which the Secretary of the Treasury is now required by law to redeem in coin on presentation. Besides this. there have been coined under authority of law \$419,332,550 in legaltender silver, upon which certificates have been issued to the amount of \$334,138,504; and as Congress, in the act of July 14, 1890, declared it to be "the established policy of the United States to maintain the two metals on a parity with each other upon the present legal ratio, or such ratio as may be provided by law," an additional reason now exists for conferring upon the Secretary unquestionable authority to provide for such contingencies as may arise.

Under these circumstances it is, in my opinion, necessary not only that he should be clothed with full authority to procure and maintain an ample reserve in coin, but that the purposes for which such reserve is to be held and used should be made as comprehensive as the duty imposed upon him by the law. The existence of such authority in a constantly available form would of itself inspire such confidence in the security and stability of our currency that its actual exercise might never become necessary; but the futility of declaring a specific policy and withholding the means which may become necessary for its execution is too apparent to require comment. Largely on account of apprehensions as to the ability of the Government under the legislation then existing to continue the current redemption of its notes in coin and maintain the parity of the two metals, the shipments of gold from this country during the fiscal year 1893 reached, as already stated in this report, the unprecedented amount of \$108,680,844, nearly all of which was withdrawn from the public Treasury by the presentation of notes for redemption. During the three months next preceding the 7th day of March, 1893, when a change occurred in the administration of the Treasury Department, the withdrawals of gold from the Treasury for export amounted to \$34,146,000, and during the eight months which have elapsed since that time such withdrawals have amounted to \$36,-259,650, or \$2,113,650 more than during the preceding period of three months.

The amount of free gold in the Treasury on the 7th day of March, 1893, was \$100,982,410, or \$982,410 in excess of the lawful reserve; but by making exchanges of currency for gold with the banks in different parts of the country the amount was increased to \$107,462,682 on the 25th of that month. Notwithstanding the most strenuous efforts by the Department to maintain the hundred million dollar reserve intact, the presentation of notes for redemption to procure gold for shipment abroad

continued to such an extent that on the 22d day of April, for the first time since the fund was established, it became necessary to use a part of it, and it was reduced to \$95,432,357; but it was afterwards increased by exchanges of currency for gcld, so that on the 10th day of August it had been fully restored, and there was on hand \$103,683,290 in free gold. By October 19, however, it had been diminished by redemptions of currency and otherwise to the sum of \$\$1,551,385, which is the lowest point it has ever reached.

So long as the Government continues the unwise policy of keeping its own notes outstanding to circulate as currency, and undertakes to provide for their redemption in coin on presentation, it will be, in my opinion, essential for the Secretary of the Treasury to possess the means, or to have the clear and undoubted authority to secure the means, which may from time to time become necessary to enable him to meet such emergencies as the one which has recently occurred in our financial af-Under existing legislation the Treasury Department exercises to a larger extent than all the other financial institutions of the country combined the functions of a bank of issue, and while the credit of the Government is so strong that it may not be necessary to maintain at all times the actual coin reserve which experience has shown to be requisite in the case of ordinary banking companies, still it would be manifestly imprudent, to say the least, not to adopt such precautionary measures as would enable the Government in times of unusual monetary disturbance to keep its faith with the people who hold its notes and coins by protecting them against the disastrous effects of an irredeemable and depreciated currency.

While the laws have imposed upon the Treasury Department all the duties and responsibilities of a bank of issue, and to a certain extent the functions of a bank of deposit, they have not conferred upon the Secretary any part of the discretionary powers usually possessed by the executive heads of institutions engaged in conducting this character of He is bound by mandatory or prohibitory provisions financial business. in the statutes to do or not do certain things, without regard to the circumstances which may exist at the time he is required to act, and thus he is allowed no opportunity to take advantage of changes in the situation favorable to the interests of the Government, or to protect its interests from injury when threatened by adverse events or influences. He can neither negotiate temporary loans to meet casual deficiencies nor retire and cancel the notes of the Government without substituting other currency for them when the revenues are redundant or the circulation excessive, nor can he resort, except to a very limited extent, to any of the expedients which in his judgment may be absolutely necessary to prevent injurious disturbances of the financial situation. These considerations emphasize the necessity for such legislation as will make the Department more independent of speculative interests and operations and enable it to maintain the credit of the Government upon a sound and secure basis.

LXXIV REPORT OF THE SECRETARY OF THE TREASURY.

Whatever objections may be urged against the maintenance of a large coin reserve, procured by the sale of interest-bearing bonds, it must be evident that this course can not be safely avoided unless the Government abandons the policy of issuing its own notes for circulation and limits the functions of the Treasury Department to the collection and disbursement of the public revenues for purely public purposes, and to the performance of such other administrative duties as may be appropriate to the character of its organization as a branch of the executive To the extent that it is required by law to receive money on deposit, and repay it, or to issue notes and redeem them on demand, it is engaged in a business which can not be conducted without having at all times the ability to comply promptly with its obligations. operations necessarily affect, beneficially or otherwise, the private financial affairs of all the people, and they have a right to be assured by appropriate legislation that their confidence in the integrity and power of the Government has not been misplaced.

CURRENCY LEGISLATION.

The recent repeal of so much of the act of July 14, 1890, as required the Secretary of the Treasury to purchase silver bullion and issue Treasury notes in payment for it, makes such a radical change in the policy of the Government respecting the currency of the country that, until its effects are more fully developed, I do not consider it advisable to recommend further specific legislation upon that subject.

As already shown in this report, the amount of money in the country, outside of the Treasury, on the first day of December, 1893, was \$112,404,947 greater than the amount outstanding on the first day of November, 1892. This vast increase in the volume of outstanding currency, notwithstanding the enormous exports of gold during the year, is the result of several causes, among which may be mentioned the issue of Treasury notes for the purchase of silver bullion, the excess of public expenditures over receipts, the additional circulation called for by the national banks during the late financial stringency, and the large imports of gold, which amounted during the months of July, August, September, and October, 1893, to the sum of \$55,785,526. That the amount of money in the country is greater than is required for the transaction of the business of the people at this time is conclusively shown by the fact that it has accumulated, and is still accumulating, in the financial centers to such an extent as to constitute a serious embarrassment to the banks in which it is deposited, many of which are holding large sums at a loss. This excessive accumulation of currency at particular points is caused by the fact that there is no such demand for it elsewhere as will enable the banks and other institutions to which it belongs to loan it to the people at remunerative rates, and it will continue until the business of the country has more fully recovered from the depressing effects of the recent financial disturbances.

Money does not create business, but business creates a demand for money, and until there is such a revival of industry and trade as to require the use of the circulating medium now outstanding, it would be hazardous to arbitrarily increase its volume by law, or to make material changes in its character by disturbing in any manner the relations which its different forms now bear to each other. In the meautime, it will be the duty of all who have power to influence the course of events or to assist, by legislation or otherwise, in the solution of the grave questions presented by the altered condition of our monetary system, to carefully consider the whole subject in all its aspects, in order that it may be permanently disposed of by the adoption of a simple and comprehensive system, which will, as far as possible, relieve the Government from the onerous obligations now resting upon it, and at the same time secure for the use of the people a currency uniform in value and adequate in amount.

The unsatisfactory condition of our currency legislation has been for many years the cause of much discussion and disquietude among the people, and although one great disturbing element has been removed, there still remain such inconsistencies in the laws and such differences between the forms and qualities of the various kinds of currency in use that private business is sometimes obstructed and the Treasury Department is constantly embarrassed in conducting the fiscal operations of the Government. There are now in circulation nine different kinds of currency, all except two being dependent directly or indirectly upon the credit of the United States. One statute requires the Secretary of the Treasury to redeem the old legal-tender notes in coin on presentation, and another compels him to reissue them, so that, no matter how often they are redeemed, they are never actually paid and extinguished. The act of July 14, 1890, provides that the Treasury notes issued in payment for silver bullion shall be redeemed in gold or silver coin at the discretion of the Secretary, and when so redeemed may be reissued; but the same act also provides that no greater or less amount of such notes shall be outstanding at any time than the cost of the silver bullion and the standard silver dollars coined therefrom then held in the Treasury purchased by such notes, and consequently, when these notes are redeemed with silver coined from the bullion purchased under the act, they can not be reissued, but must be retired and canceled, for otherwise there would be a greater amount of notes outstanding than the cost of the bullion and coined dollars "then held in the Treasury." this mauner notes to the amount of \$2,625,984 have been retired and canceled since August last, and standard silver dollars have taken their places in the circulation. If redeemed in gold coin, the notes might be lawfully retired or reissued in the discretion of the Secretary; but the condition of the Treasury has been, and is now, such that practically no discretion exists, for the reason that the necessities of the

public service and the requirements of the coin reserve compel him to reissue them in defraying the expenditures of the Government or in procuring coin to replenish that fund.

One of the principal difficulties encountered by the Treasury Department results from the indisposition of the public to retain standard silver dollars and silver certificates in circulation. It requires constant effort upon the part of the Treasury officials to prevent the certificates especially from accumulating in the subtreasuries to the exclusion of legal-tender currency. Why this should be the case is not easily understood, for, although these certificates are not legal tender in the payment of private debts, they are, by the acts of 1878 and 1886, made receivable for all public dues, and by the act of May 12, 1882, national banks are authorized to hold them as part of their lawful reserves. policy of maintaining equality in the exchangeable value of all our currency firmly established, and the further accumulation of silver bullion arrested, there is no substantial reason why the silver certificate should not be as favorably received and as liberally treated by the public as any other form of note in circulation; and, for the purpose of creating a greater demand for their permanent use in the daily transactions of the people, I have directed that, as far as the law permits, and as rapidly as the opportunity is afforded, the amount of such certificates of denominations less than ten dollars shall be increased by substituting them for larger ones to be retired, and that the small denominations of other kinds of currency shall be retired as they are received into the Treasury and larger ones substituted in their places.

There are now outstanding United States legal-tender notes to the amount of \$67,944,941 in denominations less than ten dollars; Treasury notes issued under the act of 1890 of denominations less than ten dollars, \$64,688,489, and national bank notes, \$63,381,916. There is express authority in the act of August 4, 1886, to substitute small silver certificates for larger ones, and the Secretary of the Treasury also has power to make such changes as he may deem proper in the denominations of the Treasury notes issued under the act of July 14, 1890, but Congress, in the sundry civil appropriation act approved March 3, 1893, provided that no part of the money therein appropriated to defray the expenses of the Bureau of Engraving and Printing should be expended for printing United States legal tender notes of larger denominations than those retired or canceled. As the law now specifically designates the denominations in which national bank notes shall be issued, they can not be changed without further legislation, and consequently during the present fiscal year, at least, the \$64,688,489 in small Treasury notes are the only ones that can be lawfully retired to enlarge the use of small silver cer-I am of the opinion that if this policy can be carried out to the extent of supplying the country with small silver certificates to an amount sufficient to conduct the ordinary cash transactions of the people, and if, during the same time, certificates of the largest denominations were issued in the places of others retired, so as to encourage the national banks to hold them as parts of their lawful reserves, the existing difficulties would be removed, and ultimately a larger amount of such currency than is now in circulation could be conveniently and safely used.

The Treasury now holds 140,699,760 fine ounces of silver bullion, purchased under the act of July 14, 1890, at a cost of \$126,758,218, and which, at the legal ratio of 15.988 to 1, would make 181,914,899 The act provided that after the first day of July, 1891, silver dollars. the Secretary of the Treasury should coin as much of the bullion purchased under it as might be necessary to provide for the redemption of the notes, and that any gain or seigniorage arising from such coinage. should be accounted for and paid into the Treasury. It is plain from this, and other provisions of the act, that so much of the bullion as may be necessary, when coined, to provide for the redemption of the entire amount of notes outstanding, is pledged for that purpose, and can not be lawfully used for any other; but it was decided by the late Attorney-General, and by my predecessor in office, that the so-called gain or seigniorage resulting from the coinage as it progressed constituted a part of the general assets of the Treasury, and that certificates could be legally issued upon it, notwithstanding the act of 1890 is silent upon the latter subject.

The coinage of the whole amount of this bullion, which would employ our mints, with their present capacities, for a period of about five years, would, at the existing ratio, increase the silver circulation during the time named \$55,156,681 from seigniorage, besides such additions as might be made in the meantime by the redemption of Treasury notes in standard silver dollars. In order that the Department might be in a condition to comply promptly with any increased demand that may be made upon it by the public for standard silver dollars or silver certificates, or that it might take advantage of any favorable opportunity that may occur to put an additional amount of such currency in circulation without unduly disturbing the monetary situation. I have caused a large amount of bullion to be prepared for coinage at New Orleans and San Francisco, and have ordered the mints at those places to be kept in readiness to commence operations at any time when required.

REVISION OF THE REVENUE LAWS.

The necessity for a comprehensive revision of our tariff laws in the interests of greater industrial and commercial freedom need not be urged at great length upon the present Congress, one branch of which has been recently chosen by the people with that object distinctly in view; nor would it be appropriate here to discuss to any considerable extent the particular alterations that ought to be made in the free and dutiable schedules in order to make the revision conform to the requirements of the situation, because the proper committee of the House of Represent-

atives is engaged in the preparation of a measure which will probably be presented for the consideration of that body before this report is made. But it is not improper, under the circumstances, to submit some sug gestions upon the general principles involved in such legislation and the best methods of applying them, in order to secure, as far as possible, equality in the distribution of the burdens of taxation, and avoid, as far as possible, the taxation of one citizen for the benefit of another, or of one class for the benefit of another.

The only proper purpose for which taxes can be levied and collected by the United States is to raise revenue for the support of the public service and the payment of public obligations, and it follows as a plain matter of justice that no citizen should be required to contribute more than his equal share towards the accomplishment of these ends. While absolute equality is not attainable under any system of taxation that can be devised, it is possible to correct the flagrant inequalities which characterize our existing legislation; and in doing so, it is the imperative duty of those who are charged with the responsibility of making the revision to select such subjects for taxation and prescribe such methods of assessment and collection as will secure the necessary means for the support of the Government with the least possible injury to any part of the people, but without regard to the groundless apprehensions or unreasonable opposition of timid or selfish interests.

The equal distribution of the burdens of taxation depends not alone upon the rates of duty imposed upon the different articles, but largely upon the manner in which the amount of the duty is ascertained and fixed by the law. The basis of the duty must be a unit in some form, and the question whether it shall be computed upon the weight, quantity, number, or dimensions of the article, or upon its actual value, is one which lies at the very foundation of every proposition to impose taxes, and upon its determination depends to a great extent the justice or injustice of every revenue measure.

The imposition of specific or compound rates of duty is so inconsistent with the true principles of just taxation that nothing but the plainest necessity can justify it in any case, unless it be in a few exceptional instances where all the articles taxed at the same specific rate are so nearly equal in value that the danger of unjust discrimination is not greater than it would be if an official valuation were required. It is manifestly unjust to compel one citizen to pay the same amount of tax on a yard of cloth worth one dollar that another citizen pays on a yard of cloth worth five dollars. In such a case it is evident that one has been taxed too much for the support of the Government or the other has been taxed too little, and the law has not dealt fairly with them in a matter which affects the equality of their rights and duties as citizens. A tariff is a tax upon consumption, and the condition of those who are compelled by poverty of means to purchase and use the coarser and cheaper grades of goods should certainly protect them against unjust

discriminations, even if it does not entitle them to some measure of exemption from the exactions of the Government. Taxation according to value does injustice to no one, unless the rates are too high or are unequally adjusted upon articles of the same general character and utility. It is distinctly the American system of taxation, and is recognized as just and equitable by the people in all the States in their laws for the assessment and collection of local revenues upon the ad valorem basis. It is not probable that any other method would be tolerated in any State of the Union where the tax is imposed solely for the purpose of raising revenue with no incidental or ulterior object in view affecting the public health or morals; and it would never have been tolerated in our Federal legislation, except in rare instances, if the use of the taxing power had been limited to the real purpose for which it was delegated. As a means of concealing from the taxpayer the actual proportion which the charge upon his earnings bears to the value of the taxed article, specific and compound rates have been for many years ingeniously employed to mask and perpetuate a system which subordinates the interests of the Government to the exactions of private individuals and corporations engaged in particular industries and trades.

But the objections urged against the ad valorem system of tariff taxation are not generally based upon the proposition that it lacks the element of justice or equality, but usually upon the grounds that it is difficult of administration, and that it furnishes strong inducements for the commission of frauds and perjuries in order to secure false valuations of imported goods. While there is some force in this contention, I am not able to see how unequal taxation can be justified upon the ground that the burdens upon the people ought to be increased in order that the labors of public officials may be diminished, or that the honest citizen should be punished in order to prevent the dishonest one from attempting to violate the law. But the difficulties of administration have always been greatly exaggerated, and so far as they really existed in former times, have now been much diminished by our increased facilities for ascertaining market values in other countries, and by the improved organization of our customs service. The markets of the world have been brought so near to each other by the use of steam and electricity that, as to all staple articles especially, it is not now much more difficult to find their cost or value abroad than at home; and if under these circumstances it shall be demonstrated that official intelligence and integrity can not be safely relied upon for an honest collection of the revenues under the existing system of indirect taxation, it will become necessary to consider whether some other method can not be devised to raise moneys for the support of the Government.

So far as the inducements to commit frauds and perjuries constitute objections, the slightest examination of the subject will show that they are much greater under the system of compound rates, which is one of the most prominent features of our existing legislation, than

they could possibly be under a purely ad valorem arrangement of duties. The tariff law now in force imposes compound rates of duty upon a great many important articles in common use among the people, and which are largely imported from abroad, and in every such case a tempting premium is offered for fraudulent undervaluations by the importer For instance, on woolen or worsted cloths, shawls and or consignee. certain other manufactures of wool, worsted or hair of the camel, goat, alpaca, or other animals, valued at more than thirty cents, and not more than forty cents per pound, the tax per pound is three and a half times the duty imposed upon a pound of unwashed wool of the first class (38½ cents), and in addition forty per cent ad valorem; but if the goods are valued at more than forty cents per pound, the tax is four times the duty imposed upon a pound of unwashed wool of the first class (44 cents), and fifty per cent ad valorem. Upon an importation of one hundred thousand pounds of such goods under this law, an undervaluation to the extent of one half of one cent per pound, so as to reduce the appraisement below forty cents a pound, would result in a clear gain to the importer and a loss to the revenue of \$9,725, whereas, if the compound rate imposed upon the first classification mentioned, exorbitant as it is, had been made purely ad valorem and applied to all the goods of like character and description, such undervaluation would have resulted in a gain to the importer and a loss to the revenue of only \$685, being a difference of \$9,040, or more than 22 per cent upon the whole cost of the importation.

This is only one provision out of a great number in the present law under which substantially the same result can be accomplished by a very small undervaluation of imported goods; and it would seem difficult to devise a scheme better calculated to encourage frauds upon the revenue and make their prevention or detection next to impossible.

Raw and partially raw materials constitute the basis of all our manufacturing and mechanical industries, and unless our industrial establishments can procure them upon substantially the same terms as their competitors elsewhere they must continue to be seriously impeded in their efforts to supply the home market with their finished products, and wholly unable to extend their trade to other countries, except as to certain commodities in the manufacture of which they have peculiar aptitude or employ superior machinery.

Taxes upon materials used in our shops and factories are especially objectionable on account of the fact that they multiply themselves many times before the finished article reaches the hands of the consumer, and thus impose a burden altogether disproportionate to the benefits supposed to be conferred upon the producer by the so-called protective system. A tax upon iron and wool necessitates a still higher rate upon all forms of manufactured iron and steel and upon all kinds of woolen goods; and these progressive increases in rates are piled one upon another at every stage of the manufacturing process until the completed article is ready for sale and consumption. The result is that the cost of

production is made so great that our manufacturers can neither exclude their foreign competitors from our own market, nor share their trade in the markets of other countries, while the American consumer is compelled to reimburse the increased outlay caused by the tax with a percentage of profit added.

If the world's store of raw materials were as accessible to the American workingman as it is to his competitor in other manufacturing countries, his superior skill, sobriety, and industrious habits would enable him, without artificial aid, to supply many parts of the world where his products are now never seen with machinery, implements, and various kinds of textile fabrics of such qualities and at such prices as would exclude all competition and create a demand for a large increase of our productive forces. With free raw materials as a permanent feature of our revenue legislation, the demand for labor would steadily grow with the extension of trade, while enlarged opportunities for the profitable investment of capital would stimulate the spirit of enterprise among our people and greatly diminish the danger of periodical suspensions, lockouts, and strikes, which have in recent years so seriously interrupted our industrial progress.

Nearly allied to the policy of free raw materials is that of cheapening the necessaries of life for the masses of the people. Legislation which unnecessarily increases the cost of living is wholly without justification or excuse, and in the revision of our revenue laws this objectionable policy should be wholly discarded in the interest of both labor and capital. So long as the Government maintains a system of taxation which affects the prices of commodities in the markets, it should be so applied as to exempt, or bear as lightly as possible upon, those articles which are essential to the health and comfort of the people, such as food, clothing, and shelter, and upon the tools and implements of trade employed by labor in earning the means of subsistence. Luxuries and articles of taste and fashion, the use of which is entirely voluntary, are proper subjects of taxation under any system of raising revenue, and upon these the rates may very properly be placed at the highest revenue point. Such taxes do not ordinarily impose much hardship upon those who pay them, but taxes which diminish the purchasing power of the laborer's wages in procuring the necessaries of life strike at the foundations of the social system, because the material welfare of all our communities depends in a large measure upon the prosperity and contentment of those who labor in some form for their own support.

It is estimated that the revenues for the fiscal year 1895 will amount, upon the basis of existing laws, to \$454,427,748, and that the expenditures, excluding the sinking fund, will amount to \$448,303,789. The estimated revenue from customs is \$190,000,000, and the total estimated receipts from all sources will exceed the estimate of expenditures \$6,120,958. Assuming these amounts to be approximately correct, it will be necessary in any changes that may be made in our revenue laws

to provide for raising about \$184,000,000 from customs alone, or partly from customs and partly from such other subjects of taxation as Congress may see proper to include in our internal-revenue system.

If the amount and value of the importations of the same character of dutiable merchandise should not, during the fiscal year 1895, exceed the amount and value of such importations during the fiscal year 1893, the receipts under the measure now pending would be about \$122,000,000, but there are strong reasons for the opinion that the proposed reductions in the rates of duty will encourage importations to a very considerable extent, and that, consequently, the revenue will not be diminished in the same proportion as the rates are reduced. Moreover, experience has shown that under all our tariff legislation there has been an almost constant tendency towards annual increases in the amounts and values of dutiable imports, even though the rates of duty remained the same.

The total value of dutiable imports in 1868 was \$329,661,302, and the receipts were \$164,464,599, and although tea, coffee, and hides, important revenue articles, were all subsequently placed upon the free list and some other changes made in the law, the value of dutiable imports had increased to \$493,916,384 in 1883 and the receipts amounted to \$214,706,496. In the year 1884, the first after the passage of the tariff act of March 3, 1883, the value of dutiable imports was \$456,295,124, and the receipts \$195,067,489, but in 1890, the last full year under that act, the value was \$507,571,764 and the receipts \$229,668,584. There have been but two entire fiscal years since the act of October 6, 1890, and during the first one, 1892, the value of dutiable imports was \$355,526,741, and the receipts \$177,452,964, while in 1893 the value was \$400,282,519, and the receipts \$202,355,016, or an increase of nearly 15 per cent.

To what extent the importations will be increased solely on account of reductions in the rates of duty it is of course impossible to foresee, but it is reasonable to conclude that this cause, together with the natural increase of our purchases from other countries, will result in a much larger revenue from customs in 1895 than is indicated by a mere comparison of proposed reduced rates with those under which the collections were made in 1893.

I am of the opinion that with proper economy in public expenditures, which it is hoped will result in a considerable reduction from the estimates, an increase of \$50,000.000 to the revenue for the fiscal year 1895, by the imposition of additional taxes under the internal-revenue system, will supply sufficient means for the support of the Government, and that this sum can be raised without seriously disturbing the business of the country or doing injustice to any part of the people. Many different methods of providing this additional revenue have been suggested and discussed, and after a careful examination of the whole subject I have reached the conclusion that it can be most conveniently and justly raised by increasing the tax on distilled spirits 10 cents per gallon, and by additional taxes on cigars and cigarettes, and the imposition of new taxes on playing cards, cosmetics, and perfumeries, legacies, and suc-

cessions, and incomes derived from investments in stocks and bonds of corporations and joint stock companies.

The increased tax on distilled spirits, cigars, and cigarettes should be imposed upon all such articles in existence and upon which the revenue has not been collected, at the time the act takes effect, but a reasonable time should be allowed in the cases of the new taxes in order that the necessary stamps may be prepared and distributed, and the necessary rules and regulations made and promulgated. The propriety, under the circumstances, of increasing taxes upon distilled spirits, cigars, and cigarettes, and the imposition of new taxes at a reasonable rate upon playing cards and cosmetics and perfumeries, will not, I think, be seriously questioned, except by some of the producers of these articles, who constitute comparatively a small part of the people. Taxes which directly or indirectly increase the cost of the actual necessaries of life should be avoided whenever it is possible to do so, but the consumers of such articles as are not essential to health and comfort ought not to complain when called upon to contribute a part of their voluntary expenditures to the support of the Government. Taxes upon legacies and successions and incomes acquired from investments in stocks and bonds of corporations and joint stock companies are less objectionable in their nature and in the methods of collection than any other excises which it is competent for the United States to impose upon incomes according to their actual value or amount. They are not inquisitorial nor liable to evasion by the fraudulent suppression of facts, because the assessments or returns need not be based upon information extorted by the law from the persons charged with their payment, but upon the public records and the regular and authentic accounts of the corporations and companies in which the investments have been made; and they have the additional merit of being imposed entirely upon that part of the citizen's income which is not earned by his labor or skill, but which, in the cases of legacies and successions, is acquired by mere operation of law or by gratuitous bequest, and in the case of incomes from investments in corporations and joint stock companies, by the simple earning capacity of his capital as such, without personal effort upon his part.

When the necessities of the Government compel it to resort to additional sources for procuring revenue, it is but fair that it should make its requisitions mainly upon those whose possessions are of such a character as enables them to escape, wholly or partially, the general burdens of taxation, rather than upon those who are already taxed substantially to the extent of their ability to pay; and as incomes from capital invested in the stocks and securities of the institutions mentioned are not now subject to taxation under any law of the United States, or the laws of the several States, except in a few instances, it can not be considered unjust to exact a small percentage of their amount for the public use. It is a generally recognized fact that capital in the form of money, bonds, and other evidences of debt does not usually, by reason of its intangible and transitory nature, bear its due proportion of the burdens

of taxation under the revenue laws of the several States and municipalities, as compared with real estate and visible personal property; and while no discrimination should be made against it, whether it be represented by corporate or other investments, there appears to be no good reason why the contributions for the support of the public service generally should not be equalized as nearly as possible by including this kind of property in the Federal revenue system.

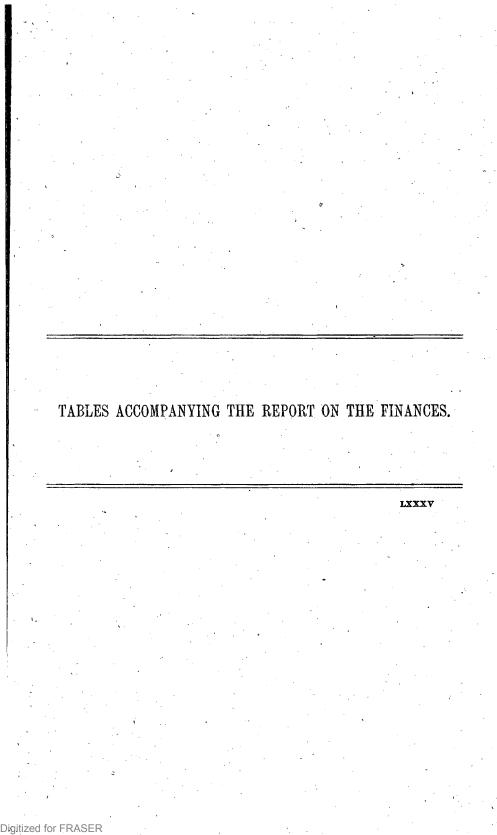

But if it shall be said that there is no better reason for imposing a tax upon incomes derived from investments of this kind than there would be in taxing incomes from other sources, the answer is that these institutions are invested by law with valuable franchises, privileges, and immunities not enjoyed by the individual citizen, and that these frequently contribute more largely to their earning capacity than the character or value of their other property. The holders of their stocks and securities are in this respect more favored than their fellow-citizens generally, and the exchangeable value of their shares and bonds, as well as the annual incomes derived from them, are greatly increased because they are so favored.

A tax of 1 per cent upon an income of three thousand dollars derived from the investment of fifty thousand dollars in a 6 per cent stock would amount to thirty dollars, a sum so insignificant that the investor could not reasonably claim that the franchises and privileges granted to his debtor had not added fully that much to his receipts.

It is scarcely necessary to suggest to Congress, in this connection, that the present and prospective condition of the Treasury and the general state of the country, demand a policy of the strictest economy in public expenditures consistent with an efficient administration of Reductions of taxation can not be logically insisted upon, or be made practically beneficial, without a corresponding reduction of expenditures; but such a reduction can not be permanently effected by merely withholding appropriations required for the proper execution of existing laws, which impose duties upon the heads of Executive Departments and other public officials. Deficiencies are not savings, but as a general rule result in larger expenditures than would have been made if adequate appropriations had been granted in the first instance. Genuiue economy and frugality can be secured only by the repeal of statutes authorizing or requiring unnecessary expenditures, and the refusal to enact new laws creating charges against the Treasury for purposes of doubtful utility; and although such a policy will probably be vigorously opposed by powerful interests more or less dependent upon the patronage of the Government for support, and by local influences seeking legislative favors, it is evident that it must be adopted and adhered to if any substantial result is to be accomplished.

J. G. CARLISLE,

To the Hon. CHARLES F. CRISP, Speaker of the House of Representatives. Secretary.

might deem expedient, \$50,000,000 to be applied to the redemption of demand notes authorized by the act of July 17, 1861; these notes to be a legal tender in payment of all debts, public and private, within the United States, except duties on imports and interest on the public debt, and to be exchangeable for 6 per cent United States bouds. The act of July 11, 1862 (12 Statutes, 532), authorized an additional issue of \$150,000,000 of such denominations as the Secretary of the Treasury might deem expedient, but no such note should be for a fractional part of a dollar, and not more than \$55,000,000 of of such denomination than five dollars; these notes to be a legal tender as before authorized. The act of March 3, 1863 (12 Statutes, 710), authorized an additional issue of \$150,000,000 of such denominations, not less than one dollar, as the Secretary of the Treasury might prescribe; which notes were made a legal tender as before authorized. The same ait limited the time in which the Treasury notes might be exchanged for United States bonds to July 1, 1863. The amount of notes authorized by this act wore to be in lieu of \$100,000,000 authorized by the resolution of January 17, 1863 (12 Statutes, \$22). The act of May 31, 1878 (20 Statutes, 87), provides that no more of the United States legal-tender notes shall be canceled or retired, and that when any of said notes are redeemed or received into the Treasury under any law, from any source whatever, and shall belong to the United States, they shall not be retired, exceled,	
or retired, and that when any of said notes are redeemed or received into the Treasury under any law, from any source whatever, and

The act of January 14, 1875 (18 Statutes, 296), authorizes the Secretary of the Treasury to use any surplus revenues from time to time in the Treasury not otherwise appropriated, and to issue, sell, dispose of at not less than par, in coin, either of the description of bonds of the United States described in the act of July 14, 1870 (16 Statutes, 272), for the purpose of redocming on and after January 1, 1879, in coin, at the office of the assistant treasurer of the United States in New York, the outstanding United States legal-tender notes when presented in sums of not less than fifty dollars.

CERTIFICATES OF DEPOSIT.

The act of June 8, 1872 (17 Statutes, 336), authorizes the deposit of United States notes without interest by banking associations in sums not less than \$10,000 and the issue of certificates therefor in denominations of not less than \$5,000; which certificates shall be payable on demand in United States notes, at the place where the deposits were made. It provides that the notes so deposited in the Treasury shall not be counted as a part of the legal reserve, but that the cer-tificates issued therefor may be held and counted by the national banks as part of their legal reserve, and may be accepted in the settlement of clearing house balances at the place where the deposits therefor were mad, and that the United States notes for which such certificates were issued, or other United States notes of like amount. shall be held as special deposits in the Treasury, and used only for the redemption of such certificates.

GOLD CERTIFICATES.

The act of March 3, 1863 (12 Statutes, 711), authorizes the Secretary of the Treasury to receive deposits of gold coin and bullion in sams of not less than twenty dollars, and to issue certificates therefor in denominations of not less than twenty dollars each; the coin and bullion deposited for or representing the certificates to be retained in the Treasury for the payment of the same on demand. The certificates so issued to be received at par in payment of interest on the public debt and for duties on imports. The act of July 12, 1882 (22) Statutes, 165), provides that the Secretary of the Treasury shall suspend the issue of gold certificates whenever the amount of gold coin and gold bullion in the Treasury reserved for the redemption of United States notes falls below one hundred millions of dollars.

TREASURY NOTES OF 1890.						
The act of July 14, 1890 (26 Statutes, 280), directs the Secretary of the Treasury to purchase, from time to time, silver bullion to the aggregate amount of four million five hundred thousand ounces, or so much thereof as may be offered in each month, at the market price thereof, not exceeding one dollar for three hundred and seventy-one and twenty-five hundredths grains of pure silver, and to issue in payment for such purchases of silver bullion Treasury notes of the United States, to be prepared by the Secretary of the Treasury, in such form and of such denominations, not less than one dollar nor more than one thousand dollars, as he may prescribe. That said notes shall be redeemable on demand, in coin, at the Treasury of the United States, or at the office of any assistant treasurer of the United States, and when so redeemed may be reissued; but no greater or less amount of such notes shall be outstanding at any time than the cost of the silver bullion and the standard silver dollars coined therefrom then held in the Treasury, purchased by such notes, and such Treasury notes shall be a legal tender in payment of all debts, public and private, except where otherwise expressly stipulated in the contract, and shall be receivable for customs, taxes, and all public dues, and when so received may be reissued; and such notes, when held by any national banking association, may be counted as a part of its lawful reserve. That upon demand of the holder of any of the Treasury notes provided for the Secretary	•					147, 190, 227. 00
of the Treasury shall redeem the same in gold or silver coin, at bis discretion, it being the established policy of the United States to maintain the two metals on a parity with each other upon the present legal ratio, or such ratio as may be provided by law.		-				_
NATIONAL BANK NOTES (REDEMPTION ACCOUNT).						
The act of July 14, 1890 (26 Statutes, 289), provides that halances standing with the Treasurer of the United States to the respective credits of national banks for deposits made to redeem the circulating notes of such banks, and all deposits thereafter received for like purpose, shall be covered into the Treasury as a miscellaneous receipt, and the Treasurer of the United States shall redeem from the general cash in the Treasury the circulating notes of said banks which may come into his possession subject to redemption, * * * and the balance remaining of the deposits so covered shall, at the close of each month, be reported on the monthly public debt statement as debt of the United States bearing no interest.	•	_				20, 663, 437. 75

^{*}In the amount here stated as the outstanding principal of the public debt are included the certificates of deposit outstanding on the 30th of June issued under act of June 8, 1872, for which alike amount in United States notes was on special deposit in the Treasury for their redemption, and added to the cash balance in the Treasury. These certificates, as a matter of accounts, are treated as a part of the public debt, but being offset by notes held on deposit for their redemption, should properly be deducted from the principal of the public debt in making comparison with former years.

† Exclusive of gold, silver, currency certificates, and Treasury notes of 1890, held in the Treasurer's cash, and including \$64,623,512 bonds issued to the several Pacific railroads.

Railway bonds.

NOTE 2.—The figures for July 1, 1879, were made up assuming pending funding operations to have been completed.

NOTE 3.—The temporary loan per act of July 11, 1862, is included in the 4 per cents from 1862 to 1868, inclusive, with the exception of the amount outstanding August 31, 1805, this being the date at which the public debt reached its highest point. This loan bore interest from 4 per cent to 6 per cent, and was redeemable on ten days notice after thirty days; but being constantly changing, it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent interest on an average

ISSUE AND REDEMPTION OF LOANS AND TREASURY NOTES. XCIX

Note.—The difference between the amount of money in the country and the amount in circulation represents the money in the Treasury.

Currency certificates, act of June 8, 1872, are included in the amount of United States notes in circulation in the tables for the years 1873 to 1891 inclusive; since 1891 they are reported separately. The foregoing tables present the revised figures for each of the years given.

TABLE I .- STATEMENT SHOWING THE ANNUAL APPROPRIATIONS MADE BY CONGRESS FOR EACH FISCAL YEAR FROM 1886 TO 1894, INCLUSIVE.

	2d session 48th Congress. Fiscal year 1886.	1st session 49th Congress. Fiscal year 1887.	2d session 49th Congress. Fiscal year 1888.	1st session 50th Congress. APPENDIX TO THE REPORT ON THE FINANCES.

FI 93----1

APPENDIX.

REPORTS OF HEADS OF BUREAUS AND OTHER OFFICERS.

(No. 1.)

REPORT OF THE TREASURER.

TREASURY OF THE UNITED STATES, Washington, D. C., December 1, 1893.

SIR: I have the honor to submit the annual report on the operations and condition of the Treasury.

REVENUES AND EXPENDITURES.

The net ordinary revenues and expenditures for the fiscal years ending June 30, 1892 and 1893, were as shown in the following table:

· ,	1892.	1893,	Increase.	Decrease.
REVENUES.		1.		
Customs Internal revenue Sale of public lands Miscellaneous sources	\$177, 452, 964. 15 153, 971, 072. 57 3, 261, 875. 58 20, 251, 871. 94	161, (27, 623, 93 3, 182, 089, 78	\$25, 902, 052, 58 7, 056, 551, 36	\$79, 785. 1, 996, 973.
Total Net increase	354, 937, 784. 24	385, 819, 628, 78	32, 958, 603, 94 30, 881, 844, 54	2, 076, 759.
EXPENDITURES.			1 1	
Civil and miscellaneous: Customs, light-houses, public				
buildings, etc	19, 988, 290, 67 14, 412, 717, 33		453, 719. 45	590, 057.
Interior civil (lands, patents, etc.). Treasury proper (legislative, ex-		1 ' '		316, 703.
ecutive, and other civil) Diplomatic (foreign relations)	49, 094, 186, 79 1, 742, 400, 25	1, 997, 042. 90		
JudiciaryVar DepartmentVar DepartmentVavy Department	4, 536, 184. 09 46, 895, 456. 30 29, 174, 138. 98	49, 641, 773. 47	2, 676, 032, 59 2, 746, 317, 17 961, 945, 45	
pensions)	145, 733, 630, 46 23, 378, 116, 23		26, 969, 274, 68 3, 886, 275, 95	
Total	345, 023, 330, 58	383, 477, 954. 49	39, 361, 384, 84 38, 454, 623, 91	906, 760.
Surplus	9, 914, 453, 66	2, 341, 674, 29		7, 572, 779.

The increase in the item of interest on the public debt is due mainly to the prepayment of \$5,103,581.29 of the interest due July 1, 1891, which diminished by this sum the expenditures of the year beginning on that day. If this part of the interest charge for that year had been paid within the year itself the expenditures on account of interest would have been \$28,481,697.52, and the foregoing table would have shown a decrease of \$1,217,305.34 for 1893.

The revenues and expenditures on account of the public debt, which are shown in detail in the appendix, may be summarized thus:

.e	1892.	1893.	Increase:	Decrease.
REVENUES.		7		-
Cortificates of deposit United States notes Treasury notes of 1890 National-bank notes	\$252, 076, 000, 00 66, 264, 000, 00 60, 130, 424, 00 2, 977, 838, 00	\$165, 737, 000. 00 91, 116, 000. 00 87, 238, 106. 00 2, 937, 580. 00	\$24, 852, 000. 00 27, 107, 682. 00	40 050 00

The aggregates for the two years were therefore as follows:

	1892.	1893.	Increase.	Decrease.
REVENUES.		,	,	× .
Ordinary	\$354, 937, 784, 24 381, 463, 512, 00	\$385, 819; 628. 78 347, 051, 586. 00	\$30, 881, 844. 54	\$34, 411, 926. 00
Total Net decrease.	736, 401, 296. 24	732, 871, 214. 78	30, 881, 844. 54	34, 411, 926. 00 3, 530, 081. 46
EXPENDITURES.				
Ordinary	345, 023, 330, 58 338, 995, 958, 98	383, 477, 954. 49 389, 530, 044. 50	38, 454, 623. 91 50, 534, 085. 52	
Total	684, 019, 289, 56	773, 007, 998. 99	88, 988, 709. 49	
Revenues over expenditures Expenditures over revenues	52, 382, 006, 68	40, 136, 784. 21	92, 518, 790, 89	

In order to show more distinctly the character of the operations of the Treasury as affecting its condition, the receipts and disbursements on account of ordinary revenues and expenditures, together with those on account of loans and the fund for the retirement of national-bank notes, all of which have direct relation to the available assets or working balance, may be separated from those on account of the issue and redemption of certificates of deposit and Treasury notes of 1890, which, while they increase and diminish the assets and liabilities, do not add to and draw from the realized resources. With this view, the figures

are so combined in the following table, in which the true income and outgo of the Treasury are stated under the head of ordinary and loans; for convenience the term deposits is employed to designate the collective accounts of the certificates and Treasury notes:

	1892.	1893.	Increase.	Decrease.
ORDINARY AND LOANS.				
Revenues	\$424, 194, 872. 24 451, 868, 138. 56	\$479, 896, 108. 78 484, 341, 508. 99		
Expenditures over revenues	27, 673, 266. 32	4, 445, 400. 21		\$23, 227, 866, 11
DEPOSITS.			,	
Revenues Expenditures	312, 20 6 , 42 4 . 00 232, 151, 151. 00	252, 975, 106, 00 288, 666, 490, 00	56, 515, 339. 00	59, 231, 318. 00
Revenues over expenditures Expenditures over revenues	80, 055, 273. 00	35, 691, 384. 00	115, 746, 657. 00	

There is included in the expenditures of 1892, on account of loans, the sum of \$24,273,500, which was applied to the redemption of 4½ per cent bonds. If, for the present purpose, this be considered an extraordinary disbursement not specifically required by any law, but undertaken in the discretion of the Secretary of the Treasury, and if the sum be deducted from the total, the true state of the revenues and necessary expenditures will be made more plain and the comparison with 1893 more exact. With this alteration the table will show the excess of expenditures over receipts on account of ordinary revenues and loans to have been \$3,399,766.32 in 1892, and \$4,445,400.21 in 1893.

STATE OF THE TREASURY.

The business of the Treasury has been conducted through the main office at Washington, the subtreasuries at Boston, New York, Philadelphia, Baltimore, New Orleans, St. Louis, San Francisco, Cincinnati, and Chicago, the mints at Philadelphia, San Francisco, New Orleans, Carson, and Denver, the assay offices at New York, Boisé City, Charlotte, Helena, and St. Louis, and a varying number of national banks designated to act as United States depositaries, there being 158 at the opening of the fiscal year and 159 at the close. Each of these institutions held part of the public funds.

In the appendix will be found a table which shows the assets and liabilities of each office of the Treasury at the close of business on June 30, as reported to the Treasurer. Another table shows the assets of the Treasury in the custody of the several offices of the mint. In a third table the figures are combined, together with those representing the public deposits in national banks and the moneys in transit. Lastly, the unavailable amounts are eliminated, together with the accounts between offices, and the liabilities on general account are separated into those arising from outstanding gold certificates, silver certificates, currency certificates, and Treasury notes of 1890, and from the general Treasury balance. The result, substantially in the form employed in the monthly debt statement, is given in a final table in comparison with the figures compiled in like manner for June 30, 1892.

This last-mentioned table shows aggregate holdings of gold, silver, and paper money, of bonds, interest checks, and coupons, together with deposits in national banks, as follows:

Description.	June 30, 1892.	June 30, 1893.
Gold coin and bullion. Silver coin and bullion.	\$255, 671, 639, 87 448, 227, 981, 49	\$189, 075, 634, 59 492, 696, 226, 82
Notes and certificates. Minor coin and fractional currency Bonds and interest paid	465, 474. 99	44, 222, 765, 28 607, 882, 83 5, 549, 038, 74
Deposits in national banks	14, 726, 914. 21	14, 387, 107. 32
, Total	786, 351, 895.71	746, 538, 655. 58

These figures, from the manner in which they have been obtained, of necessity represent, in kinds and amounts, the moneys in the vaults of the several offices of the Treasury and mint, and the balances of public funds standing on the books of the depositary banks. They necessarily represent also in the aggregate the liabilities of the Treasury, in the sense of the extent to which the Treasurer is accountable for the production of public moneys on proper demand and authority.

The general classification of the accounts on which the liabilities stand is obtainable in like manner from the tables in the appendix to which reference is made above. The line of broadest distinction is between the general and agency accounts, the liability upon the former arising from revenues and loans, and that upon the latter from the postal revenues, from deposits to the credit of disbursing officers and the 5 per cent fund for the redemption of national bank notes, as well as from various other sources. Stated in this way, the liabilities were as follows:

Account.	June 30, 1892.	June 30, 1893.
General	\$749, 562, 798, 70 36, 789, 097, 01	\$709, 418, 724, 94 37, 119, 930, 64
Total	786, 351, 895. 71	746, 538, 655. 58

These actual conditions of the Treasury on the two days can not be reconciled with each other by means of a statement of aggregate receipts and disbursements, the records not being in shape to render the compilation of such a statement possible without the expenditure of much labor. Indirectly, however, the liabilities on general account at the two dates can be verified by means of the receipts and expenditures under warrant. As carried on the books, this liability or balance includes, besides the amounts above given, which are represented by actual assets, the amounts of the unsettled deficits known as unavailable funds, and also on June 30, 1893, an unpaid loss on the recoinage of uncurrent coin, but does not include those moneys which have been received in the revenues or from loans and have not yet been covered into the Treasury by warrant. These items, the manner of their combination, and the result, which is technically known as the balance of covered moneys in general account, are shown below:

	\ Item.	June 30, 1892.	June 30, 1893.
	Actual assets. Unavailable funds. Loss on recoinage	\$749, 562, 798, 70 1, 405, 433, 91	\$709, 418, 724, 94 1, 393, 822, 88 7, 684, 63
	Total Uncovered monoys	750, 968, 232. 61 465, 538. 24	710. 820, 232. 45 454, 322. 29
Digitized for F	Balance	750, 502, 694. 37	710, 365, 910. 16

http://fraser.stlouisfed.org/

Federal Reserve Bank of St. Louis

If to the balance as it stood at the beginning of the year there be added the covered receipts for the year, as they are given in the preceding chapter, there will be obtained the total for which the Treasurer was accountable, and if there be subtracted from this the expenditures for the year, as likewise shown, the remainder must agree with the balance at the end of the year, thus:

,		Item.	:	Amount.
Balance June 30, 189 Receipts under warn	2 rant	Q	 	 \$750, 502, 694. 37 \$732, 871, 214. 78
Total Expenditures under	warrant		 	 1, 483, 373, 909, 15 773, 007, 998, 99
Balance June	30, 1893		 	 710, 365, 910. 16

The foregoing figures, which have all been taken from the accounts in this office, differ from those of the corresponding accounts of the Register of the Treasury by the single item of the \$28,101,644.91 on deposit with the States. This is carried on the Register's books but not on the Treasurer's.

In passing, at this point, from the examination of the moneys and other assets of the Treasury in comparison with the gross amounts called for by the accounts, to a classification of those assets with respect to the object for which they were held and the purposes for which they were available, the first step will be to set apart those sums of gold, silver, and United States notes which were held for the redemption of certificates of deposit and Treasury notes. In this way the amounts of the various kinds of assets available for other purposes than such redemptions will be found.

The following table shows the amounts held against the outstanding certificates and notes, together with the remainders available against other obligations; also, under the head of liabilities, the total of the deposits in agency account and of the reserve or general fund of the Treasury:

	June	30, 1892.	June 30, 1893.

The certificates of deposit, bonds, interest checks, and coupons in the cash are as valuable to the Treasurer as a like amount of any other kind of money or security in the settlement of his account, but are practically unavailable for any other purpose. They are no addition to the real resources of the Treasury, and may be delivered for cancellation without affecting its true condition. If this had been done, the figures in the above table would have been changed as below:

	June 30, 1892.		June 3	0, 1893.

This table shows the actual available general fund, reserve, or working balance, and the amounts of free gold, silver, and paper, and of bank deposits of which it is composed. If all of the outstanding gold, silver, and currency certificates and Treasury notes had been redeemed and the gold, silver, and legal-tender notes held in the Treasury against them had replaced them in the circulation, the whole amount of the assets of the Treasury would have been \$165,945,486.60 on June 30, 1892, and \$156,395,696.84 on June 30, 1893, composed of the gold, silver, paper, minor coin, and deposits exhibited in the table. Of these sums \$36,789,097.01 in 1892, and \$37,119,930.64 in 1893, were required to cover the deposits of postal revenues, the 5 per cent fund for the redemption of national bank notes, the deposits to the credit of disbursing officers, and the various other funds which, with these, make up the aggregate of the agency account, and the remainder, including the gold reserve for the redemption of United States notes, was available for the other uses of the Government.

The following table exhibits the condition of the Treasury on September 30 in each year, according to the same form:

	September 30, 1892.		September 30, 1893.	
ASSETS.			٠.	
Against certificates and notes		\$577, 834, 561, 00		\$564, 101, 773.00

The marked diminution of the free available balance, by which is meant the assets in excess of the coin, bullion, and United States notes held in the Treasury against certificates of deposit and Treasury notes, is, of course, due to an excess of disbursements over receipts, which arose chiefly from the deficiency in the net ordinary revenues. This deficiency, during the twelve months ending September 30, amounted to \$21,731,650.12, a sum very nearly equal to the loss in the free balance, as is shown by the following statement of the net revenues and expenditures and of the free Treasury balance for the five quarters ending with September:

End of quarter.	Revenues.	Expenditures.	Şurplus.	Deficiency.	Free Treasury balance.
1892. September	\$101, 155, 641, 13 193, 573, 260, 33	\$96, 162, 026. 38 94, 240, 804. 59	\$4, 993, 614. 75	\$667, 544. 2 6	\$171, 034, 964. 43 170, 313, 967. 46

The condition of the Treasury has excited an unusual degree of interest, and perhaps more on account of the loss of gold which it sustained than for any other reason. This loss, affecting, or threatening to affect, as it did, the soundness of the money of the country, as well as the ability of the Treasury to meet its obligations, is perhaps the most conspicuous and noteworthy event of the past months. Concerning its causes there is doubtless room for much speculation and wide differences of opinion; but to whatever origin they may be ascribed, their direct manifestation at the counters of the Treasury was chiefly in the form of demands for the redemption of United States notes and Treasury notes in gold.

At the end of September, 1888, the Treasury held \$332,551,306 of gold, the largest amount ever recorded at the end of any mouth, and \$197,713,116 of free gold. This last, however, was less than it had been at the end of March, in the same year, when it stood at \$218,818,253, the highest point ever reached. Up to the end of last October the lowest points touched since the highest was reached were on the 19th of that month, when the total gold was \$160,763,584 and the free gold

was \$81,551,385.

In April of the present year, for the first time since the gold reserve reached the sum of \$100,000,000, it fell below that figure, and on the 14th of the month the issue of gold certificates was suspended, in accordance with the proviso in section 12 of the act of Congress approved July 12, 1882. This requirement of law, which was intended to protect the gold reserve, was not generally known to exist, and when the occasion for its application arose its object was not widely understood. It becomes effectual, of course, through the preference of the people for paper over coin, in consequence of which there is always a more or less pronounced tendency toward the flow of gold into the Treasury. In ordinary times and with most classes of people there is not much choice as to the paper received in exchange, whether gold certificates or legal tender notes; but in times of financial disturbance and amongst those who handle most money, there is a preference for

the certificates. The chief danger to the Treasury in such seasons is, perhaps, that certificates will be obtained by presenting notes for redemption in gold and redepositing the gold. With the issue of gold certificates suspended, this danger is averted and whatever gold comes to the Treasury for exchange is paid for in notes and is an addition to the reserve.

A table in the appendix shows the amount of gold in the Treasury at the end of each month since June, 1878, the amount of gold certificates in the Treasury and in circulation, and the net gold or reserve. The following table, which is an expansion of the last part of the other, exhibits the condition of the Treasury with respect to its holdings of gold at the end of three nearly equal periods in each month from the end of May, 1892, when the loss of the metal began to be rapid, to the end of October, 1893:

	Total gold in	Certificates	Certificates	Net gold in
Date.	Treasury.	in	in	Treasury;

A full statement of the aggregate receipts and payments of gold on all accounts would doubtless be interesting and perhaps instructive, but the compilation of the figures would be a heavy labor, which has not been undertaken. In the absence of more complete data, the following statement of the percentage of the several kinds of money received at New York for customs, during the same periods as those taken in the last table, is given:

Date.	Receipts.	Gold coin.	Silver coin.	Gold certifi- cates.	Silver certifi- cates.	United States notes.	Treasury notes of 1890.

From the relations which the reserve bears to the other moneys in the Treasury and to the circulation, it is naturally built up by surplus revenues and cut down by deficiencies and by the redemption of United States notes and Treasury notes in gold. Both of these last two causes have been in operation, but in different seasons, so that the effect of each could be observed separately.

The following table shows the amounts of United States notes and Treasury notes of 1890 redeemed in gold during each month, from October, 1891, when the first redemption of Treasury notes occurred, to September, 1893, and also the exports of gold:

Month.	United States notes.	Treasury notes of 1890.	Total.	Exports of gold.

In December, 1892, with the gold reserve at \$125,000,000, there began a heavy demand for the redemption of notes in gold, which continued until the end of June, 1893. A total of upwards of \$81,000,000 of gold was drawn out of the Treasury in this way, for export, as the table shows, in the course of the seven months. The deficiency in the revenues began at the same time, it is true, but it was jusignificant, amounting to less than \$3,000,000 for the whole period. Almost the whole net loss of gold sustained during this time was, therefore, due to the redemption of notes. It reduced the gross holdings by \$59,000,000 and the reserve by \$29,000,000. Then, with only light redemptions, there occurred, in the next three months, a deficiency of \$19,000,000, with a consequent decrease of the general Treasury balance. During this period the Treasury lost \$15,000,000 of gold, but the reserve fell off only \$2,000,000.

While the amount of gold exported during the fiscal year was the largest that was ever taken out of the country or brought into it in any like period, the volume of the movement is, perhaps, less noteworthy than the manner in which the metal was obtained. Most of the gold exported in former years was drawn from the Treasury, but gold certificates were paid for it. Not only for the first time in the experience of the Department have any considerable sums of notes been presented for gold, but, what is more significant still, the whole, nearly, of the unusual amount of the metal taken for export was drawn out in that way. This is clearly seen in the following table, which shows the redemption of United States notes and Treasury notes in gold and the exports

of that metal for each fiscal year since the resumption of specie payments:

Fiscal year.	United States notes.	Treasury notes of 1890.	Totàl.	Exports of gold.
1879	3,780,638 271,750 40,000 75,000 590,000 2,222,000 6,863,992,596 730,143 732,386 5,986,070 5,352,243 55,319,125 2,105,284	\$3,773,600. 46,781,220 1,617,040	\$7, 976, 698 3, 780, 638 271, 750 40, 000 75, 000 590, 000 2, 222, 000 6, 863, 699 4, 224, 973 692, 596 730, 143 732, 386 5, 986, 970 9, 125, 843 102, 100, 345 3, 722, 324	\$4,587,614 3,639,025 2,565,132 32,587,880 11,600,888 41,081,957 8,477,882 42,952,191 9,701,187 18,376,234 59,952,285 17,274,491 86,362,654 50,195,327
Total	96, 961, 705	52, 171, 860	149, 133, 565	500, 596, 177

That the Treasury has been able to maintain a position so strong in the face of circumstances so unusual and adverse, is a striking exhibition of its resources and power, which can not fail to produce a good effect upon public confidence.

THE PUBLIC DEBT.

With the exception of the increase of the Treasury notes of 1890 arising from the purchase of silver bullion, there has been no important change in the public debt. A decrease of \$80,000,000 in the combined volume of gold certificates and currency certificates occurred within the fiscal year, but this has more significance in connection with the circulation than with the debt.

The amounts of the various classes of loans outstanding on June 30, 1892 and 1893, were as follows:

Class.	June 30, 1892.	June 30, 1893.
Interest-bearing loans Matured loans Old domand notes United States notes. Fractional currency, estimated National bank notes, redemption account Treasury notes of 1890	2, 785, 875, 26 55, 647, 50 346, 681, 016, 00 6, 903, 462, 62 26, 763, 509, 25 101, 712, 071, 00	\$585, 037, 100.00 - 2, 094, 060.26 - 55, 647.50 346, 681, 016.00 - 6, 900, 504. 02 20, 663, 437.75 147, 190, 227.00
Certificates of deposit		437, 363, 693, 00 . 1, 545, 985, 686, 13

Considered with respect to the conditions of payment, the debt divides itself into five general classes, as shown below:

Condition of payment.	June 30, 1892.	June 30, 1893.
At maturity, future dates At option of the United States On demand, without reissue On demand, for reissue On demand, out of deposits	36, 508, 494, 63 448, 393, 087, 00	29, 713, 650, 13
Total	1, 588, 464, 144. 63	1, 545, 985, 686. 13

THE CURRENCY.

According to the revised estimates, the stock of money in the United States on June 30, 1892 and 1893, was composed as follows:

Kind.	June 30, 1892.	June 30, 1893.
Gold coin Gold bullion Silver dollars Fractional silver coin	\$589, 179, 550 75, 095, 785 413, 988, 735	\$519, 156, 102 78, 541, 583 419, 332, 450
Silver bullion Total coin and bullion	78, 803, 331	77, 415, 123 119, 113, 911 1, 213, 559, 169
United States notes	346, 681, 016 101, 712, 071	346, 681, 016 147, 190, 227 178, 713, 872
National bank notes Gold certificates Silver certificates Currency certificates	156, 623, 929 331, 614, 394 30, 430, 000	94, 041, 189 330, 957, 504 12, 405, 000
Total paper currency	1, 139, 745, 170	1, 109, 988, 808
Aggregate	2, 374, 334, 049	2, 323, 547, 977

To explain the differences between these figures and those heretofore published and used elsewhere in these pages, the following paragraph is quoted from the Treasurer's report for 1892:

These figures are the result of the final compilation of statistics relating to the dates named and are intended to represent the facts actually existing on those days. They differ somewhat, but not materially, from those heretofore published and reproduced elsewhere in this report, which present the showing of the records current in the Department at the time, the compilations were made. The differences between the two sets of figures do not, therefore, imply errors in either. As the more precise and authoritative record, the revised figures are to be preferred; but since they are made up for the last day only in each fiscal year they are not available for the discussion of the movements occupying shorter periods of time. Neither would it be considered accurate to substitute them in the place of those for June in the series compiled monthly, since they rest upon a different basis of fact from the others in that series. Hence the revised figures are used herein to show the nct results of the year, while those in the monthly series are recurred to in the discussion of monthly changes.

In the table below is given the total effective monetary supply of the country on June 30 in each of the past five years. The figures are obtained by eliminating from the aggregate stock the certificates and Treasury notes, as merely representative, and combining the remaining items under the general heads of gold, silver, and notes.

Kind.	1889.	1890.	1891.	-1892.	1893.
Gold Silver Notes	420, 548, 929	\$695, 563, 029 463, 211, 919 532, 651, 791	\$646, 582, 852 522, 277, 740 514, 608, 990	\$664, 275, 335 570, 313, 544 519, 364, 866	\$597, 697, 685 615, 861, 484 525, 394, 888
Total	1, 658, 672, 413	1, 691, 426, 739	1, 683, 469, 582	1, 753, 953, 745	1, 738, 954, 057

The effective stock on September 30 in each of the same years, arrived at in the same manner, was as follows:

Kind.	1889.	1890.	1891.	1892.	1893,
Gold	\$681, 819, 487	\$693, 026, 194	\$653,308, 095	\$652, 130, 237	\$657, 505, 880
	428, 440, 671	468, 988, 835	529, 019, 947	579, 211, 096	621, 171, 938
	550, 248, 818	528, 283, 931	518, 466, 162	519, 467, 776	555, 371, 595
	1, 660, 508, 976	1, 690, 298, 960	1, 700, 794, 204	1, 750, 809, 109	1, 834, 049, 433

In the appendix will be found a series of tables which exhibit the estimated stock of all kinds of money and its distribution as between the Treasury and the people, at the end of each month for a series of years. These tables, which are a revision, extension, and somewhat further elaboration of those contained in former reports, are designed to present the facts to which they relate as minutely as would be likely to be found useful. In them can be seen the details of the changes which are shown above in the aggregate.

The recent financial disturbances are plainly reflected in these statistics. Notwithstanding the addition of \$45,500,000 to the stock of silver and an increase of \$6,000,000 in the outstanding national bank notes, the total stock of money of all kinds was \$51,000,000 less at the end than at the beginning of the fiscal year, and that part of it which above is denominated the effective stock was \$15,000,000 less. The reduction was caused, of course, by the exportation of gold. From the end of November to the end of June, with an excess of upwards of \$73,000,000 of exports of gold over imports, there was a net loss of \$66,000,000 of the metal.

In July, however, with the development of the panic, there began a heavy movement in the opposite direction, which was supported by a rapid expansion of the bank-note circulation. By the end of September the imports of gold, amounting in the three months to nearly \$52,000,000, together with the product of the mines, restored the total stock of the metal to what it was before the exports began, while the total addition to the effective stock amounted, in the three months, to no less than \$95,000,000, bringing it up to a figure much above the highest that had ever before been reached. This sudden contraction and expansion within the space of eleven months affords a striking illustration of the degree of flexibility possessed by the currency.

The following table shows the net imports and exports, the apparent net production and consumption, and the resulting gain or loss of gold, for each month from July, 1892, to September, 1893:

Month.	Net imports.	Net exports.	Net pro- duction.	Net consumption.	Net gain.	Net loss.
1892. July August September October November	\$2,634,080	\$10, 240, 198 5, 716, 699 2, 324, 127 11, 339, 189	\$3, 648, 332 1, 661, 225 756, 258 749, 349 .1, 014, 098 4, 703, 622		\$3, 383, 429 2, 452, 663	\$6, 591, 866 4, 055, 474 1, 567, 869 6, 635, 567
1893. January	ε .		1, 398, 391			10, 815, 162
February March April May		1 504 991	192, 089 5, 210, 674 6, 627, 435	\$37, 446		13,025,514 1,312,902
JuneJulyAugustSeptember	5, 776, 401	1,701,544	5, 858, 369	10,673,877	11, 634, 770 42, 165, 637	8, 378, 325 12, 375, 421
Total	55, 713, 658	91, 579, 108 35, 865, 450	39, 737, 207 29, 025, 884	10, 711, 323	71, 252, 839	78, 092, 405 6, 839, 566

The irregularity in the columns of production and consumption arises from heavy shipments on the last days of one month or the first days of the next, which were not uniformly treated in the statistical reports and the provisional estimates of the Director of the Mint, upon which, together, the table is based.

As the imports of silver during the period under consideration were uniformly exceeded by the exports, and the consumption by the production, a like table of the changes in the stock of that metal assumes the form of the one below. It must, however, be understood that the figures in the column of production do not have the same signification as those in the corresponding column of the other table, as they include the gain arising from the seigniorage on the coinage. With this explanation the figures for the monthly increase of the stock of silver are given, as follows:

·	Month.	Net exports.	Net produc- tion.	Net gain.	
July August September October November December	1892.	\$596, 008 1, 701, 118 1, 190, 606 12, 464 1, 179, 003 2, 885, 668	\$5, 723, 219 5, 227, 987 4, 478, 504 4, 071, 344 5, 507, 107 7, 807, 309	\$5, 127, 21 3, 526, 86 3, 287, 89 4, 058, 88 4, 328, 10 4, 921, 64	
March April May June July August September		1, 755, 200 1, 755, 200 1, 426, 789 1, 293, 258 2, 430, 284 4, 007, 976 1, 598, 991 2, 827, 293	5, 339, 047 2, 089, 371 7, 834, 487 5, 354, 248 5, 591, 699 6, 013, 109 4, 419, 557 4, 994, 205 5, 429, 974	3, 257, 68 1, 097, 06 6, 079, 28 3, 927, 45 4, 298, 44 3, 582, 82 411, 58 3, 395, 21 2, 602, 68	
Total		25, 978, 327	79, 881, 167	53, 902, 84	

A combination of the final columns of these two tables, with the figures for the changes in the national bank notes outstanding, gives the net changes in the effective stock of money as below:

Month.	Increase of gold.	Decrease of gold.	Increase of silver.	Increase of notes.	Decrease of notes.	Increase of stock.	Decrease of stock.

An interesting event in the history of the currency occurred in May last, when, as the result of the continued accumulation of silver and the exports of gold, the stock of the former metal at last exceeded the latter. While the exports continued, the preponderance rapid y increased on the side of silver, and not until August was it restored to gold, by the heavy importations of that month.

THE CIRCULATION.

There having been but little change in the net balance of moneys in the Treasury, the changes in the aggregate circulation closely followed, of necessity, those in the general stock. The revised figures for the distribution of currency between the Treasury and the circulation on June 30, in each of the last two years, are given in the following table:

	In Treasury	y and mints.	In circulation.		
Kind.	1892.	1893.	1892.	1893.	
Gold coin Gold bullion Silver dollars Fractional silver coin Silver bullion	357, 171, 273	\$110, 620, 439 78, 541, 583 362, 402, 777 11, 945, 257 118, 968, 327	\$408, 568, 824 56, 817, 462 63, 293, 704 1, 734, 548	\$408, 535, 663 56, 929, 673 65, 469, 866 145, 584	
Total coin and bullion United States notes. Treasury notes of 1890. National-bank notes Gold certificates Silver certificates Currency certificates	37, 276, 919 3, 453, 379 5, 462, 333 15, 530, 310 4, 920, 839	682, 478, 383 27, 621, 590 6, 334, 613 4, 043, 906 1, 399, 000 4, 133, 656 690, 000	530, 414, 538 309, 404, 097 98, 258, 692 167, 221, 517 141, 093, 619 326, 093, 465 29, 840, 000	531, 080, 780 319, 059, 420 140, 855, 614 174, 669, 960 92, 642, 183 326, 823, 848 11, 715, 000	
Total paper	67, 233, 780 771, 408, 121	44, 222, 765 726, 701, 148	1, 072, 511, 390 1, 602, 925, 928	1, 065, 766, 043 1, 596, 846, 829	

If the certificates be supposed to be replaced by what they represent and the Treasury notes by silver, the virtual division of the effective stock will be found as below:

Kind.	Outstanding.	In Treasury and mints.	In circulation.
June 30, 1892: Gold Silver Notes	\$664, 275, 335 570, 313, 544 519, 364, 866	\$114, 612, 892 23, 515, 673 12, 899, 252	\$549, 662. 44 546, 797. 87 506, 465, 61
Total	1, 753, 953, 745	151, 027, 817	1, 602, 925, 92
June 30, 1893 : Gold Silver Notes		96, 519, 833 25, 636, 899 19, 950, 496	501, 177, 85 590, 224, 58 505, 444, 39
Total	1, 738, 954, 057	142, 107, 228	1, 596, 846, 82

The correspond ng figures for the circulation on the 30th of Septem ber in each of the ast five years are as follows:

Kind.	1889.	1890.	1891.	1892.	1893.
Gold	\$492, 623, 064	\$545, 044, 462	\$520, 784, 873	\$532, 734, 728	\$563, 923, 708
	387, 105, 167	434, 872, 007	499, 080, 336	558, 336, 989	596, 712, 206

FI 93-2

The following table shows the monthly changes in the amount and composition of the active circulation during the fifteen months ending with September:

35 (3	Go	ld.	Silver aı	nd notes.	notes. Aggr	
Month.	Increase.	Decrease.	Increase.	Decrease.	Increase.	Decrease.
1892. July August September October November		6, 807, 062	1 3, 500, 461		\$10, 089, 752 8, 650, 531	3 306 601
1893. January . February . March . April . May . June . July . August . September .	7, 917, 251	4, 920, 907 3, 253, 411 6, 615, 636 12, 812, 194	3,739, 202 10, 386, 704 9, 455, 355 24, 104, 207	239, 060		3, 492, 471 2, 876, 434 2, 425, 490
Total Net		57, 718, 274	90, 968, 930 84, 945, 951	6, 022, 979	129, 819, 054 98, 866, 580	30, 952, 47

The remarkable increase of \$108,000,000 in the months of July, August, and September, was followed by one of \$18,000,000 in October, making a total of \$125,000,000 in four months. This is a record altogether without parallel in the history of the country. The aggregate of money in the hands of the people was thus brought to a higher figure than had ever before been reached, and the average per capita as well.

ISSUE AND REDEMPTION OF CURRENCY.

While the amounts of United States paper currency issued during the year were less than in the year preceding, when they reached the highest point ever attained, the amounts redeemed were very much heavier than ever before, the aggregate of all kinds being \$380,977,490.

The gross amounts of paper money received at the Treasury for redemption during each month, from July, 1892, to October, 1893, including, with the exception of national bank notes, only those kinds which are payable to bearer, are shown in the following table:

	Month.	-	Amount.
	1892.		
ulv	***************************************		\$19, 262, 13
August	***************************************		22, 064, 66
eptember			21, 374, 00
December	••••		19, 722, 93
	1893.		` .
Po an in O'mar	1000.		28, 890, 03
Pebruary		***************************************	35, 128, 5
March	· · · · · · · · · · · · · · · · · · ·		25, 944, 8
pril			25, 533, 1
day			32, 758, 7

	•••••		
September			18, 256, 00
October		******************	23, 839, 53
	••••	[-	

This unusual demand for redemption exceeded the capacity of the force engaged in handling the notes, and some delays have been necessary in making returns. Even with the employment of from twenty to twenty five additional clerks, and with much labor after the regular hours, it has been difficult to perform the work.

The Treasury has been generally able, during the period under consideration, to furnish the denominations of new paper called for, but on account of the narrowness of the margin afforded by the diminished cash balance, and the magnitude of the receipts for redemption, it has not been an easy matter to get the old material out of the way so that

the new might be put into use.

Including the certificates of deposit payable to order and the national-bank notes there was a decrease, during the fiscal year, of \$31,000,000 in the amount outstanding. At the same time, however, the denominations of \$20 and under increased by a nearly equal sum, as shown by the following statement of the amounts outstanding on June 30 in each year:

Denomination.	1892.	1893.	Increase.	. De	crease.
Twenty dollars and under Fifty dollars and over	\$813, 722, 649 325, 854, 685	\$844, 566, 857 264, 014, 635	\$30, 844, 208	\$6	, 840, 050
Total	1, 139, 577, 334	1, 108, 581, 492		3	, 995, 842

This change of denomination was doubtless due to the larger distribution of money in the hands of the people.

THE COINAGE.

Appropriations amounting in the aggregate to \$550,000 having become available since July 1, 1892, for the recoinage of uncurrent coins, very considerable operations have been carried on in that line, to the great improvement of the metallic circulation.

The amounts of the several denominations of gold and silver coins transferred during the fiscal year from the Treasury to the mint to be recoined, together with the loss arising from their conversion into bullion and charged to the appropriations, are shown in the following table:

	Denomination.	Amount.	Loss.
Double engles		\$120,440,00	
Eagles		76 830 00

One hundred thousand dollars in minor coin was also transferred to the mint at Philadelphia to be cleaned and reissued.

During the last two fiscal years there was executed a recoinage of nearly \$15,000,000 of subsidiary silver, or about one-fifth part of the whole estimated stock. Upwards of \$12,000,000 of the coins melted were half dollars. Such extensive rehabilitation, with what more is provided for, can not fail to increase the popularity and usefulness of this part of the currency.

Under the provisions of the law which authorized the manufacture of \$2,500,000 of Columbian half dollars, from uncurrent subsidiary silver coins in the Treasury, and appropriated \$50,000 to reimburse the Treasury for the loss thereon, the sum of \$2,550,000 in such uncurrent coins was transferred to the mint and the coinage was executed between the beginning of December and the end of March last. There was used in the operation \$2,541,994.35 of the old pieces, and the product was \$2,501,525 of the new. The loss was therefore \$40,469.35. A coinage of \$10,005.75 in souvenir quarter dollars was also executed last June to provide the \$10,000 in such coins authorized to be paid to the Board of Lady Managers of the Columbian Exposition. There being no specific provision for the loss on this, it was charged to the general appropriation.

Contrary to expectation, neither of the souvenir coins proved popular. Of the half dollars \$1,820,880 are in the Treasury, of which a part were never taken out and the rest were returned for redemption. An arrangement has been made under which these will be recoined at the expense of the management of the Exposition, to protect the holders of the other \$679,120, who presumably paid double the nominal value for them. There are also in the Treasury \$3,952.25 of the quarter dollars, but it has not yet been decided what disposition will be made of these.

The gold exported during the heavy movements of the past few years has been almost wholly in United States coin, while the imports have been mostly in bullion and foreign coin. One of the consequences of this has been to deplete the Treasury of serviceable gold to such an extent as to call for unusual activity in coining. Through the same operations, however, the condition of the gold coinage has been so much improved that it is probably better now than at any time before.

SPURIOUS AND FRAUDULENT ISSUES.

Counterfeit silver coins and paper currency, of the denominations and nominal amounts exhibited in the following table, were canceled, during the fiscal year, at the offices of the Treasury:

Denomination.	Silver coins.	United States notes and silver certifi- cates.	National bank notes.	Fractional currency.	Total.
Ten cents Twenty-five cents Fifty cents One dollar Two dollars Five dollars Ten dollars Tren dollars Twenty dollars Fifty dollars One hundred dollars	\$329. 25 324. 50 1, 697. 00	\$27.00 636.00 525.00 630.00 900.00 900.00	\$42.00 540.00 690.60 740.00 50.00 1,100.00	17.00 210.50	\$0.50 346.25 535.00 1,724.00 678.00 1,065.00 1,320.00 1,640.00 950.00 1,400.00
Total	2, 350. 75	3,918.00	3, 162. 00	228.00	9, 658. 7 5

Although the amount was greater than in the previous year, the increase was less, proportionately, than the increase in the amount of currency received for redemption.

Under the provisions of the act of Congress approved July 28, 1892, the national-bank notes which had been stolen, while yet unsigned, from the banks of issue, and had been rejected by the banks and the Treasury when presented for redemption, have been redeemed in the same manner as those regularly issued, and no separate account of them has

Since the date of the last report there have been redeemed \$210 of the notes of the First National Bank of Jersey City, the National City Bank of Lynn, and the Third National Bank of New York, which were stolen many years ago from the office of the Comptroller of the Currency, and made redeemable, to the amount of \$2,500, by the act of September 30, 1890. The total of these redeemed is \$1,840, so that there remains a balance of \$660 for further redemptions. according to the books there are \$9,260 of the notes still outstanding, it has always been the belief that most of them were destroyed shortly after the theft. It is yet too early to speak with assurance, but it seems likely that the remainder of the appropriation will be sufficient to redeem all of them that will ever be presented.

TRUST FUNDS.

United States bonds of the description and amounts exhibited in the following table were held on June 30 in trust for national banks to secure circulating notes and public deposits:

Class of bonds.	Rate of interest.	To secure circulation.	To secure public moneys.	Total.
Bonds issued to Pacific railroads. Funded loan of 1891, continued. Funded loan of 1907 Total	2 4	\$12, 426, 000 22, 020, 550 142, 141, 700 -176, 588, 250	\$1, 191, 000 1, 588, 000 12, 468, 000 15, 247, 000	\$13, 617, 900 23, 608, 550 154, 609, 700 191, 835, 250

There were \$18,413,300 of bonds deposited and \$5,015,100 withdrawn as security for circulation, and \$555,000 deposited and \$1,160,000 withdrawn as security for public moneys. The total of the holdings increased, therefore, during the year, in the sum of \$12,793,200.

The rapid expansion of the bank-note circulation which occurred in the three months beginning with July is reflected in the increase of the bonds deposited as security for the notes. The amounts on hand on September 30 were as follows:

Class of bonds.	Rate of interest.	To secure circulation.	To secure public moneys.	To	tal.
Bonds issued to Pacific railroads	4	\$16, 461, 000 22, 278, 350 170, 672, 750 209, 412, 100	\$1, 170, 000 1, 588, 000 12, 628, 000 15, 386, 000	183,	631, 000 866, 350 300, 750 798, 100

The bonds described below were held on June 30 for the Pacific railroad sinking funds:

Kind of bonds.		Union Pacific sinking fund.		Total.
United States bonds issued to Pacific railroads Union Pacific, first mortgage. Central Pacific, first mortgage. Central Branch, Union Pacific Eastern Division, Union Pacific Sioux City and Pacific. Western Pacific	6 6 6 6	\$188,000 5,739,000 3,304,000 936,000 1,276,000 712,500 335,000	\$2, 251, 000 739, 000 1, 530, 000 111, 000 169, 000 25, 500 92, 000	\$2, 439, 000 6, 478,000 4, 834, 000 1, 047, 000 1, 445, 000 738, 000 427, 000
Total		12,490,500	4, 917, 500	17, 408, 000

There were added to the sinking fund of the Union Pacific \$1,329,000 of first-mortgage bonds and to that of the Central Pacific \$482,500.

The following described bonds and stocks are held in trust for the Secretary of the Interior as trustee of various Indian tribes.

Class of bonds.	Registered.	Coupon.	Total.
Arkansas funded debt. Florida State stocks. Louisiana State stocks		42.000	\$168, 000. 00 42, 000. 00 22, 000. 00

•				

A special deposit of \$70,000 of United States 4 per cent bonds is held in the name of the Comptroller of the Currency for the benefit of the Fidelity National Bank, of Cincinnati.

Captured bonds of the State of Louisiana, of the face value of \$545,

480, are held for the Secretary of War.

REDEMPTION OF NATIONAL-BANK NOTES.

There was an increase of about \$7,000,000 in the course of the fiscal year in the amount of national-bank notes outstanding, and one of about \$6,000,000 in the amount received for redemption. Of the \$76,000,000 assorted and delivered, upwards of \$24,000,000 were fit for circulation, an increase of about \$7,500,000 over the preceding year.

No marked or unusual incident occurred in the movement of the notes to Washington until July, when the amount received fell off nearly one-half. The receipts in August were only \$2,700,000, less than those in any other month since the establishment of the redemption agency at the Treasury. In September the receipts increased as rapidly as they had fallen off, and in October they amounted to \$12,500,000, being the heaviest in many months. The cause of these changes is of course to be found in the disturbed financial condition of the country. So long as the stock of money continues large and to a great extent idle, the redemption of bank notes, as well as other paper currency,

may be expected to be heavy.

It has been the unbroken experience of the Treasury that nationalbank notes of denominations larger than \$20 are less satisfactory to the public than those of smaller, and consequently are presented more freely for redemption. The reason for this is plain, and is to be found in the character itself of this class of notes as money. Lacking the legal-tender quality, and unavailable for bank reserves, to say nothing of other disqualifications, the national bank note is peculiarly the money for the people and for use in being passed from hand to hand in small When such a note is of a value unsuitable for these purtransactions. poses, it soon finds its way into a local bank, where it displaces legal tender and where it is doubly undesirable. It is then sent to the city bank and by the city bank to the Treasury for redemption, only to be returned to the bank of issue and to repeat its journey. Instances have occurred where nearly an entire new issue of notes of the denominations of \$50 and \$100 has been redeemed within a few weeks of their delivery to the bank.

It has happened very often that bank officers, not attending to these considerations, and anxious, perhaps, to save themselves labor in signing their names, have issued the larger denominations, only to be annoyed by excessive demands for redemption, with the consequent cost, and to be obliged finally to incur the expense of the preparation of another issue. There are differences in different localities, of course, but they are only in degree. Perhaps there is no bank in the whole list with the larger denominations outstanding that is not annually at a greater cost for the expenses of redemption than it would be with its

circulation in denominations of \$5 or \$10.

SAFES AND VAULTS.

In calling attention to the arrangements in the office for the safe custody of the public moneys, the Treasurer thinks it his duty to the Department, to his bondsmen, and to himself, to put himself on record

as insisting that, aside from other means of safeguarding that may be deemed sufficient, the vaults of the office and the other receptacles for valuables should be placed forthwith in a condition as good at least as those in use by well-conducted private financial institutions. This proposition seems to him to be so certain of universal acceptance, that

the bare statement should be sufficient for his purpose.

The commission appointed under the act of Congress approved September 30, 1890, "for the purpose of reporting the best method of safe and vault construction, with a view to renewing or improving the vault facilities of the Treasury Department," concluded their labors toward the close of the last session of the last Congress, and their report is now in the printer's hands. This document, which, with the papers accompanying it, is a full discussion and illustration of the present state of the art, will be a most valuable contribution to the literature of the subject. With it before Congress and the Department, there will probably be nothing further necessary in the way of information upon which to base a judgment of what should be done. The Treasurer hopes that the matter will be promptly taken up and pushed forward to practical results.

In couclusion, the Treasurer desires to express his acknowledgment of the faithfulness and ability with which those associated with him

have performed their responsible duties.

I have the honor to be, very respectfully, your obedient servant,

DANIEL N. MORGAN,

Treasurer of the United States.

Hon. John G. Carlisle, Secretary of the Treasury.

REPORT OF THE DIRECTOR OF THE MINT.

TREASURY DEPARTMENT,
BUREAU OF THE MINT,
Washington, D. C., November 29, 1893.

SIR: I respectfully submit the following report on the operations of the mints and assay offices of the United States for the fiscal year ended June 30, 1893, this being the twenty-first annual report of the Director of the Mint.

DEPOSITS OF GOLD.

The amount of gold deposited during the year at the mints and assay offices of the United States, including gold contained in silver deposits and purchases, was 2,732,644,925 standard ounces of the value of \$50,839,905.53, as compared with \$66,476,975.98 during the preceding

fiscal year, a decrease of \$15,637,070.45.

Of the gold thus deposited, 2,496,678.983 standard ounces, of the value of \$46,449,841.50, were original deposits, and 235,965.942 standard ounces, of the value of \$4,390,064.03, redeposits, of which \$21,894.21 were fine bars redeposited for small, and \$4,368,169.82 unparted bars transferred from the minor assay offices to the mint at Philadelphia for refining and coinage; \$33,286,167.94 were classified as of domestic production, as against \$31,961,546.11 of the same class of gold deposited during the previous fiscal year, an increase of \$1,324,621.83.

Of the gold bullion classed as domestic, \$19,690,057.19 were fine bars bearing the stamp of private refineries, and \$13,596,110.75 represented

unrefined domestic bullion.

A table will be found in the Appendix showing the distribution of the amount of unrefined gold deposited at the mints and assay offices during the year among the States and Territories that produced the same.

Foreign gold bullion of the value of \$2,247,730.78, and foreign gold coin of the value of \$6,293,296.33 were received and melted by the mints

and assay offices during the year.

Worn and uncurrent domestic gold coin (of the nominal value of \$806,870) was received for recoinage, and after melting, the coining value of the same was found to be \$792,470.43. Old material consisting of jewelry, plate, etc., of the value of \$3,830,176.02, was also received.

DEPOSITS AND PURCHASES OF SILVER.

The deposits and purchases of silver, including that contained in gold deposits during the last fiscal year, aggregated 73,135,705.76 standard ounces, of the coining value (\$1.16₄ per ounce standard or \$1.2929 per fine ounce) of \$85,103,366.67, against \$83,922,930.01 in the previous fiscal year, an increase of \$1,180,436.66.

Of the silver deposited during the year 747,255.84 standard ounces, of the coining value in silver dollars of \$869,534.06, consisted of redeposits, making the amount of original deposits 72,388,449.92 standard ounces, and the coining value of the same in silver dollars \$84,233,832.61;

59,756,161.95 standard ounces, of the coining value of \$69,534,443 consisted of fine bars, made by and bearing the stamp of private refineries in the United States, the same being classified as of domestic production. It should, however, be stated that the classification at the mints of silver bullion is not exact, as fine silver bars purchased from private refineries in the United States are without exception necessarily classified at the mints as of domestic production, although they are to a large extent composed of silver obtained from ore and bullion imported from Mexico and smelted and refined in this country.

Of the domestic silver bullion deposited at the coinage mints and assay offices, 3,550,595.69 standard ounces, of the coining value of \$4,131,602.23, were unrefined silver from the mines of the United States. A table will be found in the Appendix of this report showing the distribution of this product among the States and Territories from which it

was obtained.

There was also deposited foreign silver bullion containing 1,931,901.54 standard ounces, of the coining value of \$2,248,030.88, and foreign silver coin containing 561,300.85 standard ounces, of the coining value of \$653,150.08, making \$2,901,180.96 of foreign silver deposited and melted

at the mints and assay offices during the fiscal year.

Worn and uncurrent silver coins of the nominal value of \$7,618,198.25, principally subsidiary pieces, were transferred by the Treasury to the mints for recoinage, and uncurrent silver coins, of the nominal value of \$4,787.70, were purchased as bullion, under the act of July 14, 1890, making the aggregate amount of uncurrent silver coins from the two sources received by the mints \$7,622,985.95, containing 5,940,544.90 standard ounces. The coining value of the amount transferred for recoinage was \$7,381,289.58 in subsidiary coin.

In addition trade dollars, containing 469.14 standard ounces, were purchased as bullion and melted, the coining value of the same being

\$545.91 in standard silver dollars.

Old silver, consisting of jewelry, plate, etc., containing 647,475.85 standard ounces, of the coining value of \$753,426.46, was purchased and maltad during the year.

and melted during the year.

The coining value of gold and silver (exclusive of redeposits) received at the mints and assay offices of the United States each fiscal year from 1880 is shown in the following table:

VALUE OF THE GOLD AND SILVER (NOT INCLUDING REDEPOSITS) RECEIVED AT THE MINTS AND ASSAY OFFICES, 1880-1893.

Fiscal years.	Gold.	Silver (coining value).	Total value.
1880	\$98, 835, 096	\$34, 640, 522	\$133, 475, 618
1881	130, 833, 102	30, 791, 146	161, 624, 248
1882	66, 756, 652	33, 720, 491	100, 477, 143
1883	46, 347, 106	36, 869, 834	83, 216, 940
1884	46, 326, 678	36, 520, 290	82, 846, 968
1885	52, 894, 075	36, 789, 774	89, 683, 849
1886	44, 909, 749	35; 494, 183	80, 403, 932
1887	68, 223, 072	47, 756, 918	115, 979, 990
1888	72, 225, 497	41, 331, 014	113, 556, 51
1889	42, 136, 436	41, 238, 151	83, 374, 58
1890	42, 663, 095	42, 644, 719	85, 307, 81
1891	48, 485, 801	71, 985, 985	120, 471, 780
1892	61, 131, 460	83, 177, 666	144, 309, 12
1893	46, 449, 842	84, 233, 832	130, 683, 67

The usual tables, exhibiting, by weight and value, the deposits and purchases of gold and silver at each of the mints and assay offices, will be found in the Appendix.

COINAGE.

The coinage executed during the fiscal year 1893 by the mints at Philadelphia, San Francisco, New Orleans, and Carson City consisted of 97,280,875 pieces, of the value of \$43,685,178.80. Of gold there were coined 2,282,269 pieces, of the value of \$30,038,140. Of this sum \$20,444,760 were in double eagles; \$6,599,120 in eagles; \$2,987,925 in half eagles, and \$6,335 in quarter eagles.

The silver coinage aggregated 34,291,176 pieces, of the nominal value of \$12,560,935.90. Of this sum \$5,343,715 were in standard dollars, coined under the act of July 14, 1890, \$3,266,630 in half dollars, including \$2,501,052.50 in Columbian Souvenir pieces, \$2,848,618 in quarter dollars, including \$10,005.75 Columbian Souvenir pieces, and \$1,101,972.90 in dimes.

The coinage of Columbian Souvenir half dollars, as directed by the act of August 5, 1892, was made from worn and uncurrent subsidiary silver coin transferred from the Treasury of the United States, as was also the Columbian Souvenir quarter dollars, authorized by the act of March 3, 1893.

The execution of the minor coinage is confined to the mint at Philadelphia by the provisions of section 3528 Revised Statutes of the United States. It consisted, during the year, of 11,975,715 5-cent nickel pieces, of the nominal value of \$598,785.75, and 48,731.715 one-cent bronze pieces, of the value of \$487,317.15, making an aggregate of 60,707,430 pieces, of the nominal value of \$1,086,102.90.

The total coinage executed by the mints of the United States during

the last fiscal year is shown in the following table:

COINAGE, FISCAL YEAR 1893.

Description.	Pieces.	Value.
Gold	2, 282, 269	\$30, 038, 140. 00
Silver dollars	5, 343, 715	5, 343, 715. 00
Subsidiary silver coins	28, 947, 461	*7, 217, 220. 90
Minor coins	60, 707, 430	1, 086, 102. 90
Total	97, 280, 875	43, 685, 178. 80

^{*} Includes \$2,501,052.50 in half-dollar and \$10,005.75 in quarter-dollar Columbian souvenir coins.

All the coinage of silver dollars during the fiscal year 1893 was made from bullion purchased under the act of July 14, 1890, and aggregated \$5,343,715. The amount of bullion consumed in the coinage was 4,133,029.56 fine ounces, costing \$3,784,417.64, and the seigniorage thereon was \$1,559,297.36.

There being no special demand for silver dollars for the redemption of notes issued in payment for silver purchased, the coinage was limited

The total coinage of silver dollars under the acts of February 28, 1878, July 14, 1890, and March 3, 1891, is shown in the following table:

COINAGE OF SILVER DOLLARS FROM FEBRUARY 28, 1878, TO NOVEMBER 1, 1893.

Coinage under act of—	Amount.
February 28, 1878	1 ' ' '
March 3, 1891 (trade-dollar 'lion)	
Total	419, 332, 550

In the Appendix will be found tables showing the values and denominations of coins struck during the fiscal year 1893, and also during the calendar year 1892, at the several mints; also one showing the coinage of the United States for each calendar year since the organization of the mint in 1792, to the close of the fiscal year 1893.

GOLD AND SILVER BARS MANUFACTURED.

During the year, in addition to the coinage executed, there were manufactured by the mints and assay offices gold and silver bars of the value of \$32,457,023.04.

BARS MANUFACTURED, 1893.

Description.	Value.
Gold	\$24, 059, 948. 24 8, 397, 074. 80
Total	32, 457, 023. 04

DIES AND MEDALS MANUFACTURED.

The number and description of the coinage and medal dies prepared by the engraving department of the mint at Philadelphia are shown in the following tables:

DIES MANUFACTURED, 1893.

Description.	Number
Gold coinage	164
Silver coinage	
Minor coinage	492
Proof coinage	. 21

The net profits derived by the Government from the sale of proof coins and medals during the year was \$1,512.22.

GOLD BARS EXCHANGED FOR GOLD COIN.

The value of the gold bars, for use in the industrial arts, exchanged for gold coin during the last fiscal year, at the mint at Philadelphia and assay office at New York, was \$8,716,226.99, as shown in the following table, by months:

FINE GOLD BARS EXCHANGED FOR GOLD COIN, 1893.

Months.	Philadelphia.	New York.	Total.
1892.

WORK OF GOVERNMENT REFINERIES.

During the fiscal year 1893 the refineries of the mints and assay offices operated on bullion containing 6,021,259,964 ounces of standard gold and silver, of the value of \$25,871,640.35, as shown in the accompanying exhibit:

PRODUCT OF ACID REFINERIES, 1893.

Bullion.	Standard ounces.	Value.
Gold	1, 081, 650. 554	\$20, 123, 731. 23

SILVER PURCHASES.

All the silver purchased during the fiscal year 1893 was bought under the provisions of the act of July 14, 1890, which provided for the purchase by the Secretary of the Treasury "from time to time silver bullion to the aggregate amount of four million five hundred thousand ounces, or so much thereof as may be offered in each month at the market price thereof, not exceeding one dollar for three hundred and seventy-one and twenty-five hundredths grains of pure silver."

Under the provision of law above cited, offers for the sale of silver to the Government, in lots of 10,000 ounces and over, were received and considered at 1 o'clock p. m. on Monday, Wednesday, and Friday

of each week, and were invariably made by telegraph.

The superintendents of the coinage mints were authorized to purchase silver in lots of less than 10,000 ounces at a price fixed from time to time by the Director of the Mint, and which agreed with the market price.

During the year the amount delivered upon purchases made by the Department at the respective coinage mints aggregated 50,276,215.83

fine ounces, costing $4\overline{2},380,545.37$.

The amount delivered on purchases made by the superintendents of the several coinage mints, in lots of less than 10,000 ounces, was 3,547,300.64 fine ounces, costing \$2,990,493.57.

Silver contained in gold deposits, bar charges, and fractions, amounting to 184,646.13 fine ounces, costing \$160,335.59, was also purchased.

The aggregate amount of silver purchased in the manner above stated during the year was 54,008,162.60 fine ounces, costing \$45,531,374.53. The average cost per fine ounce was \$0.843, at which rate the bullion

value of the silver dollar is 65.3 cents.

From July 1 to November 1, 1893, the date of the repeal of the purchasing clause of the act of July 14, 1890, the purchases amounted to 11,917,658.78 fine ounces, costing \$8,715,521.32.

The total amount of silver purchased under the act of July 14, 1890, from August 13, 1890, the date the act went into effect, to November 1, 1893, the date of the repeal of the purchasing clause, aggregates 168,674,682.53 fine ounces, costing \$155,931,002.25, the coining value of the same in silver dollars being \$218,084,438. Of this amount there has been used in the coinage of 36,087,285 silver dollars 27,911,259.49 fine ounces, costing \$29,110,186.61.

The amount wasted by the operative officers of the mints, and sold in sweeps, was 63,570.37 fine ounces, costing \$62,535.64, leaving a balance on hand at the coinage mints of 140,699,852.67 fine ounces, costing \$126,758,280, the coining value of the same in silver dollars being \$181,914,961.

The quantity and cost of silver purchased during the fiscal year, and from July 1 to November 1, 1893, at each of the coinage mints is shown in the following tables:

Deliveries on Purchases of Silver under Act of July 14, 1890, Fiscal Year 1893.

From 1873 until the repeal of the purchasing clause of the act of July 14, 1890, the Government of the United States had been a large purchaser of silver bullion.

The amount purchased, the cost thereof, the average price paid, and the acts of Congress under which the purchases were made are shown in the following statement:

• Act authorizing.	Fine ounces.	Cost.	Average cost per ounce.
February 12, 1873	5, 434, 282	\$7, 152, 564	\$1.314

COURSE OF SILVER.

The opening quotations for silver July 1, 1892, both in the London and New York markets, were the highest during the fiscal year.

The London quotation for silver (0.925 fine) was 40_{15}^{2} pence, equal to \$0.8809 per ounce fine. The New York price at the same date was \$0.88\frac{3}{2}\$ per ounce fine.

From July 1, 1892, to June 26, 1893, the decline in the price was \$0.05\frac{3}{4} against a decline of about \$0.24 per ounce during the previous fiscal year.

The lowest price reached between July 1, 1892, and June 26, 1893,

was $37\frac{9}{16}$ pence, equal to \$0.823 per ounce fine.

From the 23d to the 30th of June, 1893, the decline was rapid. On the 24th of June, 1893, rumors became current in London and New York that India contemplated closing her mints to silver. At this date the quotation in London was 37½ pence and in New York \$0.82.

On the 26th of June it was definitely announced that the legislative council of India had passed a bill closing her mints to the deposit of

silver by individuals for coinage.

The quotation on that day in London was 36 pence, equal to \$0.784

per ounce fine and in New York \$0.780.

A rapid-decline took place daily until, on the 30th of June, the price in London reached 30½ pence, equal to \$0.664 per ounce fine, and in New York the price was quoted at from 67 to 65 cents.

The average price of silver during the fiscal year in London was

38\frac{3}{8} pence, equal to \$0.841 per ounce fine.

At the highest price of silver the bullion value of the silver dollar was \$0.653, at the lowest price, \$0.515, and at the average price, \$0.650.

On July 1, 1893, the price advanced very suddenly to 33½ pence, reaching, on July 5, 34¾ pence, from which point it declined, closing, on July 31, at 32½ pence.

Notwithstanding the fact that India had closed her mints to silver, there was a large demand for shipment to that country, as well as to China, in August.

The price advanced from $32\frac{1}{2}$ pence to $34\frac{7}{8}$ pence, closing at $34\frac{1}{2}$ pence. In September the demand for shipment to India and China continued, and the price, with slight fluctuations, ranged from 34 to 34½ pence, closing at 344 pence.

In October, the demand for both India and China having fallen off, and the repeal of the act of July 14, 1890, by Congress, being anticipated,

the rate declined from 34½ to 31½ pence, on the 31st.

In November, the price ranged from 31½ to 32¾ pence, and at the pres-

ent date, November 29, is 32 pence.

The average London price for the four months ending October 31, 1893, was $33\frac{11}{16}$ pence, equal to \$0.7383. The average New York price for the same time was \$0.7350.

BRIEF REVIEW OF THE COURSE OF SILVER FROM 1848 TO 1893, INCLUSIVE, AND OF THE CAUSES OF ITS DEPRECIATION SINCE 1872.

During the calendar year 1848 the average price of silver in the London market was $59\frac{3}{4}d$. per ounce for silver 0.925 fine (British standard), equivalent in United States money to \$1.3098 per ounce 1.000 fine.

The price from this time gradually advanced until 1859, when it

reached an average for the year of $62\frac{1}{16}d$.

The advance in the price between 1850 and 1859 was due to the very large increase in the production of gold in California and Australia, which added to the world's supply of that metal without any material increase in the supply of silver. The advance in the price was also greatly stimulated by the large loans made in silver to India for public improvements and for expenses incidental to the suppression of the Sepoy mutiny of 1857.

Between 1860 and 1866 a decline took place, the yearly average price ranging from $61\frac{1}{16}d$. to $61\frac{1}{8}d$. The latter figure was maintained until after the close of the civil war in the United States, by reason of the limited supply of, and the increased demand for, silver. Cotton was at this time cultivated very extensively in India, because of the small quantity of it obtainable from the United States, and large amounts of silver were required for shipment to that country to pay for it.

The variation in the average yearly price, from 1867 to 1872, was only $\frac{1}{16}d$. The average price of silver in 1873 was $59\frac{1}{4}d$, equal to \$1.29883. Since that time the yearly average decline has been steady, with only four exceptions. The average price for the month of October, 1893, was 33.608d, equal to \$0.73672, a decline, in a period of a little over

twenty years, of \$0.56211 per ounce.

The causes of this great decline, stated briefly, are as follows:

First. Germany, in 1871 and 1873, enacted laws demonetizing silver, making gold the sole standard of value, and calling in all silver coins previously issued and circulated in the several states of the German

Empire.

To procure the gold necessary for the purposes of coinage, Germany sold, between 1873 and 1879, large amounts of silver from her store of melted silver coins, including the amount received from France in payment of the indemnity imposed upon her at the close of the Franco-Prussian war.

The effect of this legislation was to create a demand for gold in Germany and to increase the supply of silver bullion, or melted coins, in other countries, and to cause a depreciation in the price of the white

metal.

Second. In 1872, Norway, Sweden, and Denmark entered into a monetary treaty demonetizing silver, which was formally ratified by Sweden and Denmark in 1873 and by Norway in 1875. By this treaty they adopted the single gold standard and made silver a subsidiary metal, to be coined on Government account only, for change purposes.

Third. Holland, which had been on a silver basis since 1847, practically followed the example of Germany in 1875, for although in that year it nominally adopted the double standard at the ratio of 1 to $15\frac{5}{11}$, it, as a matter of fact, prohibited the coinage of silver, thus becoming,

like Germany, gold monometallic.

Fourth. The price having fallen to a point at which it becomes profitable for brokers to purchase silver in Germany and ship it to the states comprising the Latin Union for conversion into 5-franc pieces, the parties to that monetary treaty decided, in 1874, to limit the amount of 5-franc pieces to be coined by each. This, however, did not have the effect to steady the price, and in 1878 the mints of the Latin Union were closed to the coinage of full legal-tender silver coins, and have remained so ever since.

Fifth. In September, 1876, Russia suspended the coinage of silver except as to such an amount as might be required for trade purposes

with Unina

Notwithstanding the fact that the silver standard legally prevailed in Austria-Hungary until 1892, the free coinage of silver has been suspended in that country since 1879. In 1892 it formally adopted the single gold standard.

By the act of 1873 the coinage of full legal-tender silver was tacitly prohibited in the United States and gold made the sole standard of value, but as we were then on a paper basis, the price of silver can not be

said to have been appreciably affected by that act, especially as it provided for the receipt of silver from individuals for coinage into trade dollars, and the further fact that large purchases of silver were made for the subsidary silver coinage under the acts of 1873 and 1875, to replace the fractional paper currency which had been used for change

purposes since 1862.

The act of February 28, 1878, authorized the coinage of silver dollars of the weight of 412½ grains, as provided for by the act of January 18, 1837, and which were a full legal tender. Under the act of 1837 the coinage was free to individuals, but the act of 1878 provided for the coinage of full legal-tender silver dollars on Government account It also provided for the purchase for this coinage of not less than \$2,000,000, nor more than \$4,000,000 worth of bullion each month, at. the market price. But notwithstanding the magnitude of the purchase of silver required to be made under the act of 1878 the decline in price

Further legislation by the United States, still more favorable to silver, was enacted by the act of July 14, 1890, which provided for the purchase of 54,000,000 ounces annually, the estimated production of our domestic-The effect of this act was to cause a temporary advance in the price of silver, but the high price could not be maintained owing to the largely increased output by the silver-producing countries of the world, and the price commenced to decline in September, 1890, and continued to do so.

Sixth. On the 26th of June, 1893, the Legislative Council of India passed a bill closing her mints to silver coinage for individuals, and her action has been followed in the United States by the repeal of the purchasing clause of the act of July 14, 1890.

The present price of silver in the London market is 324d. for silver .925 fine, equivalent in United States money to \$0.70 $\frac{7}{10}$ for silver 1,000

fine.

Seventh. The great increase in the production of the metal. the world's production of silver was estimated to be \$81,800,000, and in 1892 at \$196,605,000—an increase in the annual supply, in twenty years, of over 140 per cent.

Considering the enormously increased production of silver and the decreasing demand for it for coinage purposes, it would be a matter of

surprise if the price had not very greatly declined.

The increase of the production has had more to do with the depreciation of silver than has its demonetization by some countries and the suspension of its coinage by others. .

As Prof. Lexis says:

Undoubtedly the suspension of the coinage of silver in several of the most important civilized states, together with the German and Scandinavian sales, contributed materially to the depression of the price of that metal. It would not, however, have lost much of its former value if its annual production had continued at the same figure as at the beginning of the fifth decade of this century. It still found in India and China so great an outlet as a money metal that an overloading of the European market with it could not, on the supposition just made, have taken

During no former period had so much silver been employed, even approximately, every year, in coinage or used in some other way (especially as a deposit against paper money) for monetary purposes, as there has been in the present. Leaving Mexico and the South American States entirely out of consideration, there were coined in Europe, the United States, and India, in the years 1851 to 1860, an annual average (at the old ratio) of \$38,794,000. During the decade 1861-1870, when the production of silver in the west of the United States began to be developed; and when the cotton famine enormously increased the payments due to India on account of international trade, this annual average coinage amounted to \$80,020,000. But

even this figure, which up to that period had never been reached, is exceeded by the average amount of coinage (Mexico and South America not included) in the years 1887 to 1891, when the price of silver had fallen as low as $43\frac{1}{2}d$ in London. average coinage of those years amounted to no less than \$113,000,000 (at the old ratio of value), and this sum does not include the storage of silver bullion by the United States.

The known aggregate coinage of silver during the sixteen years, 1876-1891—that is, during the period of the greatest depreciation of the metal-amounted to \$2,110,-From this we must deduct \$71,000,000, which were recoined from old coins into German and Scandinavian divisional coins, but this amount is offset by the monetary silver bullion stock of the United States created under the law of July

14, 1890.

Moreover, this sum embraces about \$950,000,000 of Mexican piasters, one-half of which may have served as coinage material. The remainder went to China, or may be considered the equivalent of the bar silver exported to China, and which serves monetary purposes. The net silver coinages, therefore, of this metal would have to the neutral purposes. The net stiver contages, therefore, of this metal would have to be put at at least \$1,560,000,000. On the other hand, the production of silver during the same period, according to Soctbeer, amounted to \$2,109,394,000. Thus the net coinage was fully 74 per cent of the production, while the gross amount of coinage shows that a quantity of silver as large or even larger than that of the silver newly produced passed through the mints.

The coinage of silver, it is true, has been suspended in France. It can no longer be turned, for the convenience of holders, into 5-franc pieces, but in lien thereof it has found a place in the currency of the United States to the amount anually of \$70,000,000—a sum six times as great as the average annual coinage of France during the time of silver's supremous.

the time of silver's supremacy.

The heavy sales of silver by Germany ceased fourteen years ago. The past coinages of the states that stamped 5-franc silver pieces have been more than counterbalanced by the coinages and storage of silver by the United States. And still another cause of the depreciation which the English silver commission of 1876 called attento, viz, the decrease of the silver exports to India, has not been operative of late years. These facts make it evident that the great cause of the depreciation of silver of late years has been its increased production.

DISTRIBUTION OF SILVER DOLLARS.

The number of silver dollars distributed from the mints during the fiscal year ended June 30, 1893, was 6,811,629, against a distribution of 9,407,920 for the preceding fiscal year, showing a decrease in the distribution of these pieces of 2,596,291.

The following table exhibits the number of silver dollars on hand, the coinage, and the distribution from each mint at the dates named:

Dates.	Philadelphia.	San Fran- cisco.	New Orleans.	Carson.	Total.
In mints July 1, 1892	50, 083, 000	36, 301, 366	9, 701, 300	4, 126, 636	100, 212, 302

Total	51, 439, 715	37, 001, 366	11, 621, 300	5, 493, 636	105, 556, 017
	50, 447, 000	35, 813, 683	7, 085, 250	5, 398, 455	98, 744, 388
Distributed from mints	992, 715	1, 187, 683	4, 536, 050	95, 181	6, 811, 629

CIRCULATION OF SILVER DOLLARS.

The following table exhibits the total number of silver dollars coined, the number held by the Treasury for the redemption of certificates, the number held in excess of outstanding certificates, and the number in circulation on November 1 of each of last eight years:

^{*}Prof. Lexis' estimate of the net coinage of silver during the years 1876-1891 is probably too large. He does not make sufficient allowance for recoinages during that period. This, however, does not materially impair the validity of his argument.

COINAGE, OWNERSHIP, AND CIRCULATION OF SILVER DOLLARS.

SUBSIDIARY SILVER COINAGE.

During the fiscal year ended June 30, 1893, the coinage of subsidiary silver aggregated 28,947,461 pieces, of the nominal value of \$7,217,220.90: consisting of \$,3266,630 in half-dollars; \$2,848,618 in quarter-dollars, and \$1,101,972.90 in dimes. Of this coinage \$607.75 were manufactured from purchased bullion, and \$7,216,613.15 from worn and uncurrent silver coin transferred from the Treasury for recoinage.

Worn and uncurrent silver coin of the nominal value of \$7,618,198.25 was transferred from the Treasury to the mints for recoinage. These coins, upon melting, were found to contain 5,940,544.90 ounces of standard silver, the coining thereof in subsidiary silver coins being \$7,381,289.58, showing a loss of \$236,908.67, which sum was reimbursed the Treasury from the appropriation for loss on recoinage of worn and uncurrent silver coin.

The amount and cost of silver on hand July 1, 1892, available for the subsidiary silver coinage, the amount obtained, and the amount used during the year, and the balance on hand at the close thereof, are shown in the following table:

SEIGNIORAGE ON SILVER COINAGE.

The balance of profits on the coinage of silver on hand at the mints at the commencement of the fiscal year, July 1, 1892, was \$70,964.25. The seigniorage on the coinage of silver dollars during the year amounted to \$1,559,297.36, and on subsidiary coinage \$65.05, a total of \$1,559,362.41. From the seigniorage there were paid during the year for expenses of distributing silver coin \$24,382.12, and for reimbursements of silver wasted by the operative officers and for bullion sold in sweeps, \$8,075.05, leaving the net profits on the coinage of silver for the year, \$1,526,905.24. Of this sum \$1,396,109.87 was deposited in the Treasury during the year. The balance of profits on the coinage of silver on hand at the mints June 30, 1893, was \$201,759.62.

Including the balance on hand at the mints July 1, 1878, the net profits on account of the coinage of silver from that date to November 1, 1893, paid into the Treasury of the United States, aggregates

\$74,262,970.99.

The total seigniorage on the coinage of silver under the act of July 14, 1890, from August 13, 1890, to November 1, 1893, was \$6,977,098.39. Of this amount \$78,447.12 was paid for expenses of distributing silver coins, and \$60,849.92 to reimburse the bullion fund for wastage of the operative officers of the mints and for bullion sold in sweepings, and the balance paid into the Treasury.

A table will be found in the Appendix exhibiting the seigniorage on the silver coinage during the fiscal year at each mint, and the disposi-

tion of the same.

MINOR COINAGE.

Minor coins aggregating 60,707,430 pieces of the nominal value of \$1,086,102.90 were manufactured during the year at the mint at Philadelphia, as follows:

MINOR COINAGE, 1893.

Denominations.	Pieces.	Value.
Five-cent nickels		\$598, 785. 75 487, 317. 15
Total	60, 707, 430	1, 086, 102. 90

The amount and cost of blanks purchased for minor coinage during the year was as follows:

Blanks purchased.	Pounds avoir- dupois.	Cost.
Five-cent nickel blanks	161, 500	\$51, 583. 10
One-cent bronze blanks	264, 000	52, 641. 60
Total	425, 500	104, 224. 70
	. 1 . 1	

The balance of minor coinage metal, resulting from the melting of uncurrent minor coins on hand at the commencement of the year and the balance on hand June 30, 1893, is set forth in the following table:

MINOR COINS FOR RECOINAGE, FISCAL YEAR 1893, PHILADELPHIA MINT.

Balance on hand July 1, 1892	
Balance uncoined June 30, 1893	720. 03

The denominations and value of minor coins transferred from the Treasury of the United States to the mint at Philadelphia during the year is shown by the following table:

MINOR COINS FOR REISSUE, FISCAL YEAR 1893, PHILADELPHIA MINT.

Received during the year on transfer orders:		
One-cent bronze coin	\$49,780	•
Five-cent nickel coin	49,500	
Reissued during the year:		\$99, 280
One-cent bronze coin	49, 780	
Five cent nickel coin	49, 500	
•		99, 2 80

The following table exhibits the distribution of minor coins during the fiscal year 1893:

MINOR COINS DISTRIBUTED FROM THE MINT AT PHILADELPHIA DURING THE FISCAL YEAR 1893.

State or Territory.	5-cent nickel.	1-cent bronze.	State or Territory.	5-cent nickel.	1 cent bronze.
Alabama	2,400	1,160	Nebraska	10, 865	5, 475
Arizona	330		New Hampshire	5, 955	5, 100
Arkansas	1,960	200	New Jersey	24,830	24,630
California	3, 150	520	New Mexico	540	- 40
Colorado	8, 190	1;435	New York	93, 820	79, 940
Connecticut	10, 735	9,085	North Carolina	3, 460	2,080
Delaware	50	550	North Dakota	1, 715	1, 235.
District of Columbia.	1,790	480	Ohio	30, 635	23,905
Florida	3,550	510	Oklahoma	200	20
Georgia	1,130	2,170	Oregon	2, 190	420
Idaho	320	20	Pennsylvania	31, 330	33, 735
Illinois	71,740	55, 730	Rhode Island	3, 200	8, 800
Indian Territory	580	20	South Carolina	1, 515	1, 220
Indiana	19, 574	15, 245	South Dakota	3, 340	1,500
Iowa	18,607	12, 795	Tennessee	2, 405	3, 737
Kansas	13, 145	8, 275	Texas	17,965	1, 190
Kentucky	25, 655	3, 460	Utah	1,750	20
Louisiana	2, 750	50	Vermont	1,700	2, 460
Maine	2, 560	4, 530	Virginia	2, 090	2, 350
Maryland	2,630	2, 110	Washington	4, 170	780
Masaachusetts	20, 950	42, 980	West Virginia	3, 670	2, 685
Michigan	17, 925	16, 240	Wisconsin	20, 920	16,745
Minnesota	15,215	10, 755	Wyoming	940	
Mississippi	635	325	Total	535, 136	413, 322
Missouri	16,320	6, 610		555, 150	710,022
Montana	4, 040				

From the foregoing it appears that the demand for minor coins came from every State and Territory in the Union with the exception of two, Nevada and Alaska:

APPROPRIATIONS AND EXPENDITURES.

The specific appropriations for the support of the mints and assay offices of the United States for the fiscal year ended June 30, 1893, amounted to \$1,050,600, being \$29,250 less than for the fiscal year 1892.

The expenditures from these appropriations during the year aggregated \$1,020,590.30, leaving an unexpended balance of \$30,009.70. In addition there was expended from the general appropriations contained in "an act directing the purchase of silver bullion and the issue of Treasury notes thereon, and for other purposes," approved July 14, 1890, for the coinage and storage of silver bullion, the sum of \$70,480.45, of which \$20,003.66 were expended on account of the storage of silver bullion. There was also expended from the appropriation contained

in the act of July 14, 1890, the sum of \$924 for cablegrams of the daily

London price of silver.

The amounts expended from the specific appropriations for the support of the mints and assay offices, and from the general appropriations contained in the act of July 14, 1890, aggregated \$1,091,994.75, being \$14,544.04 less than the expenditures for the fiscal year 1892.

The following table exhibits the appropriations and expenditures of the respective mints and assay offices, exclusive of the sum of \$924 paid

for cablegrams, as previously stated:

APPROPRIATIONS AND EXPENDITURES, 1893.

The estimates of appropriations necessary for the support of the mint service for the fiscal year 1895, submitted for your consideration on September 4, 1893, amount to \$1,051,610, including the expenses of the Bureau of the Mint, and an item of \$13,000 for freight for the transfer of bullion and coin between the mints and assay offices, which is \$4,000 more than for the same item for the current fiscal year. The full amount asked for under this head will be required for the fiscal year 1895, by reason of the increased deposits of gold at the minor assay offices, and the further fact that should coinage operations not be resumed at the Carson City Mint, it will be necessary to transport the gold bullion deposited at that institution to the mint at San Francisco for conversion into coin.

EARNINGS AND EXPENSES OF THE REFINERIES OF THE COINAGE MINTS AND OF THE ASSAY OFFICE AT NEW YORK.

The charges collected for the operations of parting and refining bullion during the fiscal year 1893 aggregated \$164,638.11, exclusive of the amounts received from the sale of by-products, \$11,556.59, which is not applicable to the payment of parting and refining bullion, but is deposited and covered into the Treasury as a miscellaneous receipt.

The gross expenditures for the year on account of these operations amounted to \$185,909, showing an excess of expenditures over charges collected of \$21,271.33; deducting the amount, \$11,556.59, realized from the sale of by products, leaves the net excess of expenditures.

\$9,714.74.

The charges collected for, and the expenses of parting and refining bullion, during the fiscal year 1893, are exhibited in the accompanying table:

CHARGES COLLECTED AND EXPENDITURES FOR PARTING AND REFINING BULLION, 1893.

Institutions.	Charges collected.	Gross expenditures.	Net expenditures.
Mint at Philadelphia	\$19, 045. 67	\$26, 513. 29	\$26, 513. 29
Mint at San Francisco	29, 585. 36	44, 617. 21	43, 710. 12

Asssay office at New York	90, 483. 23	90, 888. 74	81, 865, 64
Total	164, 638. 11	185, 909. 44	174, 352. 85

EARNINGS AND EXPENDITURES OF THE MINTS AND ASSAY OFFICES.

The amount of charges collected and other earnings of the mints and assay offices during the fiscal year ended June 30, 1893, amounted in the aggregate to \$2,765,869.86, an increase of \$471,581.66 over the previous fiscal year. Of the earnings, \$164,638.11 were from charges collected for parting and refining bullion, while the amount derived from seignorage on the coinage of silver dollars was \$1,559,297.36, and the amount of profits on minor coinage \$971,782.93, the balance from various sources.

For the service of the mints and assay offices during the fiscal year ended June 30, 1893, the total expenditures, including all expenses of the mints and assay offices, and acid refineries, wastage of the operative officers, loss on sale of bullion contained in sweeps sold, expenses of distributing silver dollars, subsidiary silver and minor coins, aggregated \$1,344,005.07, being an excess of earnings over expenditures of \$1,421,864.79 for the fiscal year.

There will be found in the Appendix the usual tables showing in detail the earnings and expenditures classified under the proper head at each

institution embraced in the mint service.

CLASSIFIED STATEMENT OF EXPENDITURES.

The expenditures of the mints and assay offices and of the refinery, for supplies, salaries, and wages of workmen, during the fiscal year 1893, are shown in the following table:

IMPORTS AND EXPORTS OF THE PRECIOUS METALS.

Gold.—During the fiscal year 1893 foreign gold coins of the value of \$11,962,738 were imported into the United States. Of this amount \$5,398,240 came from France; \$4,748,440 from Australasia; \$890,018 from Cuba; \$478,811 from Germany; \$300,012 from Mexico; \$84,624 from Japan, and the remainder from various countries, principally from the West Indies and Central American States.

The value of our own gold coins returned was \$6,074,899. Of this amount \$4,356,700 came from Quebec and Ontario; \$537,518 from the West Indies; \$487,568 from Great Britain; \$229,590, from Venezuela; \$129,360 from China; \$115,152 from Mexico; \$107,672 from Colombia and the remainder from the Central American States and other countries.

Foreign gold bullion of the value of \$3,136,744 was imported; of which amount \$1,923,565 came from Mexico; \$325,972 from Colombia; \$292,835 from British Columbia; \$156,458 from Nicaragua; \$111,566 from Australasia, and \$111,351 from Honduras.

Foreign gold ores of the invoiced value of \$894,999 were imported

for reduction, all of which came from Mexico.

The following table shows that the total imports of gold into the United States for the fiscal year 1893 were \$22,069,380:

GOLD IMPORTS, 1893.

Items.	. Amount.
Foreign bullion.	
Foreign coin	11, 962, 738 894, 999
Total foreign gold	
United States coin	6, 074, 899
Total gold imports	22, 069, 380

The export of the United States gold coins was \$101,844,087. Of this amount \$37,895,500 were shipped to Germany; \$32,240,300 to France; \$21,204,700 to England; \$5,308,193 to Quebec and Ontario; \$1,818,579 to Venezuela; \$1,055,351 to Haiti; \$1,000,000 to the Netherlands, and the remainder to Mexico, the West Indies, Central and South America.

The shipments of our own coins for the year amounted to nearly

\$60,000,000 over those of last year.

The export of domestic gold bullion was \$224,066, of which \$131,835 were exported to Quebec and Ontario and the remainder to England.

Foreign gold coins of the value of \$6,612,691 were reëxported. Of this amount \$6,401,464 went to Cuba; \$129,950 to England, and the

remainder to other countries.

The invoiced value of domestic gold ores exported was \$225,524. Of this amount \$145,980 were shipped to England and \$79,518 to Germany. Foreign gold ores of the invoiced value of \$16,607 were reëxported to England. Gold contained in silver-copper matte, of the value of \$43,680 was exported from the port of Baltimore.

The total gold exports for the year were \$108,960,655. The items of

the same will be found in the following table:

GOLD EXPORTS, 1893.

Items.	Amount.
United States bars.	\$131,835
Other domestic bullion	92, 231
Domestic coin	101, 844, 087
Gold contained in copper matte	43, 680
Domestic ores	225, 524
' Total domestic	102, 337, 357
Foreign coin reëxported	
Foreign ores reëxported	
Total foreign	6, 629, 298
Total gold exports	108, 966, 655

The movement of gold for the fiscal year 1893 shows an excess of exports over imports of \$86,897,275, while the excess for the fiscal year 1892 was \$142,654.

SILVER.—Foreign silver bullion of the commercial value of \$4,978,400 was imported during the year, the entire amount coming from

Mexico, Central and South American States.

Foreign silver coins of the value of \$17,615,663 were imported. Of this amount \$16,128,532 came from Mexico, and the remainder from the West Indies and Central and South America.

Silver in foreign ores of the invoiced value of \$11,100,747 were imported from Mexico into the United States for reduction. These silver-lead ores contained 59,426,588 pounds of lead valued at \$1,182,-911, and 422,322 pounds of copper valued at \$22,706.

United States silver coins (subsidiary pieces) of the value of \$599,189 were imported, of which \$551,383 came from the Provinces of

Quebec and Ontario.

STATEMENT SHOWING BY CUSTOMS DISTRICTS THE ESTIMATED QUANTITIES AND VALUES OF SILVER ORE IMPORTED INTO THE UNITED STATES DURING THE YEAR ENDED JUNE 30, 1893, WITH THE QUANTITIES AND VALUES OF GOLD, SILVER, LEAD, AND COPPER CONTAINED IN THE ORE AS FAR AS COULD BE ASCERTAINED.

FI 93----11

Puget Sound, Wash.....

^{*} No data obtainable.

Domestic silver bullion containing 27,857,294 ounces valued at \$23,464,746 were exported. Of this amount bars of the value of \$19,882,541 were shipped to England, \$1,859,200 to Japan, \$627,450 to Hongkong, \$520,000 to British India and East India, \$457,900 to France, and the remainder to China, Quebec, and Ontario.

There were 54,364,829 pounds of copper matte exported during the year containing 1,263,217 ounces of fine silver of the commercial value

of \$1,066,155.

The following letters from the collector of customs at Baltimore and the superintendent of the United States assay office at New York show the amount of silver exported in this copper matte from each of these ports to have been about equal.

OFFICE OF THE COLLECTOR OF CUSTOMS, Port of Baltimore, August 17, 1893.

Sir: In compliance with your letter of the 16th instant, I have the pleasure to transmit herein an abstract of the amount of gold and silver contained in silver copper matte exported from this port during the fiscal year ended June 30, 1893.

Very respectfully,

A. LINGENFELDER, Special Deputy Collector.

Hon. R. E. PRESTON,

Acting Director of the Mint,

Washington, D. C.

ABSTRACT OF "SILVER COPPER MATTE" EXPORTED FROM THE PORT OF BALTIMORE, MD., DURING THE FISCAL YEAR ENDED JUNE 30, 1893, CALCULATED ON A BASIS OF 50.5 PER CENT PURE COPPER, 35 OUNCES PURE SILVER, AND 0.14 OUNCE PURE GOLD PER TON.

Months.	Pounds of matte.	Tons of matte.	Pounds of pure cop- per.	Ounces of pure silver.	Ounces of pure gold.

United States Assay Office at New York, Superintendent's Office, September 23, 1893.

Sin: In response to your request for information with regard to the export of silver and gold, in copper matte, from New York during the fiscal year ended June 30, 1853, I am able to report that 24,178,829 pounds of argentiferous copper were exported, containing 734,962 ounces of silver.

The delay in answering your inquiry is due to the fact that the figures could not be obtained from the largest exporter until to-day.

Very respectfully,

Andrew Mason, Superintendent,

The DIRECTOR OF THE MINT, Treasury Department, Washington, D. C.

United States subsidiary silver coins of the value of \$94,508 were exported during the year, two thirds of which went to Quebec, Ontario, and British Columbia.

Foreign silver coins, principally Mexican dollars, reexported during

the same period were valued at \$17,178,065, of which \$7,809,151 were shipped to Hongkong, \$5,340,981 to England, \$2,291,780 to Japan, \$655,000 to British India and East Iudies, \$477,961 to West Indies, \$344,682 to Mexico, and the remainder to various countries.

Foreign ores containing silver of the value of \$144,338 were reexported. Of this amount \$80,613 went to Belgium and \$63,725 to England.

The following table shows the total export of silver for the fiscal year to have been \$11,947,812.

EXPORTS OF SILVER, 1893.

Items.	. Amount.
United States bars	\$67, 65
Other domestic bullion	23, 397, 09
Silver contained in copper matte	1, 066, 15
United States subsidiary silver coin	94,50
Total domestic	24, 625, 40
Foreign silver coin reëxported	
Silver in foreign ores reëxported	
Total foreign	17, 322, 40
Total silver exports	41, 947, 81

Comparing the tables of imports and exports of silver during the fiscal year 1893, it will be seen that the exports exceeded the imports by \$7,653,813, an increase over the fiscal year 1892, in the net exports, of \$2,617,985.

The following table shows the imports and exports of United States gold coin, from January 1, 1870, to October 1, 1893:

IMPORTS AND EXPORTS OF UNITED STATES GOLD COIN.

	1883	8, 112, 265	4, 802, 454	Total	126, 134, 493	571, 880, 660

There will be found in the Appendix tables, courteously compiled and furnished by the Chief of the Bureau of Statistics, exhibiting, in detail, the imports and exports of gold and silver for the fiscal year ended June 30, 1893.

There will also be found tables exhibiting the imports and exports of gold and silver for a series of years of the principal countries of the world.

MOVEMENT OF GOLD FROM THE UNITED STATES.

In the following tables, which have been carefully prepared by the superintendent of the United States assay office at New York, the exports of gold from that port to Europe during the fiscal year ended June 30, 1893, are presented in detail; also the exports during the four months from July 1 to October 31, 1892, as well as the return movement:

Estimated stock of coin July 1, 1893	519, 156, 102	, 496, 747, 573	1, 015, 903, 675

As has been stated in previous reports of the Director of the Mint, in determining the stock of gold coin in the United States the actual amount of gold coin in the Treasury and in national banks on June 30, 1872, and \$20,000,000 estimated at that date as the minimum amount in circulation in the States of the Pacific coast—a total of \$135,000,000—was taken as a basis.

Since that time the official estimates have been compiled by adding to the initial stock the coinage of the mints (not including recoinage) and the gain (or loss) by import or export as registered at the customhouses. An average annual allowance, however, of \$3,500,000 has been estimated as the amount of our gold coins used in the industrial arts.

The coinage of silver dollars since March 1, 1878, and the subsidiary silver coinage since 1878, at which date the estimated amount was \$5,000,000, together with the annual gain or loss by coinage or import—after an annual deduction of \$200,000 for use in the industrial arts—is taken as the estimated stock of silver coin in the United States.

The above table gives the total estimated stock of gold and silver coin in the United States on July 1, 1893, at \$1,015,903,675—gold \$519,156,102 and silver \$496,747,573. Of the silver coins, \$419,332,450 were in silver dollars and \$77,415,123 in subsidiary pieces.

The value of the gold and silver bullion belonging to the Government and stored in the mints and assay offices on July 1, 1893, was \$197,509,909, valued as follows:

BULLION IN MINTS AND ASSAY OFFICES JULY 1, 1893.

,	Metals.	 Value.
Gold		 \$78, 541, 583
Silver (cost)	••••	 118, 968, 326
Total	· · · · · · · · · · · · · · · · · · ·	 197, 509, 909

The stock of silver bullion on deposit with the Mercantile Safe Deposit Company in New York City, as reported on June 30, 1893 was, 217,292 fine ounces, the commercial value of which was \$145,585.

In answer to an inquiry from this Bureau, the superintendent of the United States assay office at New York reported the estimated stock of silver bullion outside of the Mercantile Safe Deposit Company and held by private parties to be 200,000 ounces. This is not considered in compiling the tables here given.

The stock of coin in the United States, the gold and silver bullion belonging to the Government, together with the silver held by the Mercantile Safe Deposit Company, constituted the total metallic stock

of the United States on July 1, 1893.

METATLLIC STOCK OF THE UNITED STATES JULY 1, 1893.

Coin and bullion.	Value.
Gold	\$597, 69 7 , 68 5
Silver (including bullion in mints and Mercantile Safe Deposit Company)	615, 861, 484
Total	1, 213, 559, 169

The estimated metallic stock on July 1, 1892, was \$664,275,335 gold and \$570,313,544 silver—a total of \$1,234,588,879. By comparing these amounts with those in the above table, it will be seen that the estimated stock of gold in the United States decreased \$66,577,650, while the estimated stock of silver increased \$45,547,940, showing a net loss of \$21,029,710 during the fiscal year ended June 30, 1893.

The following table gives the ownership of the stock of coin and gold and silver bullion in the United States on July 1, 1893:

OWNERSHIP OF GOLD AND SILVER IN THE UNITED STATES JULY 1, 1893.

			(D-4-1 1)

^{*}Includes \$4,285,000 gold clearing-house certificates. †Includes \$2,681,910 of their own notes held by different national banks.

The value of the gold and silver bullion in the mints and assay offices was as follows:

GOLD AND SILVER BULLION IN MINTS AND ASSAY OFFICES, NOVEMBER 1, 1893.

Metals.	Cost value.
Gold	\$96, 066; 855
Total	

The Mercantile Safe Deposit Company held in their vaults 155,313 ounces of fine silver bars, of the market value of \$108,331, at the close of business October 31, 1893. This amount added to the gold and silver bullion in the mints, and the stock of coin in the United States, gives, approximately, the total metallic stock, as follows:

METALLIC STOCK, NOVEMBER 1, 1893.

Coin and bullion.	Amount.
Gold	\$660, 805, 433 624, 129, 579
Total	1, 284, 935, 012

The amount of metallic and paper money in the United States and the location of the same is exhibited in the following table:

LOCATION OF THE MONEYS OF THE UNITED STATES, NOVEMBER 1, 1893.

 $[\]alpha$ Estimate Bureau of the Mint. b Information furnished through the United States representatives. σ Crédit Lyonnais.

In a paper read by the eminent economist and statistician Mr. A. de Foville, of the French ministry of finance, before the French Association for the Advancement of Science at Besançon, in September, he contends that France has a stock of full legal-tender silver "which may indeed slightly exceed two milliards of francs, but which can not reach two and a quarter milliards, still less two and a half." The amount of full legal-tender silver credited France in the table is the maximum which Mr. de Foville would concede to be even possible.

GOLD AND SILVER USED IN THE INDUSTRIAL ARTS.

For the purpose of ascertaining the amount of gold and silver used in the industrial arts and manufactures during the calendar year 1892, statements were obtained from the mints and assay offices of the United States and from private establishments showing the amount and value of gold and silver bars sold to manufacturers and jewelers for use in the arts, and as nearly as possible the material used in the manufacture of such bars. The quantity and value of gold and silver bars furnished to manufacturers and jewelers by the assay office of the United States at New York, during the calendar year 1892, is exhibited in the following table:

BARS FURNISHED FOR USE IN THE INDUSTRIAL ARTS BY THE UNITED STATES ASSAY
OFFICE AT NEW YORK DURING THE CALENDAR YEAR.

	Gol	d	Silver.		
Material used.	Fine ounces.	Value.	Fine ounces.	Value.	
Domestic bullion	389, 919. 621	\$8,060,354	4, 089, 090. 75	\$5, 286, 905	
United States coin	41.615	. 860	3, 784. 98	4,894	
Foreign material	37, 330, 331	771, 686	966, 320. 63	1, 249, 384	
Old plate, jewelry, etc	100, 454. 843	2, 076, 586	328, 746. 96	425, 047	
Total	527, 746. 410	10, 909, 486	5, 387, 943. 32	6, 966, 230	

The following table exhibits the quantity and value of gold and silver bars furnished by the mint at Philadelphia, during the calendar year 1892, for use in the industrial arts:

BARS FURNISHED FOR USE IN THE INDUSTRIAL ARTS BY THE UNITED STATES MINT AT PHILADELPHIA DURING THE CALENDAR YEAR.

	Gol	d.	Silver.		
Material used.	Fine ounces.	Value.	Fine ounces.	Coining value.	
Domestic ballion	63, 607, 552 1, 769 ≥ 676	\$1,314,885 36,582

4, 860, 712	858, 126	5, 718, 838 26, 276, 699
	\$10, 697, 679 458, 037 628, 525 4, 860, 712	\$10, 697, 679 \$7, 289, 073 458, 037 228, 446 628, 525 1, 256, 101

It will be observed that there was no material variation in the amount of gold and silver used in the industrial arts during the calendar years 1891 and 1892, the value of the gold in 1892 being \$16,616,408, against \$16,644,953 in 1891; of silver, \$9,106,540 (coining value) in 1892, as against \$9,631,746 in 1891.

Data relating to the weight and value of bars furnished for use in industry during the fiscal year 1893 were received from Government institutions only. They are summarized in the following tables:

BARS ISSUED FOR USE IN THE INDUSTRIAL ARTS BY THE UNITED STATES ASSAY OFFICE AT NEW YORK DURING THE FISCAL YEAR ENDED JUNE 30, 1893.

The above table shows the value of the gold bars manufactured by Government institutions to have been \$12,996,491; an increase of \$1,132,918 over the amount manufactured during the fiscal year 1892.

The value of the silver bars manufactured was \$7,443,721; an increase

of \$1,024,786 over the previous year.

A table will be found in the Appendix showing the value and description of the gold and silver employed in the industrial arts in the United States for the years 1880-'92 inclusive.

The items for each year are given separately.

PRODUCT OF GOLD AND SILVER.

The detailed statistics of the product of gold and silver in the United States for the calendar year 1892 were presented in a special report to Congress on that subject, according to which they were as follows:

PRODUCT OF MINES OF THE UNITED STATES, 1892.

•	Metals.	 Fine ounces.	Value.
Gold			
Silver	• • • • • • • • • • • • • • • • • • • •	 58, 004, 289	*74, 995, 442
Total		 59, 601, 387	108, 010, 423

^{*}Coining value. The commercial value was \$50,753,752,

The distribution of the product of our own mines among producing States and Territories was approximately as follows:

APPROXIMATE DISTRIBUTION BY PRODUCING STATES AND TERRITORIES OF THE PRODUCT OF GOLD AND SILVER IN THE UNITED STATES FOR THE CALENDAR YEAR 1892, AS ESTIMATED BY THE DIRECTOR OF THE MINT.

	Ciu	ld.	. Silv	er.	
State or Territory.	Fine onnces.	Value.	Fine ounces.	Coining value.	Total value.

In the Appendix will be found a table showing the annual product of gold and silver from the mines of the United States since 1792.

WORLD'S COINAGE.

In the Appendix will be found a table, revised from the latest information received, exhibiting the coinages of the various countries of the world during the calendar years 1890, 1891, and 1892.

The following is a summary of the same:

Calendar years.	Gold.	Silver.
1890 1891 1892	. 119, 534, 122	\$152, 293, 144 138, 294, 367 143, 096, 239

The above figures represent, as nearly as this bureau has been able to ascertain, the total value of the gold and silver coinages executed in the world during the years therein named.

It must be borne in mind, however, that the total of these coinages does not correctly represent the amount of new gold and new silver made into coins during the year, for the reason that the coinages as reported include the value of domestic and foreign coins melted for recoinage, as well as old material, plate, etc., used in coinage.

In the circular letter of inquiry prepared at this Bureau and sent to foreign governments through the Department of State, asking for information on these subjects, it was especially requested that each country report the amount of such recoinages. This has been done in many instances, but not in all.

A summary of the world's production of gold and silver for the years 1890-'92 will be found in the following table:

WORLD'S PRODUCTION OF THE PRECIOUS METALS.

Calendar years.	Gold. Sil	lver.
1891		234, 500 446, 800 458, 800

A table compiled from information furnished by foreign governments through our diplomatic representatives and revised from the latest data, exhibiting the weight and value of the gold and sliver product of the principal countries of the world for the calendar years 1890, 1891, and 1892, will be found in the Appendix.

For the sake of uniformity the value of silver has, as heretofore, been calculated at its coining rate, viz, \$1.2929+ per fine ounce.

FI 93----12

The following table exhibits the estimated product of the precious metals in the world for each calendar year since 1873:

Production of Gold and Silver in the World for the Calendar Years 1873-1892.

		Silver.			
Calendar years.	Gold.	Fine ounces (troy).	Commercial value.	Coining value.	
1873	\$96, 200, 000	63, 267, 000	\$82, 120, 000	\$81, 800, 000	
1874	90, 750, 000	55, 300, 000	70, 673, 000	71, 500, 000	
1875	97, 500, 000	62, 262, 000	77, 578, 000	80, 500, 000

1882	102, 000, 000	86, 470, 000	98, 230, 000	111, 800, 000	
1883	95, 400, 000	89, 177, 000	98, 986, 000	115, 300, 000	
1884	101, 700, 000	81, 597, 000	90, 817, 000	105, 500, 000	
1885	108, 400, 000	91,652,000	97, 564, 000	118, 500, 000	
1886	106, 000, 000	93, 276, 000	92, 772, 000	120, 600, 000	
1887	105, 775, 000	96, 124, 000	94, 031, 000	124, 281, 000	
1888	110, 197, 000	108, 827, 000	102, 283, 000	140, 706, 000	
1889	123, 489, 000	125, 420, 000	117, 268, 000	162, 159, 000	
1890	118, 848, 700	133, 212, 600	139, 873, 200	172, 234, 500	
1891	126, 183, 500	144, 204, 900	142, 618, 700	186, 446, 800	
1892	138, 861, 000	151, 948, 600	132, 955, 000	196, 458, 800	

The silver product is given at its commercial value, reckoned at the average market price of silver each year, as well as its coining value in United States dollars.

In the Appendix will be found a table showing the production of gold and silver in the world for the calendar years 1792-1892.

WORLD'S RECOINAGES.

The following table compiled from official sources, exhibits, approximatively the recoinages of gold and silver of the principal countries of the world from 1873 to 1892, inclusive.

RECOINAGE OF THE PRINCIPAL COUNTRIES OF THE WORLD FROM 1873 TO 1892.

Countries.	Gold.	Silver.
United States	\$229, 240, 287	\$39, 949, 018
Mexico		872,655
Great Britain	180, 559, 471	27, 672, 364
Australasia	3, 603, 927	
India		36, 805, 815
France	18, 091, 092	6, 678, 502
Italy		22, 878, 405
Switzerland	16,984	3, 125, 442
Spain	103, 775, 462	33, 731, 318
Portugal	592, 461	2, 186, 793
Netherlands		3, 053, 246
Germany	70, 822, 097	96, 020, 493
Austria-Hungary	12, 300, 684	16, 480, 684
Norway		857, 662
Sweden	64, 645	1, 920, 498
Denmark :	1,381	4, 955, 507
Russia		7, 173, 077
Turkey		2, 271, 126
Japan	2, 713, 989	2, 189, 429
Central and South America		1, 653, 872
Belgium	16, 054, 213	2, 437, 168
All other countries	4, 818, 092	13, 088, 492
Total		326, 001, 566

In the Appendix will be found a table explanatory of that given above.

VALUE OF FOREIGN COINS.

The law requires:

That the value of foreign coins as expressed in the money of account of the United States shall be that of the pure metal of such coin of standard value; and the values of the standard coins in circulation of the various nations of the world shall be estimated quarterly by the Director of the Mint and be proclaimed by the Secretary of the Treasury immediately after the passage of this act and thereafter quarterly on the 1st day of January, April, July, and October in each year.

In accordance with the above requirement, the values of foreign coins have been estimated and proclaimed as follows:

VALUES OF FOREIGN COINS, JANUARY 1, 1893.

In the Appendix a table will be found exhibiting the changes in the estimates of the values of foreign coins, from January 1, 1880, to October 1, 1893.

WORK OF THE ASSAY OFFICE OF THE BUREAU OF THE MINT.

During the calendar year 1892 there were tested by the assayer of this Bureau 356 gold coins and 777 silver coins, all of which were found to be within the legal requirements in regard to weight and

Of the gold coins examined, 43.5 per cent were of exact standard fineness. The greatest deviation above was 0.9007, and below 0.8993. The average was 0.89994, while the legal limit of tolerance was 0.001.

^{*} Gold the nominal standard. Silver practically the standard.
† Coined since January 1, 1886. Old half-imperial == \$3.98,6.
‡ Silver the nominal standard. Paper the actual currency, the depreciation of which is measured by the gold standard.

Of the silver coins examined 24.7 per cent were found to be standard. Four pieces assayed 0.9022, and one piece as low as 0.8983. The average fineness of the silver pieces was 0.90001, the legal limit of tolerance

being 0.003.

Tables will be found in the Appendix showing the number and fineness of the coins received for assay from each mint during the year, the average fineness of the coinage of each mint, and the average fineness of all the coins examined during the year by the assayer of the Bureau, and the annual assay commission.

The differences constantly arising between the assays of shipments of bullion to the mint and Philadelphia and those of the assay offices of the United States, from which the shipments came, necessitated, during the year, a large number of special bullion assays, and an examination of the causes of such differences. They could, in every instance, be traced to one of two sources: impure proof gold or

improper methods of conducting the assay.

To remedy this, it is proposed to establish in the miuts and assay offices a uniform method of assaying gold and silver bullion, which they will be required to adopt. At present each assay office and mint makes its own "proof," or pure gold. An examination of the "proofs" used in the various institutions has shown, in some cases, impurities to the amount of .0002. While this is a very small error, it can be avoided, by having a uniform proof made under the supervision of this Bureau, which will be furnished to the various justitutions upon demand. Steps are now being taken to accomplish this.

During the year a number of counterfeit coins were assayed at the

request of the Chief of the Secret Service.

ANNUAL TRIAL OF COINS.

The following Commissioners were appointed by the President, under the provisions of section 3547 of the Revised Statutes, to test the weight and fineness of the gold and silver coins of the coinage of the calendar year 1892: Hon. R. A. Pierce, Committee on Coinage, Weights, and Measures, House of Representatives; Prof. E. B. Andrews, Rhode Island; George Wilson, New York; Dr. P. B. Wilson, Maryland; W. F. James, Utah; Thomas Dolan, Pennsylvania; Israel Lawton, California; John G. Deshler, Ohio; Cabell Whitehead, Virginia; S. M. Hay, Wisconsin; J. W. Cunningham. Idaho; Andrew P. Wiswell, Maine; D. N. Foster, Indiana; A. M. Jones, Illinois; John G. Long, Florida; Horace Rublee, Wisconsin.

The Commission met in Philadelphia on February 8, 1893, with the exception of Hon. R. A. Pierce, George Wilson, and Thomas Dolan, all of the Commissioners appointed being present, together with the following ex officio Commissioners: Hon. William Butler, United States judge for the eastern district of Pennsylvania, and Herbert G. Torrey, assayer of the United States assay office at New York. Hon. A. B. Hepburn, Comptroller of the Currency, also an ex officio member of the Commission

was unavoidably absent.

The committee on counting reported:

The packages containing the pieces reserved by the several mints for the trial of coins, in accordance with section 3539, Revised Statutes, were delivered to us by the superintendent of the mint at Philadelphia.

The number of coins corresponded with the record kept by the Director of the Mint

of all transcripts sent him by the several superintendents.

The coins reserved were as follows:

Mints.	Pieces.	Value.
GOLD.	·	
Philadelphia	1, 590	\$12, 122, 50
San Francisco	1,347	21, 295, 00
Carson		1, 435, 00.
New Orleans	.40	350.00
Total	3, 131	35, 202, 50
SILVER.		
Philadelphia. San Francisco	11,654	2, 631. 90
San Francisco	2, 094	1, 027. 85
Carson,	676	676.00
New Orleans	4,809	1, 992. 60
Total		6, 328. 35
Total pieces and value	22, 364	41, 530. 85

The committee on assaying reported:

In compliance with section 3547 of the Revised Statutes, we have taken samples of the coins reserved from time to time at the United States mints at Philadelphia, San Francisco, Carson, and New Orleans, for assay.

These samples represent the various deliveries made by the coiners to the superintendents of the several mints during the calendar year 1892.

The result of the assays made of the individual coins, and of the same in mass, are given in the following schedules.

From these it will be seen that the greatest excess in the assay value of the gold coinage above standard at the different mints (the limit of tolerance being one-thousandth) is at—

Philadelphia	900.2
San Francisco	900.3
New Orleans	900
Carson	
Oursea	000.0

The greatest deficiency below standard (the limit of tolerance being one-thousandth) is at-

Philadelphia	899.7
San Francisco	899.7
New Orleans	899.8
Carson	

The greatest excess in silver coins above standard (the limit of tolerance being three-thousandth) is at—

Philadelphia	900.7
San Francisco	901.1
New Orleans	901.6
Carson	

The greatest deficiency below standard (the limit of tolerance being three-thousandth) is at-

Philadelphia89	98.2
San Francisco	9.1
New Orleans 89	
Carson	

The assay committee also tested the quartation of silver and the lead used in the assay of gold bullion, and found them free from gold.

The acid used in the humid assay of silver was found to be free from silver and also from 'chlorine.

The balances used were also tested and found to be correct.

The committee therefore deem the assays exhibited in the accompanying schedules to be trustworthy.

The committee on weighing reported:

As a fair inference from the results shown, the committee on weighing pronounces the examination of the weights of the coinage of the several mints during the year 1892 to be satisfactory.

The result of the annual test is contained in the following resolution adopted by the Commission:

Resolved, That the assay commission having examined and tested the reserved coins of the several mints of the United States for the year 1892, and it appearing that these coins do not differ from the standard fineness and weight by a greater quantity than is allowed by law, the trial is considered, and hereby reported, satisfactory.

SUMMARY OF OPERATIONS OF MINTS AND ASSAY OFFICES.

The precious metals received at the mints and assay offices during the fiscal year 1893 were valued at \$135,943,272, against \$150,399,906 received in the previous year.

The operations of the melting and refining departments of the coinage mints and of the assay office at New York, so far as the value of the metals treated is concerned, are exhibited in the following table:

BULLION OPERATIONS OF THE MELTING DEPARTMENTS, 1893.

Metals.	Standard ounces.	Coining value.
GoldSilver	_,,	\$77, 640, 186 38, 869, 335
Total	37, 576, 494	116, 509, 521

The operations of the coining branches of the mints in the manufacture of finished coins from ingots prepared by the melting departments were, in value of the metals operated on, as follows:

BULLION OPERATIONS OF THE COINING DEPARTMENTS, 1893.

Metals.	Standard ounces.	Coining value.
Gold	3, 277, 371 20, 758, 389	\$60, 974, 344 24, 155, 216
Total	24, 035, 760	85, 129, 560

The work of the minor assay offices, which consisted in the receipt and assaying of deposits and the manufacture of unparted bars of gold and silver, was as follows:

OPERATIONS OF MINOR ASSAY OFFICES, 1893.

Metals.	Standard ounces.	Coining value.
Gold	239, 585	\$4, 457, 395
Silver	131, 667	153, 213
Total	371, 252	4, 610, 608

The following is a summary of the three preceding tables, intended to exhibit, as nearly as possible, the value of the precious metals treated in the operations of the mints and assay offices during the last fiscal year:

Bullion Operated upon in the Meliting and Coining Departments of all the Mints and Assay Offices, 1893.

Metals.	Standard ounces.	Coining value.
Gold	i ' '	\$143, 071, 925 63, 177, 764
Total		206, 249, 689

In quantity the precious metals operated upon in the different departments of the mints and assay offices during the fiscal year ended June 30, 1893, exceeded 264 tons of gold and 1,862 tons of silver.

The value of the precious metals wasted in the metallurgical and

mechanical operations was \$11,579.07.

In addition to operative wastage, a loss of \$13,203.76 was incurred from the sale of sweeps, equivalent to the difference between the value of the precious metals contained in sweeps recovered and the amount realized from the sale of sweeps too base to be treated advantageously in Government refineries.

There was a similar loss of \$282.86 by the sale of leady melts.

These wastages and losses aggregated \$25,065.69.

Against these losses there were gains arising from the operations on bullion as follows:

Character.	Amount.
Surplus bullion returned by operative officers	\$32, 240. 89
Precious metals recovered in grains and sweepings	6, 226. 49
for coinage	4, 548. 54
Total gains	43, 015. 92

Deducting the value of the total operative wastage and loss on sale of sweeps from the value of incidental gains of bullion, there was a net gain in the operations of the mints during the year of \$17,950.23.

The following table exhibits the relative cost of coinage executed at the mints during the fiscal year:

COST OF COINAGE AT EACH MINT, 1893.

Institutions.	Pieces coined.	Pieces coined exclusive of minor coins.	Expenses for salaries, wages, and incidentals.	Cost per piece, includ- ing minor coinage.	Cost per piece, excluding minor coinage.
Philadelphia	81, 967, 832	21, 260, 402	\$436, 171 00	\$0.00532+	\$0.0205+
San Francisco	4, 739, 188	4, 739, 188	249, 466. 37		. 0526
New Orleans	9, 046, 688	9, 046, 688	144, 741. 99		. 016—
Carson	1, 527, 167	1, 527, 167	108, 014. 85	,	.0707+
Total and average	97, 280, 875	36, 573, 445	938, 394. 21	.0096+	. 02566

The following table exhibits the percentage of finished coins produced from ingots operated upon during the fiscal year at the respective coinage mints, and, with the exception of the mint at New Orleans, shows an increased percentage of finished coin over that of the fiscal year 1892:

PERCENTAGE OF GOOD COIN PRODUCED FROM INGOTS OPERATED UPON, FOR THE FISCAL YEAR 1893.

Coinage mints.	Gold.	Silver.
Philadelphia	45. 3	54.8
San Francisco		48.1
New Orleans	39.8	48.6
Carson	53.4	55, 3

The following table shows the amount of gold and silver operated on, legal allowance, wastage, and per cent of loss of legal allowance, at the mints of the United States and the assay office at New York City, during the fiscal year ended June 30, 1893:

GOLD AND SILVER OPERATED ON, LEGAL ALLOWANCE, WASTAGE AND PER CENT OF LOSS OF LEGAL ALLOWANCE.

		Gold.				Silver

MINT AT PHILADELPHIA.

The value of gold and silver deposited at the mint at Philadelphia during the fiscal year ended June 30, 1893, aggregated \$68,137,377.08 against \$63,522,406.30 deposited the previous year, showing an increase of \$4,614,970.78.

United States gold coins of the face value of \$449,765, containing 24,052.537 standard ounces, of the coining value of \$447,489.06, and silver coins of the face value of \$5,239,608.20, were deposited and melted during the year.

Foreign gold coins of various denominations containing 65,455 standard ounces, of the coining value of \$1,217.77, and silver coins containing 200.55 standard ounces, of the value of \$233.37, were deposited during the year.

The quantity and value of both metals deposited are as follows:

Metals.	Standard ounces.	Value.
Gold	334, 507, 718 53, 207, 324, 57	\$6, 223, 399. 40 61, 913, 977. 68
Total	53, 541, 832, 288	68, 137, 377. 08

In addition, 425,500 pounds of minor coin blanks were received. The number of assays made during the year was, of gold 22,000 and of silver 35,000.

The quantity of precious metals operated upon in the metallurgical department was 725,771,663 ounces of standard gold and 10,972,625.24 ounces of standard silver.

The melter and refiner made during the year 86 gold ingot melts and 3,451 silver ingot melts. Of the former 3, and of the latter 28, were condemned. He also made 80 gold and 478 silver melts for bars.

The operations of the refinery were as follows:

REFINING OPERATIONS, 1893.

Bullion.	Gold.	Silver.
Gross weight Refined by acid, standard onnees by assay Returned from refinery	607, 375, 332 317, 511, 921	890, 522, 670

At the annual settlement June 30, 1893, the melter and refiner returned a surplus of 1.233 ounces of standard gold and 515.86 ounces of standard silver.

The coiner received and operated upon 685,467,230 ounces of standard gold, 10,487,590.61 ounces of standard silver, and 7,599,642.40 ounces of minor coinage metal.

The coinage executed during the year was 81,967,832 pieces of the

nominal value of \$13,474,903.90.

The following table shows the number of pieces and the value of each metal coined:

Description.		Number of pieces.	Value	
Gold	•	673, 414	\$5, 765, 420.00	
Silver	,	20, 586, 988	6, 623, 381, 00	
Minor		60, 707, 430	1, 086, 102, 90	
Total		81, 967, 832	13, 474, 903. 90	

The coiner's gold wastage was 26.829 standard ounces, or 7.82 per cent of the legal allowance; and his silver wastage 1,825.04 standard ounces, or 17.4 per cent of the legal allowance.

The percentage of good coin produced from ingots operated upon

was 45.3 of gold and 54.8 of silver.

The number of medals struck in the same department for the year was as follows:

MEDALS MANUFACTURED, 1893.

	Character.	*	Number
Gold	· · · · · · · · · · · · · · · · · · ·		85
Bronze			642
Aluminum	··········		46
Total			1,870

The annual settlement at the Philadelphia mint June 30, 1893, was superintended by Messrs. Cabell Whitehead and F. W. Braddock, of this Bureau, who reported having found all the money and bullion in unsealed vaults, with which the Superintendent was charged, on hand, and the seals on the sealed vaults, intact.

Needed improvements to the building and machinery of the Philadelphia mint were made during the last fiscal year. Two large steel vaults for the storage of silver bars have been constructed in the basement, having an average capacity of upwards of 30,000,000 ounces of silver.

These vaults flank the large silver-coin vault in the center of the basement throughout its entire length, and thus act as a protection to it. The third story addition upon the west side has been extended across the south slope of the inner roof, affording additional facilities for the operations of the assayer and melter and refiner, giving each well-appointed laboratories for experimental purposes. It gives also rooms for the clerks in charge of the storage of silver bars, and accommodations for the receiver and keeper of supplies. A fire-proof vault

has also been constructed on the same floor for the safe keeping of the books and records of silver bars stored.

Skylights were constructed in the roof of the cabinet that will render artificial lighting unnecessary, and will add much to its attractive-

In order to facilitate the striking of medals a powerful hydraulic press has been substituted for the old-fashioned and ponderous screw press, in use for many years.

New milling and new grinding machines were added to the machine

Two pairs of rolls for use in the coining department were purchased. The carpenter and plumber shops were fitted out with improved

Improvements were also made in the arrangement of shafting in the engine and rolling rooms, effecting a saving of power and a consequent

saving of fuel and wear and tear.

In September, 1893, it was discovered that gold bullion of the value of \$113,423.85 had, with criminal ingenuity, been abstracted from one of the vaults in the Philadelphia mint. Suspicious circumstances pointed to the weigh-clerk of that institution as the culprit. arrested, confessed his guilt, and gave information leading to the recovery of about \$90,000 of the stolen property. He was promptly indicted, tried, and convicted. The Government is not likely to lose anything from his crime.

MINT AT SAN FRANCISCO.

The deposits of gold and silver at the mint at San Francisco during the last fiscal year aggregated in value \$26,139,378, a decrease of \$8,900,597 as compared with the amount deposited during the fiscal vear 1892.

Foreign gold coins amounting to 264,103,210 standard ounces, of the

coining value of \$4,913,548.09, were deposited during the year. United States gold coins of the face value of \$26,233.50, containing 1,307.932 standard ounces, of the coining value of \$24,333.62, and silver coins of the face value of \$1,013,216.05 were deposited and melted for recoinage during the year.

The weight and value of the precious metals deposited during the

fiscal year were as follows:

° Metals.	Standard ounces.	Value.
Gold	1 ' '	\$20, 292, 293, 39 5, 847, 084, 96
Total	6, 115, 549, 410	26, 139, 378. 35

The melter and refiner received and operated upon bullion containing 2,231,166.923 ounces of standard gold, and 6,441,850.54 ounces of standard silver during the fiscal year. Of the above amount there was sent to the refinery proper to be parted and refined, bullion containing 196,230.645 ounces of standard gold and 666,490 ounces of standard

Fine silver bars were manufactured during the year of the coining value of \$2,735.02.

During the year the melter and refiner made 760 melts of gold ingots, and 1,372 melts of silver ingots. Of the former only two, and of the

latter three, were condemned.

At the annual settlement June 30, 1893, the melter and refiner returned a surplus of 711.418 ounces of standard gold, and sustained a loss of 949.28 ounces of standard silver in his operations during the year, being 9.82 per cent of the legal allowance.

The coiner received 2,375,768.560 ounces of standard gold, and

2,494,217.37 ounces of standard silver.

There was executed during the fiscal year a coinage of 4,739,188 pieces, of a nominal value of \$23,601,554.90, as shown by the following table:

COINAGE EXECUTED, FISCAL YEAR 1893.

Coinage.	Pieces.	Value.
Gold	1, 363, 000 700, 0 00 2, 676, 188	\$22, 317, 500. 00 700, 000. 00 584, 054. 90
Total	4, 739, 188	23, 601, 554. 90

It was found upon the settlement of the coiner's accounts of June 30, 1893, that his wastage was 117.726 ounces of standard gold, and 196.04 ounces of standard silver.

The entire gold wastage and a portion of the silver wastage was covered by the quantity of gold and silver recovered from the burning of a carpet which had been on the adjusting room floor for seven years, and by which 237.360 ounces of standard gold, and 28.10 ounces of standard silver were recovered. The value of the gold so recovered was \$4,415.50, and of the silver, \$23.25.

The operations of the coiner during the fiscal year 1893 show an apparent gain or surplus of 122.634 ounces of standard gold, and an actual wastage of 167.94 ounces of standard silver, or 7.46 per cent of his legal allowance. The percentage of finished coin produced from

ingots operated upon was, gold, 51.9, and silver, 48.1.

The assayer made during the year 33,875 gold, 12,450 silver, and 615

sweep assays.

The annual settlement made at the close of the fiscal year was superintended by Messrs. W. E. Morgan and A. A. Hassan, of the Bureau of the Mint, who reported that they found on hand all the bullion and coin with which the superintendent was charged.

MINT AT NEW ORLEANS.

The deposits of gold and silver at the mint at New Orleans during the fiscal year ended June 30, 1893, aggregated in value \$7,882,048, an increase of \$427,391 over the amount of deposits for the fiscal year ended June 30, 1892.

Foreign gold coins of various countries and denominations were deposited during the fiscal year, amounting to 300.580 standard ounces,

of the coining value of \$5,592.19.

United States gold coins of the face value of \$32,662.50, containing 1,737.04 standard ounces of the coining value of \$32,317.02, and silver coins of the face value of \$1,370,161.70, containing 1,063,309.46 standard

ounces of the coining value of \$1,237,305.55, were deposited and melted during the year. The above sum of \$1,370,161.70 includes \$1,369,280.50 of uncurrent coins transferred from the Treasury for recoinage

The following statement shows the quantity and value of the precious metals deposited during the year at the mint at New Orleans:

	Metals.	Standard ounces.	Value.
Gold		12, 214	\$227, 238
Silver	•••••••	6, 578, 352	7,654,810
Total		6, 590, 566	7, 832, 048

The melter and refiner received and operated upon during the fiscal year bullion containing 73,282 ounces of standard gold, and 6,326,722 ounces of standard silver. Of the above there was sent to the refinery proper to be refined and parted bullion containing 9,871 ounces of standard gold, and 5,959 ounces of standard silver.

Fine gold bars were manufactured during the year of the value of

\$559.94.

During the year the melter and refiner made 31 gold melts and 674 silver melts. Of the former two, and of the latter three were con-

demned by the assayer.

At the annual settlement of the melter and refiner's account, June 30, 1893, it was shown that there was a wastage of 31.784 standard ounces of gold, and 3,954 standard ounces of silver in his operations during the year, that is, in the case of gold 43.3 per cent, and in the case of silver 41.6 per cent of the legal allowance, as provided by section 3541 Revised Statutes of the United States.

During the year the coiner received and operated upon 77,178 ounces of standard gold ingots, and 5,654,361 ounces of standard silver ingots.

There was executed during the fiscal year a coinage of 9,046,688 pieces of the nominal value of \$3,858,380, as shown by the following table:

COINAGE EXECUTED, FISCAL YEAR 1893.

Coinage.	Pieces.	Value.
Gold	85, 688	. 571, 880. 00
Silver dollars, act of July 14, 1890	1, 920, 000	1, 920, 000. 00
Subsidiary coin	7,041,000	1, 366, 500. 00
Total	9, 046, 688	3, 858, 380. 00

In his operations upon the gold and silver delivered to him during the year it was found upon the settlement of his accounts June 30, 1893, that the coiner had a wastage of 13.200 ounces of standard gold, and 1,170.94 ounces of standard silver; that is, in the case of the former 34 per cent, and of the latter 21 per cent of the legal allowance.

The percentage of coin produced from the ingots delivered him dur-

ing the year was 39.8 of the gold ingots, and 48.6 of the silver.

The wastage of the melter and refiner and the coiner of the mint at New Orleans is large, in both gold and silver, considering the amount of bullion operated upon by them. In the Appendix will be found tables exhibiting, by denominations and face value, the amount of United States gold and silver coins deposited and melted, and the amount transferred from the Treasury Department for recoinage. Also a table showing the expenditures for the different classes of supplies required by the mint during the fiscal year.

The annual settlement of the mint at New Orleans, June 30, 1893, was superintended by Mr. H. Clay Stier, of the office of the First Auditor, and Mr. Leonard Magruder, of New Orleans, who witnessed and took account of the bullion and coin delivered by the melter and refiner, and coiner to the superintendent in settlement of their accounts, after which they weighed the bullion and counted the coin and other moneys with which the superintendent was charged, and for which he is responsible.

In counting the currency (Treasury notes) in the cashier's vault a deficiency of \$25,000 was found, which the cashier claimed were destroyed by a fire that occurred in his vault between the closing of the same Saturday afternoon, June 24, and the opening thereof on

Monday morning, June 26, 1893.

On June 26, 1893, the superintendent of the mint advised this Bureau by telegraph of the fire, and requested that some competent person who was accustomed to the handling of charred money be sent from the Department to count the money charred by the fire in the cashier's vault. Through the courtesy of the Treasurer of the United States, Mrs. L. E. Rosenberg, of the redemption division, was sent to New Orleans, who, after much patient labor, found among the charred paper \$1,182 in currency which had not been destroyed beyond identification, leaving a The circumstances of the fire deficiency of \$23,818 to be accounted for. were such as to lead to the belief that it was not accidental, but of incendiary origin, for the purpose of concealing a shortage in the cashier's accounts, he being the only person having access to the vault. this view of the case, a thorough investigation as to the origin of the fire was made by Mr. A. R. Barrett, of the secret service. The evidence collected by him was deemed sufficient to justify the arrest of the cashier, who was taken before the United States commissioner, and gave bail for his future appearance.

THE MINT AT CARSON.

The weight and value of the gold and silver deposited at the mint at Carson City during the fiscal year ended June 30, 1893, are exhibited in the following table:

Metal.	· Weight in standard ounces.	Value.
Gold	1, ; 1	\$1, 334, 567, 42 1, 334, 098, 55
Total		2, 668, 665. 97

During the year the superintendent delivered to the melter and refiner, to be parted and refined and manufactured into fine bars and ingots of standard fineness, bullion containing 166,624.825 ounces of standard gold, and 2,473,722.30 ounces of standard silver. He returned to the superintendent during the year in fine bars and ingots of standard fineness and in unparted bullion, and at the annual settlement,

166,535.244 standard ounces of gold, and 2,473,095.67 standard ounces of silver, showing a wastage in gold of \$9.581 standard ounces and in silver a wastage of 626.63 standard ounces. The melter and refiner made during the year 54 melts of gold ingots and 1,118 melts of silver ingots; of the former 1 and of the latter 11 were condemned by the assayer. The gold wastage of the melter and refiner is excessive, being 53.76 per cent of the legal allowance; and is accounted for by the fact that the bullion operated upon by him during the year was of a lower grade than in previous years. The silver wastage was 626,63 standard ounces or 16.88 per cent, of the legal allowance.

The superintendent delivered to the coiner during the year 138,958.400 standard ounces of gold ingots, and 2,122,220.60 standard ounces of silver ingots. He returned to the superintendent during the year 138,951.742 standard ounces of gold coin and bullion, and 2,122,002.57 standard ounces of silver coin and bullion, showing a wastage in his gold operations of 6.658 standard ounces, and in his silver operations of 218.03 standard ounces, the wastage on the gold being 9.58, and on the

silver 10.27 per cent of the legal allowance.

By direction of the Secretary of the Treasury coinage operations at the mint at Carson City were suspended on June 1, 1893, and the force employed in the coiner's department dispensed with. A corresponding

reduction was also made in other departments of the mint.

The business of the Carson mint is now conducted on the same basis as that of the assay office at New York; depositors of gold receiving payment either in coin or fine bars, as preferred, and of silver, in unparted or fine bars. Until the repeal of the purchasing clause of the act of July 14, 1890, depositors of silver at the Carson City mint could sell their silver to the Government and receive payment therefor over the counter in Treasury notes or by draft on the assistant treasurer of the United States at San Francisco or New York, payable in Treasury notes.

The mint at Carson City being of limited capacity, and the amount of gold deposited and silver purchased there being small as compared with the amount of gold deposited and silver purchased at the San Francisco mint, which possesses a large coinage capacity, the expenses for coinage were much greater at Carson than at San Francisco.

The gold deposited at the mint at Carson City can be transported to the mint at San Francisco and converted into coin without any additional appropriation either for labor or contingent expenses. The heavy outlay for coinage at the former and the accumulation of an amount of gold coin at a point where it is not required for use may be thus avoided.

Upon the suspension of coinage operations at the Carson mint the presses and other machinery used in the coinage department were painted and leaded under the supervision of Mr. Charles H. Colburn, the retiring coiner, to prevent corrosion.

At the close of the fiscal year 1893 the bullion, coin, and other moneys with which the superintendent was charged was weighed and counted by Messrs. W. E. Morgan and A. A. Hassan, of the Bureau of the Mint,

and the amount found to be correct.

ASSAY OFFICE AT NEW YORK.

The value of gold and silver deposited at the United States assay office at New York during the fiscal year ended June 30, 1893, aggregated \$26,506,361, against \$36,980,006 deposited the preceding fiscal year, a decrease of \$10,473,645.

United States gold coin of the face value of \$276,884, containing 14,357.970 standard ounces, of the coining value of \$267,125.03, and. silver coins containing 4,076.75 standard ounces, of the coining value of \$4,743.85, were deposited during the year.

Foreign gold coins containing 73,720.570 standard ounces, of the coining value of \$1,371,545.48, and silver coins containing 560,198.96 standard ounces, of the coining value of \$651,867.88, were also deposited

during the year.

The weight and value of the deposits were as follows:

Metals.	Standardounces.	Value.
Gold Silver	,	\$18, 305, 014. 11 8, 201, 316. 81
Total	8, 031, 926, 929	26, 506, 360. 92

The value of gold bars exchanged for gold coin during the fiscal year 1893, under the act of May 26, 1882, was \$7,215,415.14.

The melter and refiner operated upon bullion containing 969,744.850 standard ounces of gold, and 7,108,697.46 standard ounces of silver dur-

ing the fiscal year 1893.

The amount of bullion refined by acid was 4,070,333.04 gross ounces, containing 573,719.621 standard ounces of gold, of the value of \$10,673,853.42, and 3,491,839.23 standard ounces of silver, of the value of \$4,063,231.10.

The amount of sulphuric acid used for parting operations was

1,395,697 pounds.

The proceeds of sales of spent acid and blue vitriol amounted to \$9,023.10.

The number of fine, mint, and standard bars manufactured was 58,580, containing 966,916.515 standard ounces of gold, and 7,070,067.70 standard ounces of silver.

The number of gold deposits melted was 6,970, and of silver 3,916.

At the annual settlement, June 30, 1893, the melter and refiner returned in settlement an excess of 874.721 standard ounces of gold, of the value of \$16,273.88. In his silver operations his wastage was 1,305.83 standard ounces, or 12.24 per cent of the legal allowance.

The annual settlement, June 30, 1893, was superintended by Messrs. F. P. Gross and W. F. Bowen, of this Bureau, who reported in writing that they found on hand all the money and bullion with which the superintendent was charged.

MINT AT DENVER, COLO.

The value of the deposits of gold and silver at this institution during the last fiscal year was \$1,417,794.87, an increase of \$55,852.20 over the deposits of the previous year.

United States gold coins of the face value of \$3,717.50, containing 199.581 standard ounces of gold of the coining value of \$3,713.13, were

deposited during the year.

The deposits, earnings, and expenditures for the fiscal year are shown in the accompanying table:

· Items.	Amount.
Deposits:	
Earnings Expenses	\$1, 417, 794, 87 4, 369, 50 26, 803, 29

Percentage of nct expenses to deposits, 1.58.

ASSAY OFFICE AT HELENA, MONT.

The deposits of bullion at the assay office at Helena, Mont., during the last fiscal year amounted to 160,396.117 ounces of standard gold, and silver of the coining value of \$1,432,801.47, an increase of \$68,112.38 over the amount of deposits during the previous fiscal year.

over the amount of deposits during the previous fiscal year.
Foreign gold coins, amounting to 9.138 standard ounces, of the coining value of \$170.01, and foreign silver coins containing 31.90 standard ounces, of the coining value of \$37.12, were deposited during the year. United States gold coins of the face value of \$112.50, containing 6.048 standard ounces of gold, of the coining value of \$112.52, were also deposited during the year.

The deposits, earnings, and expenditures for the fiscal year are set

forth in the following table:

Items.	Amount.
Deposits:	
Gold \$1, 329, 300. 41	
Silver	
·	\$1, 432, 801. 47
Earnings	3, 761. 74
Expenditures	24, 664. 83

ASSAY OFFICE AT BOISE CITY, IDAHO.

The deposits at the assay office at Boise City during the fiscal year ended June 30, 1893, amounted in the aggregate to 56,201.280 ounces of standard gold and silver bullion, of the coining value of \$787,041.63, an increase of \$145,626.82 over the deposits of the previous year.

The deposits, earnings, and expenditures of this office during the

past fiscal year are shown in the following table:

Items.	Amount.

ASSAY OFFICE AT ST. LOUIS, MO.

The deposits of gold and silver bullion at the United States Assay Office at St. Louis during the year aggregated \$731,437.28, a gain of \$23,534.55 over the amount deposited in the previous fiscal year.

Foreign gold coins containing 65.725 standard ounces, of the coining value of \$1,222.79, and foreign silver coins amounting to 869.38 standard ounces, of the coining value of \$1,011.64, were deposited during the fiscal year. United States gold coins of the face value of \$17,455, containing 932.288 standard ounces of gold, of the coining value of \$17,344.89 were also deposited during the year.

The deposits, earnings, and expenses are shown in the following table:

CURRENCY AND COINAGE LEGISLATION.

Previous to the adoption of the Constitution the circulating medium of the country consisted chiefly of foreign coins. The money of commerce and the practical monetary unit was the Spanish milled dollar.

In keeping accounts, next in order to the dollar came the English pound and shilling, the latter, although forming a considerable part

of the circulating medium, varied in value.

Besides these there were also English, French, Spanish and Portuguese coins which were, in 1776, given the following values:

. [Value in dollars.]	
English guinea	48
French guinea	48
Johannes 1	.6
Half johnannes	8
Spanish pistole	33
French pistole	$3\ddot{1}$
Moidore	6
English crown	11
English crown French crown	1
English shilling	2

By the act of April 2, 1792, the mint was established "for the pur-

pose of a national coinage."

The act provided that the money of account should be expressed in dollars or units, dimes or tenths, cents or hundredths, and mills or thousandths, and that all accounts in public offices and proceedings in courts should be kept and had in conformity with this regulation.

The silver dollar was made the unit of value.

Foreign'gold and silver coins, however, continued to pass current in the United States at certain rates established by acts of Congress until 1857, when, by the act of February 21, of that year, they ceased to be legal tender or to pass current in the United States.

The various acts regulating the legal tender value of foreign gold

and silver coins are as follows:

The act of February 9, 1793, provided:

SEC. 1. That from and after the first day of July next, foreign gold and silver coins shall pass current as money within the United States, and be a legal tender for the payment of all debts and demands, at the several and respective rates following, and not otherwise, viz: The gold coins of Great Britain and Portugal, of their present standard, at the rate of one hundred cents for every twenty-seven grains of the actual weight thereof; the gold coins of France, Spain and the dominions of Spain, of their present standard, at the rate of one hundred cents for every twenty-seven grains and two-fifths of a grain, of the actual weight thereof. Spanish milled dolars, at the rate of one hundred cents for each dollar, the actual weight whereof shall not be less than seventeen pennyweights and seven grains; and in proportion for the parts of a dollar. Crowns of France, at the rate of one hundred and ten cents for each crown, the actual weight whereof shall not be less than eighteen pennyweight and seventeen grains, and in proportion for the parts of a crown. But no foreign coin that may have been, or shall be issued subsequent to the first day of January, one thousand seven hundred and ninety-two, shall be a tender, as aforesaid until samples therof shall have been found, by assay, at the Mintof the United States, to be conformable to the respective standards required, and proclamation thereof shall have been made by the President of the United States.

to be conformable to the respective standards required, and proclamation thereof shall have been made by the President of the United States.

SEC. 2. Provided always, and be it further enacted, That at the expiration of three years next ensuing the time when the coinage of gold and silver, agreeably to the act, entitled "An act establishing a mint, and regulating the coins of the United States," shall commence at the Mint of the United States (which time shall be announced by the proclamation of the President of the United States) all foreign gold coins and all foreign silver coins, except Spanish milled dollars and parts of

such dollars, shall cease to be a legal tender, as aforesaid.

SEC. 3. And be it further enacted, That all foreign gold and silver coins (except Spanish milled dollars, and parts of such dollars), which shall be received in payment for

moneys due to the United States, after the said time, when the coining of gold and silver coins shall begin at the Mint of the United States, shall, previously to their being issued in circulation, be coined anew, in conformity to the act, entitled "An act establishing a mint and regulating the coins of the United States."

The second section of the act of February 9, 1793, was suspended by the act of February 1, 1798, "for and during the space of three years from and after the 1st day of January, 1798, and until the end of the next session of Congress thereafter," during which time it provided that the foreign gold and silver coins enumerated in the first section of act of February 9, 1793, should be legal tender.

The act of April 10, 1806, continued the legal-tender quality of foreign coin for three years, at the rates provided by the act of February

9, 1793.

The act of April 29, 1816, provided ...

That from the passage of this act and for three years thereafter, and no longer, the following gold and silver coins shall pass current as money within the United States, and be a legal tender for the payment of all debts and demands, at the several and respective rates following, and not otherwise, videlicet: the gold coins of Great Britain and Portugal, of their present standard, at the rate of one hundred cents for every seventy-seven grains, or eighty-eight cents and eight-ninths per pennyweight; the gold coins of France, of their present standard, at the rate of one hundred cents for every twenty-seven and a half grains, or eighty-seven and a quarter cents per pennyweight; the gold coins of Spain, at the rate of one hundred cents for every twenty-eight and a half grains, or eighty-four cents per pennyweight; the crowns of France, at the rate of one hundred and seventeen cents and six-tenths per ounce, or one hundred and ten cents for each crown weighing eighteen pennyweights and seventeen grains; the five-franc pieces at the rate of one hundred and sixteen cents per ounce, or ninety-three cents and three mills for each five-franc piece, weighing sixteen pennyweights and two grains.

The act of March 3, 1819, provided-

That the gold coins of Great Britain and Portugal, of their present standard, shall be a legal tender in the payment of all debts, at the rate of one hundred cents for every twenty-seven grains, or eighty-eight cents and eight-ninths per pennyweight; the gold coins of France, of their present standard, at the rate of one hundred cents for every twenty-seven and a half grains, or eighty-seven and a quarter cents per pennyweight; the gold coins of Spain at the rate of one hundred cents for every twenty-eight and a half grains, or eighty-four cents per pennyweight, until the first day of November next; and that from and after that day foreign gold coins shall cease to be a tender within the United States for the payment of debts or demands. SEC. 2. Continues in force two years from April 29, 1819, the provisions of the act

of April 29, 1816, relating to silver coins.

The act of March 3, 1821, continued in force for two years from April 29, 1821, the provisions of the act of April 29, 1816, relating to crowns and 5-franc pieces of France.

The provisions of the act of March 3, 1821, relative to the crowns and 5-france pieces of France, were extended by act of March 3, 1823, for a

further period of two years from March 4, 1823.

The gold coins of Great Britain, Portugal, France, and Spain were received in payment on account of lands, under the provisions of act of March 3, 1823, which were as follows:

That, from and after the passage of this act, the following gold coins shall be received in all payments on account of public lands, at the several and respective rates following, and not otherwise, viz: the gold coins of Great Britain and Portugal, of their present standard, at the rate of one hundred cents for every twenty-seven grains, or eighty-eight cents and eight-ninths per pennyweight; the gold coins of France, of their present standard, at the rate of one hundred cents for every twenty-seven and a half grains, or eighty-seven and a quarter cents per pennyweight; and the gold coins of Spain of their present standard, at the rate of one hundred cents for every twenty-eight and a half grains, or eighty-four cents per pennyweight.

The act of June 25, 1834, provided:

That from and after the passage of this act, the following silver coins shall be of the legal value, and shall pass current as money within the United States, by tale, for the payment of all debts and demands, at the rate of one hundred cents the dollar, that is to say, the dollars of Mexico, Peru, Chile, and Central America, of not less weight than four hundred and fifteen grains each, and those re-stamped in Brazil of the like weight, of not less fineness than ten ounces fifteen pennyweights of pure silver, in the troy pound of twelve ounces of standard silver; and the five franc pieces of France, when of not less fineness than ten ounces and sixteen pennyweights in twelve ounces troy weight of standard silver, and weighing not less than three hundred and eighty-four grains each at the rate of ninety-three cents

The act of June 28, 1834, regulated the legal-tender value of certain foreign coins, as follows:

That, from and after the thirty-first day of July next, the following gold coins shall pass as current as money within the United States, and be receivable in all payments, by weight, for the payment of all debts and demands, at the rates following, that is to say: the gold coins of Great Britain, Portugal, and Brazil, of not less than twenty-two carats fine, at the rate of ninety-four cents and eight-tenths of a cent per pennyweight; the gold coins of France nine-tenths fine, at the rate of ninety-three cents and one-tenth of a cent per pennyweight, and the gold-coins of Spain, Mexico, and Colombia, of the fineness of twenty carats three grains and sevensixteenths of a grain, at the rate of eighty-nine cents and nine-tenths of a cent per

Under the provisions of the act of March 3, 1843, certain gold coins of Great Britain and France, and silver coins of Spain, Mexico, Peru, Bolivia, and France, passed current in the United States at rates fixed as follows:

That from and after the passage of this act, the following foreign gold coins shall pass current as money within the United States, and be receivable, by weight, for the payment of all debts and demands, at the rates following—that is to say: the gold coins of Great Britain, of not less than nine hundred and fifteen and a half thousandths in fineness, at uinety-four cents and six-tenths of a cent per pennyweight; and the gold coins of France, of not less than eight hundred and ninety-nine thousandths in fineness, at ninety-two cents and nine-tenths of a cent per pennyweight.

SEC. 2. And be it further enacted, That from and after the passage of this act, the following foreign silver coins shall pass current as money within the United States, and be receivable by tale, for the payment of all debts and demands, at the rates following—that is to say: the Spanish pillar dollars, and the dollars of Mexico, Peru, and Bolivia, of not less than eight hundred and ninety-seven thousandths in fineness, and four hundred and fifteen grains in weight, at one hundred cents each; and the five-franc pieces of France, of not less than nine hundred thousandths in fineness, and three hundred and eighty-four grains in weight, at ninety-three cents each.

The act of February 21, 1857, provided—

That the pieces commonly known as the quarter, eighth, and sixteenth of the Spanish pillar dollar, and of the Mexican dollar, shall be receivable at the Treasury of the United States, and its several offices, and at the several post-offices and landoffices, at the rates of valuation following—that is to say, the fourth of a dollar, or piece of two reals, at twenty cents; the eighth of a dollar, or piece of one real, at ten cents; and the sixteenth of a dollar, or half real, at five cents.

SEC. 2. And be it further enacted, That the said coins, when so received, shall not

again be paid out, or put in circulation, but shall be recoined at the mint.

SEC. 3. And be it further enacted, That all former acts authorizing the currency of foreign gold or silver coins, and declaring the same a legal tender in payment for debts, are hereby repealed.

The provisions of the first section of the act of February 21, 1857, are still in force, as will be seen by section 3567 U.S. Revised Statutes. It is obvious that this section should be repealed.

GOLD COINS.

Provision was made under the act of April 2, 1792, for the coinage of gold, silver, and copper coins of full weight to have full debt paying power. Individuals were given the right to have gold or silver coined at the mint without charge, provided, however, that a deduction be made of one-half per cent from the weight of the pure gold or silver contained in said bullion in case of immediate payment in coin.

The gold coins were to contain 24.75 grains of pure gold, and the

silver coins 371.25 grains of pure silver, to the dollar.

The relative value of the two metals in coinage was fixed at 15 to 1—that is to say, 15 pounds weight of pure silver was to be of equal value in all payments with 1 pound weight of pure gold, and so in proportion as to any greater or less quantities of the respective metals.

The denominations of gold coins authorized to be struck by this act

were:

		Weight.	Fineness.
The half eagle, or five-dolla	r piece	135	916 3 916 3 916 3

The weight and fineness remained unchanged until 1834.

As the bullion value of the gold coins authorized under the act of April 2, 1792, was greater than their face value, they were exported. Therefore, in order to maintain gold coins in circulation in the United States, it became necessary to change the weight and flueness thereof, which was done by the act of June 28, 1834, by which the weight and fineness was fixed as follows:

	Weight.	Fineness.
Eagle Half eagle Quarter eagle	Grains. 258 129 64.5	0, 899, 225 , 899, 225 , 899, 225

The relative value of the two metals in coinage under the act of June 28, 1834, which reduced the pure gold to the dollar from 24.75 to 23.20 grains, was 1 to 16.002.

The fineness of the gold coins was raised by the act of January 18, 1837, from 0.899,225 to 0.900, at which fineness they have since continued. The change of fineness increased the pure gold to the dollar from 23.20 to 23.22 grains.

The coinage of the double eagle or 20-dollar piece, and the 1-dollar gold piece of the weight of 516 grains and 25.8 grains, respectively, was authorized by the act of March 3, 1849.

The 3-dollar gold piece of the weight of 77.4 grains was authorized

by the act of February 21, 1853.

This act withdrew the right from individuals to have silver pieces of less value than 1 dollar coined at the mint. The coinage of the silver dollar, however, remained free to individuals, but a coinage charge of one-half per cent was imposed for gold and silver dollars.

The act of February 12, 1873, authorized a coinage charge for standard gold bullion of one fifth of one per cent, which charge was abolished by the act of January 14, 1875.

The 1 dollar gold piece was made the unit of value by the act of Feb-

ruary 12, 1873.

The coinage of the 3-dollar and 1-dollar gold piece was discontinued by the act of September 26, 1890.

SILVER COINS.

The coinage of silver coins authorized by the act of April 2, 1792, was as follows:

Dollar, or unit, weight	416	grains;	fineness	 89	32.4
Half dollar, weight	208	grains;	fineness	 89)2.4
Quarter dollar, weight	104	grains;	fineness	 89	92.4
Dime, weight	41.6	grains;	fineness	 89)2.4
Half dime, weight	20.8	grains;	fineness	 , 89	32.4

No issue of silver dollars was made from the mint from 1805 to 1836, the coinage having been suspended by the direction of President Jefferson, owing to the fact that their bullion value being greater than their face value, they were purchased for export. The order of suspension is contained in the following letter, under date of May 1, 1806, addressed to the Director of the Mint at Philadelphia by James Madison, Secretary of State:

DEPARTMENT OF STATE, May 1, 1806.

SIR: In consequence of a representation from the director of the Bank of the United States, that considerable purchases have been made of dollars coined at the mint for the purpose of exporting them, and as it is probable further purchases and exportations will be made the President directs that all the silver to be coined at the mint shall be of small denominations so that the value of the largest pieces shall not exceed half a dollar.

JAMES MADISON.

I am, etc.,
ROBERT PATTERSON, Esq.,
Director of the Mint.

Coins of these weights and fineness were struck by the mints until the passage of the act of January 18, 1837, fixing the weights and fineness as follows:

•			
Dollar, weight	-4124 grains;	fineness	. 900
Half dollar, weight	2061 grains;	fineness	. 900
Quarter dollar, weight	103 grains;	fineness	.900
Dime, weight	414 grains;	fineness	. 900
Half dime weight	205 grains:	fineness	900

All the silver coins of the United States were full legal tender from 1792 until the passage of the act of February 21, 1853, by which the fractional parts of the dollar were made subsidiary and the weights of the coins reduced as follows:

•	Grains.	
Half dollar, weight	 192	
Quarter dollar, weight	 96	
Dime, weight	38.	. 4
Half dime, weight	 19	$.ar{2}$

The legal-tender quality of these coins was limited to \$5 by this act. The coinage of the 3-cent silver piece of the weight of 123 grains, fineness .750, was authorized by the act of March 3, 1851, and was made a legal tender for all sums of 30 cents and under.

The weight of the silver 3-cent piece was reduced from 123 grains to 11.52 grains and its fineness increased to .900 by the act of March 3,

1853, in order to make it conform to that of the weight and fineness of

the other silver coins of the United States.

The act of February 12, 1873, discontinued the coinage of the silver dollar, half-dime and 3-cent piece and authorized the coinage of a "trade dollar" of the weight of 420 grains, fineness .900, which was made a limited legal tender to the amount of \$5.

Under the act of February 12, 1873, individuals had the right to deposit silver bullion at the mints for coinage into "trade dollars," a charge, fixed from time to time by the Director of the Mint, with the

concurrence of the Secretary of the Treasury, being imposed therefor. The weight of the subsidiary coins was slightly increased by this act, that of the half-dollar being raised to 192.9 grains, that of the quarter-dollar to 96.45 grains, and that of the dime to 38.58 grains. These coin's were made limited legal tender to the amount of \$5.

The act of March 3, 1875, authorized the coinage of the 20-cent silver piece, of the weight of 77.16 grains, fineness .900, and made it limited legal tender to the amount of \$5. The coinage of this piece was prohibited

by act of May 2, 1878.

The joint resolution of Congress adopted July 22, 1876, discontinued the legal-tender quality of the trade dollar and empowered the Secretary of the Treasury to limit from time to time the coinage thereof to such an amount as he might deem sufficient to meet the export demand for the same.

The coinage of the trade dollar was discontinued, and their redemption within the next ensuing six months provided for by the act of March 3, 1887. The number of trade dollars redeemed was 7,689,036.

The act of February 28, 1878, provided for the coinage of the standard

silver dollar and restored its full legal-tender quality.

Under the provisions of this act the Secretary of the Treasury was authorized and directed to purchase from time to time silver bullion, at the market price thereof, not less than \$2,000,000 worth per month nor more than \$4,000,000 worth per mouth, and cause the same to be coined monthly, as fast as so purchased, into such dollars.

The act of June 9, 1879, provided that the subsidiary silver coins of the United States should be legal tender in all sums not exceeding \$10.

The act of July 14, 1890, authorized the Secretary of the Treasury to purchase 4,500,000 ounces of silver monthly, or so much thereof as might be offered, at the market price, not exceeding \$1 for 3711 grains of pure silver, and to issue in payment for such purchases of silver bullion, Treasury notes of the United States, redeemable on demand in coin, and to coin 2,000,000 ounces of the silver bullion purchased under the provisions of that act into standard silver dollars until the 1st day of of July, 1891, and after that time to coin as much as might be necessary to provide for the redemption of the Treasury notes issued in payment of silver purchased.

In accordance with the provision of this act, authorizing the Secretary of the Treasury, after July 1, 1891, to coin as much as might be necessary to provide for the redemption of Treasury notes, a limited amount of silver dollars was coined each year up to June 1, 1893, when, with the exception of 245 proof coins, the coinage was suspended.

The act approved November 1, 1893, repealed the purchasing clause

of the act of July 14, 1890.

The silver half-dollar, known as the "Columbian half-dollar," was struck in commemoration of the World's Columbian Exposition, under the provisions of the act of August 5, 1892, which authorized the coinage of 5,000,000 pieces. These coins were manufactured from uncurrent

subsidiary silver coins then in the Treasury, and constituted the specific appropriation made by Congress in aid of the World's Columbian

Exposition.

The silver quarter dollar, known as the "Columbian quarter dollar," was struck for the Board of Lady Managers of the World's Columbian Exposition, in commemoration of woman's work, under the provisions of the act of March 3, 1893, which authorized the coinage of 40,000 pieces, which amount constituted part of the specific appropriation made by Congress for the Board of Lady Managers.

All provisions of law relative to the coinage, legal-tender quality, and redemption of the subsidiary silver coins of the United States were

made applicable to the Columbian half and quarter dollar.

MINOR COINS.

By the act of April 2, 1792, the copper 1-cent piece and half-cent piece, of the weight of 264 grains and 132 grains, respectively, were authorized to be coined.

The weight of these pieces was changed by act of January 14, 1793, to 208 grains for the 1-cent piece and 104 grains for the half-cent piece, and these weights were again reduced by proclamation of the President, under the authority of the act approved March 3, 1795, to 168 grains and 84 grains, respectively.

The coinage of copper coins was discontinued by act of February 21, 1857, and in lieu thereof the coinage of a 1-cent piece of the weight of 72 grains, consisting of 88 per cent copper and 12 per cent nickel,

authorized.

The coinage of this piece was discontinued by act of April 22, 1864, which authorized the coinage of a 1-cent piece of the weight of 48 grains and a 2-cent piece of the weight of 96 grains, composed of 95 per cent copper and 5 per cent tin and zinc. These coins were made legal tender to the amount of 10 and 20 cents, respectively.

This legal-tender quality was repealed by the act of March 3, 1865, which provided that they should not be legal tender in any payment

exceeding 4 cents in amount.

The coinage of the 2-cent piece was discontinued by act of Febru-

ary 12, 1873.

The coinage of a 3-cent piece of the weight of 30 grains, composed of 75 per cent of copper and 25 per cent of nickel, was authorized by the act of March 3, 1865, and was made a legal tender to the amount of 60 cents, which legal tender quality was reduced to 25 cents by the act of February 12, 1873.

The coinage of the 3-cent nickel piece was discontinued under the

provisions of the act of September 26, 1890.

The coinage of the 5-cent nickel piece, of the weight of 77.16 grains, composed of 75 per cent copper and 25 per cent nickel, was authorized by the act of March 16, 1866, and was made a legal tender for \$1. Its legal-tender power was reduced to 25 cents by the act of February 12, 1873.

FI 93----14

COINS OF THE UNITED STATES, AUTHORITY FOR COINING, AND CHANGES IN WEIGHT AND FINENESS.

GOLD COINS.

DOUBLE EAGLE.

Authorized to be coined, act of March 3, 1849. Weight, 516 grains; fineness, .900. Total amount coined to June 30, 1893, \$1,145,463,340.

EAGLE.

Authorized to be coined, act of April 2, 1792. Weight, 270 grains; fineness, 916\frac{2}{2}. Weight changed, act of June 28, 1834, to 258 grains. Fineness changed, act of June 28, 1834, to .899, 225. Fineness changed, act of January 18, 1837, to .900. Total amount coined to June 30, 1893, \$217,694,120.

HALF EAGLE.

Authorized to be coined, act of April 2, 1792. Weight, 135 grains; fineness, 0.916\(^2_8\). Weight changed, act of June 28, 1834, to 129 grains. Fineness changed, act of June 28, 1834, to 0.899, 225. Fineness changed, act of January 18, 1837, to 0.900. Total amount coined to June 30, 1893, \(^8199\),533,635.

QUARTER EAGLE.

Authorized to be coined, act April 2, 1792. Weight, 67.5 grains; fineness, .916\(\frac{3}{2}\). Weight changed, act of June 28, 1834, to 64.5 grains. Fineness changed, act of June 28, 1834, to .899, 225. Fineness changed, act of January 18, 1837, to .900. Total amount coined to June 30, 1893, \$28,595,567.50.

THREE-DOLLAR PIECE.

Anthorized to be coined, act of February 21, 1853. Weight, 77.4 grains; fineness, .900. Total amount coined to September 26, 1890, \$1,619,376. Coinage discontinued, act of September 26, 1890.

ONE DOLLAR.

Authorized to be coined, act March 3, 1849. Weight, 25.8 grains; fineness, .900. Total amount coined to September 26, 1890, \$19,499,337. Coinage discontinued, act of September 26, 1890.

SILVER COINS.

DOLLAR.

Authorized to be coined, act of April 2, 1792.
Weight, 416 grains; fineness, 892,4.
Weight changed, act of January 18, 1837, to 412½ grains.
Fineness changed, act of January 18, 1837, to 900.
Coinage discontinued, act of February 12, 1873.
Total amount coined to February 12, 1873, \$8,031,238.
Coinage reauthorized, act of February 28, 1878.
Amount coined from March 1, 1878, to June 30, 1893, \$419,332,450.
Total amount coined to June 30, 1893, \$427,363,688.

TRADE DOLLARS.

Authorized to be coined, act of February 12, 1873. Weight, 420 grains; fineness, 900. Coinage limited to export demand, joint resolution July 22, 1876. Coinage prohibited, act of March 3, 1887. Total amount coined, \$35,965,924.

HALF DOLLAR.

Authorized to be coined, act of April 2, 1792.
Weight, 208 grains; fineness, .892,4.
Weight changed, act of January 18, 1837, to 2064 grains.
Fineness changed, act of February 18, 1837, to .900.
Weight changed, act of February 21, 1853, to 192 grains.
Weight changed, act of February 12, 1873, to 124 grains, or 192.9 grains.
Total amount coined to June 30, 1893, \$124,648,004.

COLUMBIAN HALF DOLLAR.

Authorized to be coined, act of August 5, 1892. Weight, 192.9 grains; fineness, .900. Total amount coined, \$2,501,052.50.

QUARTER DOLLAR.

Authorized to be coined, act of April 2, 1792.
Weight, 104 grains; fineness, .892,4.
Weight changed, act of January 18, 1837, to 1034 grains.
Fineness changed, act of January 18, 1837, to .900.
Weight changed, act of February 21, 1853, to 96 grains.
Weight changed, act of February 12, 1873, to 64 grains.
Total amount coined to June 30, 1893, \$44,891,443.25.

COLUMBIAN QUARTER DOLLAR.

Authorized to be coined, act of March 3, 1893. Weight 96.45 grains; fineness, .900. Total amount coined; \$10,005.75.

TWENTY-CENT PIECE.

Authorized to be coined, act of March 3, 1875. Weight, 5 grams, or 77.16 grains; fineness, .900. Coinage prohibited, act of May 2, 1878. Total amount coined, \$271,000.

DIME.

Authorized to be coined, act of April 2, 1792. Weight, 41.6 grains; fineness, .892.4. Weight changed, act of January 18, 1837, 414 grains. Fineness changed, act of January 18, 1837, to .900. Weight changed, act of February 21, 1853, to 38.4 grains. Weight changed, act of February 12, 1873, to 24 grams, or 38.58 grains. Total amount coined to June 30, 1893, \$28,115,898.90.

HALF DIME.

Authorized to be coined, act of April 2, 1792. Weight, 20.8 grains; fineness, .892,4. Weight changed, act of January 18, 1837, to 20\(\frac{1}{2}\) grains. Fineness changed, act of January 18, 1837, to .900. Weight changed, act of February 21, 1853, to 19.2 grains. Coinage discontinued, act of February 12, 1873. Total amount coined, \(\frac{1}{2}\)4,880,219.40.

THREE-CENT PIECE.

Anthorized to be coined, act of March 3, 1851. Weight, 12\(\frac{2}{3}\) grains; fineness, .750. Weight changed, act of March 3, 1853, to 11.52 grains. Fineness changed, act of March 3, 1853, to .900. Coinage discontinued, act of February 12, 1873. Total amount coined, \$1,282,087.20.

MINOR COINS.

FIVE CENT (NICKEL).

Authorized to be coined, act of May 16, 1866. Weight, 77.16 grains, composed of 75 per cent copper and 25 per cent nickel. Total amount coined to June 30, 1893, \$12,971,127.40.

THREE CENT (NICKEL).

Authorized to be coined, act of March 3, 1865. Weight, 30 grains, composed of 75 per cent copper and 25 per cent nickel. Total amount coined to September 26, 1890, \$941,349.48. Coinage discontinued, act of September 26, 1890.

TWO CENT (BRONZE).

Authorized to be coined, act of April 22, 1864. Weight, 96 grains, composed of 95 per cent copper and 5 per cent tin and zinc. Coinage discontinued, act of February 12, 1873. Total amount coined, \$912,020.

CENT (COPPER).

Authorized to be coined, act of April 2, 1792. Weight, 264 grains. Weight changed, act of January 14, 1793, to 208 grains.
Weight changed by proclamation of the President January 26, 1796, in conformity with act of March 3, 1795, to 168 grains.
Coinage discontinued, act of February 21, 1857. Total amount coined, \$1,562,887.44.

CENT (NICKEL).

Authorized to be coined, act of February 21, 1857. Weight, 72 grains, composed of 88 per cent copper and 12 per cent nickel. Coinagé discontinued, act of April 22, 1864. Total amount coined, \$2,007,720.

CENT (BRONZE).

Coinage authorized, act of April 22, 1864. Weight, 48 grains, composed of 95 per cent copper and 5 per cent tin and zinc. Total amount coined to June 30, 1893, \$7,096,167.64.

HALF CENT (COPPER).

Authorized to be coined, act of April 2, 1792. Weight, 132 grains. Weight changed, act of January 14, 1793, to 104 grains. Weight changed by proclamation of the President, January 26, 1796, in conformity with the act of March 3, 1795, to 84 grains. Coinage discontinued, act of February 21, 1857. Total amount coined, \$39,926.11.

MONETARY STATISTICS OF FOREIGN COUNTRIES.

The statistics of the coinage and production of the precious metals in foreign countries, published annually in the reports of this bureau, are obtained directly from the Governments of such countries by our representatives abroad.

The points on which information is sought are embodied in a set of questions in a circular sent through the Department of State to our diplomatic representatives and the answers are received in the form of reports direct to this Bureau.

The questions relating to the calendar year 1892 were as follows:

(1) What was the amount of gold coined during the calendar year 1892 by denominations and values? What amount was recoined (withdrawn from circulation) during the year, domestic and foreign coins separately?

(2) Same for silver.
(3) What was the import and export of gold during the calendar year 1892? Coin, bullion, and ore should be given separately where practicable.

(4) Same for silver.

(5) What was the weight, expressed in kilograms, and the value of the gold produced from the mines during the calendar year 1892?

(6) Same for silver.

(7) What was the output of pure gold by the refineries of the country?

(8) Same for silver.

(9) What, approximately, was the stock of gold-coin and bullion in the country at the close of the calendar year 1892?

(10) Same for silver.

(11) What was the amount of Government notes outstanding at the same date?

(12) What was the amount of bank notes outstanding at the same date?

(13) What was the amount of uncovered Government notes?

(14) What was the amount of uncovered bank notes?

(15) Were any laws passed during the year 1892 affecting the coinage, issue, or legal-tender character of the metallic and paper currency? If so, please transmit copies of the same.

(16) In case the report of the operations of the mint is published please forward a copy.

This year, as usual, we have supplemented the information received through our ministers and consuls abroad, by data from printed We hereby express our documents, some official and others not. acknowledgment to the senders, for Twenty-third Annual Report of the Deputy Master of the Royal Mint, 1892, London, 1893; Government of India, Financial Statement, 1893-'94, Calcutta, 1894; Finance and Revenue Accounts and Miscellaneous Statistics Relating to the Finances of British India, Calcutta, 1893; Report of the Head Commissioner of Paper Currency, Calcutta, to the Secretary of the Government of India for the year 1892-'93, Calcutta, 1893; Accounts Relating to the Trade and Navigation of British India for the Fiscal year 1892-'93, Calcutta, 1893; Report on the administration of the Mints at Bombay and Calcutta for the year 1892-'93, Simla 1893; Annual Report of the Secretary of Mines of Victoria during the year 1892, Melbourne, 1893; The Australian Insurance and Banking Record, 1893; Broken Hill Proprietary Company, limited, New South Wales, Reports, etc., for half-year ending 31, May, 1893; Report of the Department of Mines, Nova Scotia for 1892, Halifax, 1893; Report of the Director of the Imperial Mint of Japan for the year ending March 31, 1893, Hyogo, 1893; The Mexican Financier, Mexico, 1893; República Mexicana, Noticias del Movimiento Maritimo en el Áño Fiscal de 1891 à 1892, México, 1893; República Mexicana, Exportaciones en el Año Fiscal de 1891 á 1892, Mexico, 1893, Amonedaciones é Introducciones de Metales Preciosos á la Casa de Moneda, Año Fiscal de 1891 á 1892, México, 1893; República Mexicana, Exportaciones en el Año Fiscal de 1892 á 1893, Primer Semestre, México, 1892; Deutsches Handels-Archiv, 1893, Berlin, 1893; Monatshefte zur Statistik des Deutschen Richs, Jahrgang, 1893, Berlin, 1893; Zeistchrift für Berg-Hütten und Salinen-Wesen im Pressischen Staate, Sahrgang, 1893, Berlin, 1892; Bulletin de Statistique et de Législation Comparée, Paris, 1893; Revue des Banques, Paris, 1893; Algemeen Verslag van het Munt-College, over 1892, Amsterdam, 1892.

The replies to the interrogatories, which are given in full in the Appendix to this Report, are indicated by the numbers of the questions.

A brief statement of the more important facts contained in these papers and publications relative to the production, use, and movements of gold and silver is here appended:

GREAT BRITAIN AND COLONIES.

Items reported for 1892.	Pounds sterling.	Value in United States money.
Gold coinage	13, 907, 840	\$67, 682, 503
Light gold coin withdrawn from circulation	17, 368, 125	84, 521, 980
Silver coinage	778, 932	3, 790, 673
Worn silver coin withdrawn from circulation	227, 216	1, 105, 747
Total	32, 282, 113	157, 100, 903
Imports of gold coin and bullion	21, 588, 942	105, 062, 586
Exports of gold coin and bullion	14, 832, 122	72, 180, 521
Gain in gold by imports	6, 756, 820	32, 882, 065
Exports of silver coin and bullion	14, 078, 568	68, 513, 351
Imports of silver coin and bullion	13,778,551	67, 053, 319
Loss in silver by exports	300, 017	1, 460, 032
Gold produced	10, 511	51, 152
Silver produced (commercial value)	44, 998	218, 983
Note circulation	£54, 568, 133	265, 555, 819

The gold coinage consisted of £7,080,100 in sovereigns, and £6,827,740 in half sovereigns; total, £13,907,840 (\$67,682,503).

The amount of light gold coin withdrawn during the year aggregated £17,568,125, and the amount of worn silver coin withdrawn was £227,216.

Colonial coinages executed were as follows:

		Value in United States money.
Silver coinages:		4000 000 00
For Canadarupces	500,000	\$298, 000. 00 236, 850. 00
For Hongkong For West Indies (fourpences)		1, 100, 000. 00 4, 379. 85

The following coinages of silver were executed by the mint at Birmingham (Messrs. Ralph Heaton & Sons, Limited) during the year.

	Pieces.	Value.
For Colombia:		•
Half dollars	4, 756, 544	\$2, 378, 272, 00
For Ecuador:	ļ	
Sucres or dollars	60, 000. 00	60, 000, 00
For Costa Rica:		
Twenty-five cents	410, 443	110, 110. 75
Ten cents	139, 936	13, 993. 60
Five cents	279, 731	13, 986. 55

AUSTRALASIA.

The coinages executed by the mints at Melbourne and Sydney during the calendar year 1892 were as follows:

Value.	Value in United States money.
Sovereigns. 3, 488, 750	\$16, 978, 002
<u> </u>	13, 806, 260 30, 784, 262
	Sovereigns.

A statement of the approximate production of gold and silver in Australasia, by colonies, as courteously furnished by Mr. George Anderson, deputy master of the mint at Melbourne, will be found in the appendix. The gross product of gold was 1,796,130 ounces, and of silver 789,696 ounces.

BRITISH INDIA.

The coinages executed by the mints of India during the calendar year 1892, exclusively of silver, including recoinages, was 112,408,338 rupees, the coining value of same in United States money being \$53,247,830.

The production of gold by the mines of India during the calendar year 1892 was 4,992.957 kilograms, of the value of \$3,318,320.

An act of the Governor-General of India, in council, on the 26th of June, 1893, amended the Indian coinage act of 1870 and the Indian paper-currency act of 1872. Its object was to carry out the plan recommended by Lord Herschell's Indian currency committee. It provides for the closing of the Indian mints to the free coinage of silver from and after the date of its passage.

The full text of the act itself, of the sections of the Indian coinage act of 1870 which it repeals, and of the Indian currency act, will be found in the appendix.

FRANCE.

Items reported for 1892.	Value.	Value in United States money.
•	Francs.	
Gold coinage	*4, 514, 120	\$871, 225
Gold recoinage	4, 606, 000	888, 958
Geld imported	385, 383, 469	74, 379, 010
Gold exported	107, 968, 818	20, 837, 982
Gain in gold by imports	277, 414, 651	53, 541, 028
Silver imported	124, 456, 059	24, 020, 020
Silver exported	107, 460, 429	20, 739, 863
Gain in silver by imports	16, 995, 630	3, 280, 157

^{*}All recoinage.

The production by the mines of France was 210 kilograms, or \$139,566, and of silver, 103,000 kilograms, of the commercial value of \$4,280,680. The notes of the Bank of France outstanding, December 31, 1892,

amounted to 3,298,240,400 francs, equal to \$636,560,397.

During the calendar year 1892 coinages of gold and silver were executed at Paris for the following states:

	Value.	Value in United States money.
For Indo China: Silver coinage	Francs. 300, 000	\$57, 900. 00
For Tunis:	,	
Gold coinage	16, 745, 620	3, 231, 904. 66
Silver coinage	2, 441, 092	471, 130. 75
For Morocco: Silver coinage	Ounces. 3, 718, 222	390, 843. 00

BELGIUM.

No coinage of either gold or silver was executed at the Brussels mint during the calendar year 1892.

The weight and value of gold imported was 8,971 kilograms (United States coining value, \$5,962,214); exported, 136.7 kilograms (United States coining value, \$90,870).

The weight and value of silver imported was 68,955 kilograms (United States coining value, \$2,865,804); exported, 175,816 kilograms (United States coining value, \$7,306,925).

(United States coining value, \$7,306,925).

Notes issued by the National Bank outstanding December 30, 1892, amounted to 427,594,580 francs (\$82,525,754).

SWITZERLAND.

Items reported for 1892.	Value.	Value in United States money.
Gold coinage	Francs.	\$386,000
Gold imported	- 23, 568, 650 7, 699, 124	4, 548, 749 1, 485, 931
Gain of gold by imports	65, 869, 526	3, 062, 818
Silver imported	38, 034, 365 27, 973, 000	7, 340, 632 5, 398, 789
Gain of silver by imports	10, 061, 365	1, 941, 843

The amount of Swiss Bank notes outstanding December 31, 1892, was 166,028,800 francs (\$32,043,558).

ITALY.

Items reported for 1891.	Value.	Value in United States money.
Gold coinage	Lire. 656, 520	\$126,708
Gold exports	16, 497, 600 11, 973, 500	3, 184, 036 2, 310, 885.
Loss in gold by exports	4, 524, 100	873, 151
Silver exports	46, 212 42, 313, 200	8, 918 8, 166, 448
Gain of silver by imports	42, 266, 988	8, 157, 530

The known stock of gold in the vaults of the Treasury and banks of issue was, at the end of 1891, 490,000,000 lire (\$94,570,000), and the stock of silver, same date, was about 125,000,000 lire (\$24,125,000).

The amount of paper circulation on December 31, 1891, was 1,464,000,000 lire (\$282,552,000).

Items reported for 1892.	Value.	Value in United States money.
Gold coinage	Lire. 674, 120 119, 154	\$130, 105 22, 997
Gold exports	34, 787, 032	6, 710, 037 4, 173, 109
Loss in gold by exportation	13, 144, 706	2, 536, 928
Silver exports	63, 384, 119 55, 198, 192	12, 233, 135 10, 653, 251
Loss in silver by exportation	8, 185, 927	1, 579, 884

The production of gold and silver during the year 1892 was, approximately: Gold, 473,482 lire (\$91,382); silver, 5,938,097 lire (\$1,146.053). The stock of gold and silver in coin and bullion was, approximately: Gold, 497,300,060 lire (\$95,978,912); silver, 85,485,780 lire (\$16,498,755). The amount of paper circulation on December 31, 1892, was 1,479,798,709 lire (\$285,601,151).

SPAIN.

Items reported for 1892.	Value.	Value in United States money.
Gold eoinage	Pesctas. 48, 606, 540	\$9, 381, 062
Silver coinage	46, 206, 528	8, 917, 860
Silver recoinage	2, 033, 555	392, 476
Total coinage	96, 845, 623	18, 691, 398
Gold imported	28, 843, 477	5, 566, 791
Gold-exported	476, 780	92,018
Gain on gold by imports	28, 366, 697	5, 474, 773
Silver exported	42, 944, 222	8, 288, 224
Silver imported	22, 547, 531	_4,351,673
Loss of silver by exports	. 19, 396, 691	3, 936, 551

The production of silver during the year 1892 is estimated to have been 55,678 kilograms, or 8,733,411 pesetas (\$1,685,549).

The notes of the Bank of Spain outstanding December 31, 1892, amounted to 884,041,150 pesetas (\$170,619,942).

PORTUGAL.

No gold was coined in 1892.

The coinage of silver was 2,848,000 milreis (\$3,075,840).

GERMANY.

A decree of December 12, 1892, provides for the demonetization of the old copper coins of the Republic and of the silver 25-centavo pieces, and the substitution for the former of centavo and for the latter of 20-centavo pieces by the 30th of June, 1893. The decree of June 1, 1893, requires the stoppage of the coinage of the 25-centavo pieces, and their retirement from circulation before June 30, 1896, thus modifying the decree of December 12, 1892.

THE BRUSSELS INTERNATIONAL MONETARY CONFERENCE.

Some notice of this conference will naturally be expected in this report. It was the fourth international monetary conference, and the third at which the possibility of adopting the system of bimetallism by international agreement was exhaustively and profoundly discussed.

The first international monetary conference was that of 1867. It met on the invitation of the French Government "to consider the question of uniformity of coinage, and to seek for the basis of ulterior negotiations." It came together in the city of Paris on June 17. Eighteen of the principal countries of Europe, and the United States were represented at it, the latter by Hon. Samuel B. Ruggles, of New York.

The conference voted unanimously against the adoption by the countries represented of the silver standard exclusively, and unanimously, with the exception of the Netherlands, in favor of the single gold standard. It also voted that an international coinage should consist of "types with a common denominator for weight, in gold coins of identical fineness," and that that fineness should be .900. By a vote of 13 to 2 it favored the 5-franc gold piece as the common denominator, and voted that gold coins having this common denominator should have legal circulation in the countries agreeing to the action of the conference, and that it would be expedient to coin gold pieces of 25 francs for international circulation.

At the final session of the conference it was voted to refer these and other decisions reached to the several States for diplomatic action, and that information of the action of the States should be transmitted to the French Government, which should have power to reassemble the conference. The conference adjourned July 6, and was not reassembled.

The second international monetary conference was that of 1878. It was called by the United States. The act of February 28, 1878, directed the President to invite the governments of Europe to join in a conference to adopt a common ratio between gold and silver for the purpose of establishing internationally the use of bimetallic money and securing fixity of relative value between these metals. The conference met at Paris on the 16th of August. Twelve countries were represented, the United States by Reuben E. Fenton, of New York; W. S. Groesbeck, of Ohio, and Francis A. Walker, of Connecticut. S. Dana Horton, the secretary of the American delegation, was admitted to the conference as a member. It is worthy of note that Germany declined to send delegates to this conference.

At the second session Mr. Groesbeck, on behalf of the United States, laid two propositions before the conference: (1) That it was not to be desired that silver be excluded from free coinage in Europe and the United States. (2) That the use of both gold and silver as unlimited legal tender may be safely adopted by equalizing them at a ratio fixed by international agreement.

These propositions were discussed in their every phase by the delegates of the various states during the seven sessions of the conference. The collective answers to them of all the European delegates, save those of Italy, were presented by the president, Mr. Leon Say, and were:

(1) That it was necessary to preserve in the world the monetary function of silver as well as of gold, but that the choice of one or the other, or of both simultaneously, should be governed by the special situation of each state or group of states. (2) That the question of the restriction of the coinage of silver also should be left to the discretion of each

state or group of states. (3) That the differences of opinion that had appeared excluded the adoption of a common ratio between the two metals.

The conference adjourned on the 29th of August.

The third international monetary conference, that of 1881, was called in January of that year by the governments of France and the United States "to examine and adopt for the purpose of submitting the same to the governments represented, a plan and a system for the reëstablishment of the use of gold and silver as bimetallic money according to a settled relative value between those metals." Nineteen countries were represented. The representatives of the United States were Hon. William M. Evarts, of New York; Allen G. Thurman, of Ohio; Timothy O. Howe, of Wisconsin, and S. Dana Horton.

Like the debates of the previous conferences, those of the present one were marked by the highest ability and by a thorough mastery on the part of the several delegates of monetary science. They covered twelve sessions. At the thirteenth, Mr. Evarts, on behalf of the delegates of France and the United States, and in the name of their respective

governments, read a declaration in which they stated:

(1) That the depression and great fluctuations of the value of silver relatively to gold are injurious to commerce and to the general prosperity, and the establishment of a fixed ratio of value between them would produce the most important benefits to the commerce of the world.

(2) That a bimetallic convention entered into between an important group of states for the free coinage of both silver and gold at a fixed ratio and with full legal-tender faculty would cause and maintain a stability in the relative value of the two metals suitable to the interests and requirements of commerce.

(3) That any ratio now or lately in use by any commercial nation, if so adopted, could be maintained, but that the adoption of the ratio 15½ to 1 would accomplish the object with less disturbance to existing

monetary systems than any other ratio.

(4) That a convention which should include England, France, Germany, and the United States, with the concurrence of other states, which this combination would assure, would be adequate to produce and maintain throughout the commercial world the relation between

the two metals that such convention should adopt.

After this declaration had been read, certain members, through the president, expressed a desire for adjournment, but this met with opposition from Mr. Forsell, delegate from Sweden, who thought that an adjournment would give a character of permanence to the conference, whereas it was better to acknowledge at once that bimetallism had collapsed and that the resolutions of the European delegates at the conference of 1878 should be reaffirmed. After a short recess the president read a resolution reciting that, in view of the speeches and observations of the delegates and the declarations of the several governments, there was ground for believing that an understanding might be established between the states which had taken part in the conference, but that it was expedient to suspend its meetings; that the monetary situation might in some states call for governmental action, and that there was reason for giving opportunity for diplomatic negotiations. The conference was adjourned to April 12, 1882. It was never reconvened.

The fourth international monetary conference was called by the Government of the United States "for the purpose of conferring as to what measure, if any, can be taken to increase the use of silver as money in the currency systems of nations." The conference met at Brussels on

the 22d of November, 1892. Twenty countries were represented. The delegates of the United States were Hon. William B. Allison, Hon. John P. Jones, Hon. James B. McCreary, Mr. Henry W. Cannon, Mr. E. Benjamin Andrews, and Hon. Edwin H. Terrell. The report of the American delegates will be found in the Appendix.

Acknowledgments are due to the officers and clerical staff of the Bureau for the zeal and fidelity displayed in the performance of their

arduous duties.

Owing to the extraordinary session of Congress the amount of labor performed in the way of preparing information called for by Congress has been very great, and this, in addition to the compilation of statistical matter for the annual report, has been cheerfully and satisfactorily performed by them.

R. E. PRESTON,

Director of the Mint.

Hon. John G. Carlisle, Secretary of the Treasury.

XXXI.-COMMERCIAL RATIO OF SILVER TO GOLD EACH YEAR SINCE 1687.

[Note.—From 1687 to 1832 the ratios are taken from the tables of Dr. A. Soetbeer; from 1833 to 1878 from Pixley and Abell's tables; and from 1878 to 1889 from daily cablegrams from London to the Bureau of the mint.]

Year.	Ratio.	Year.	Ratio.	Year.	Ratio.	Year.	Ratio.	Year.	Ratio.	Year.	Ratio.

REMARKS.

A blank space indicates absence of information; a dash, that there either was no recoinage, or, if any, that it is included in the recoinage given for some subsequent year, and mentioned in a note to the latter year.

the natter year.

Each country's recoinage of foreign coins has been given when it could be ascertained. It is believed that, beginning with 1887, the table is quite complete in this respect.

Of interest in connection with the table is the following information as to the demonetization, sales, etc., of gold and silver coins not recoined, resulting from the notable monetary reforms occurring during the period from 1873 to 1892:

auring the period from 1873 to 1892:

Germany.—Under the monetary reform, begin in 1873, establishing a gold standard, there were withdrawn from circulation, up to the close of 1880, for account of the Empire, and melted into bars, coins which produced 3,737,322 kilograms of fine silver. Of this quantity there had been sold, up to the suspension of sales in May, 1879, 3,551,431 kilograms, of the value of \$147,597,472 (16,214.5 kilograms, of the value of \$673.874.62 were used in the manufacture of new silver coins of the Empire), leaving a balance of 169,676.5 kilograms, of the value of \$7,051,755.29, unsold May, 1879, and disposed of since.

**Sweden Norway and Departure 1.1.

posed of since.

Sweden, Norway, and Denmark.—In consequence of the change from a silver to a gold standard, under the Seandinavian Monetary Union of 1873, it is estimated that Sweden exported about \$1,500,000 in silver. Norway melted into bars and sold at Loudon silver coins of the nominal value of about \$1,094,400; and Denmark sold silver amounting to about \$7,000,000 during the three years ending June 30, 1876; a total of \$9,600,000, in round numbers.

District of Funchal, Portugal.—Under the law of May 2, 1879, silver was sold in London to the amount of \$785,400.

Italy.—By the end of 1886 almost the total issue of 520,000,000 lire, or about \$101,223,200, in the silver

Ttaly.—By the end of 1886 almost the total issue of 520,000,000 line, or about \$101,223,200, in the silver dollars issued by the Government of the Two Scielies had been called in by the Italian Government. Roumania.—In execution of the law passed by the Roumanian Parliament, March, 1890, for the adoption of a gold standard, and for the substitution of gold coin for 40,000,000 francs of the existing 5-franc silver currency, about 25,000,000, or \$5,000,000, of the latter coins have been withdrawn from circulation and sold in Europe and for the East.

Egypt.—In 1891, \$494,300 in Egyptian pounds (silver) were melted at Berlin and sold.

NOTES.

a Recoinages of the United States, given by fiscal years ending June 30, up to and including 1879, from which by calendar years.

b Silver recoinages given for Great Britain include all worn silver coins withdrawn from British Colonies, and all recoinages of Great Britain include all worm and the recoinages of Great Britain given by fiscal years ending March 31. c c Amount of gold coinage for the year. Light-weight gold coin, to the value of \$54,521,980, was imported into the royal mint during the year.

"See note b. Silver has never been coined by the branch mints in Australia.

e Recoinage of India, given by fiscal years ending March 31, up to and including 1885, from which

by calendar years.

f No recoinage of French gold coins up to 1886. Gold recoinages reported up to that year were of

foreign coins.

g Recoined in 1883 and 1884, from 50 and 20 centesimi pieces. h Estimated recoinage of Italian gold coins from establishment of Kingdom of Italy, in 1862, to December 31, 1885.

i Only a portion of this amount was recoinage.

k Norecoinage of national gold or silver since establishment of mint, except of \$2,030,167, up to 1885, in subsidiary silver necessitated by the monetary convention of December 23, 1865.

l Only a portion of this amount was recoinage.

m Only a transformation into coin of the new design adopted in 1887.

n A large proportion of gold coins, and nearly all the silver coins, struck in 1886 were produced from

old pieces withdrawn from circulation.

of Total recoinage of gold and silver, respectively, from 1868 to July 12, 1890, the silver being largely old coins of the Spanish Indies.

p Resulting from the monetary reform in the district of Funchal, Madeira, under the law of May 2, 1879.

7 No gold recoined since 1875.
7 Value of gold coins of the different German States demonstized and withdrawn by reason of the establishment by the German Empire of an exclusive gold standard.
8 Total value of silver-coins of the different German States demonstized and delivered, from 1873 to 1880, to the mints for coinage in the new Imperial silver coins.

t Total recoinage of gold and silver coins, respectively, of the Empire from its establishment to the

end of 1885.

u For Hungary only

u For Hungary only.
v In the course of the transition from the silver standard to that of gold in Norway, under the Scandinavian Monetary Union of 1873, old silver coins of the nominal value of \$645,972 were withdrawn from circulation, and converted into subsidiary coins of the new system. Silver coins of the value of \$26,770 have been recoined since. The metal used in the gold coinage was exclusively gold bullion purchased in London, no gold coin having been presented for exchange at the mint.
w Up to the end of 1890 there had been struck in Norway gold coin to the value of \$4,250,659, of which amount there had been withdrawn from circulation, as worn and broken, coins to the value of \$1,200.
x The figures given for the years 1875, 1876, 1877, 1878, and 1880 show the amounts of silver coins brought to the Stockholm mint for exchange during those years, and are the approximate amounts of silver recoinage resulting from the change from the silver to the gold standard, under the Scandinavian Monetary Union of 1873.
w This amount includes the total recoinage up to the end of 1885 of national gold coins and also

vian Monetary Union of 1873.

y This amount includes the total recoinage up to the end of 1885 of national gold coins, and also foreign gold coins to the value of \$46,989, exchanged at the mint in 1874, 1876, 1877, and 1879.

z Estimated recoinage of silver coins from 1873 to end of 1876, resulting from the change from the silver to a gold standard under the Scandinavian Monetary Union of 1873.

aa Total silver recoinage since completion of the monetary reform begun in 1873.

bb Only a portion of this was recoinage.
cc Total amount of worn Japanese gold and silver coins, and foreign gold and silver coins, respectively, purchased or imported into the Imperial mint from its commencement in December, 1870, to March 31, 1893.

dd All foreign coins.

se The amount of recoinage of gold from 1800 to January, 1886, is reported as having been altogether insignificant.

REPORT OF THE COMPTROLLER OF THE CURRENCY.

TREASURY DEPARTMENT,
OFFICE OF THE COMPTROLLER OF THE CURRENCY,
Washington, December 4, 1893.

SIR: In compliance with law I have the honor to herewith submit for the consideration of Congress the annual report of the Comptroller of the Currency. It covers the year which ended October 31, 1893, and is the thirty-first report made since the organization of the Bureau.

The records of the Bureau show that at the close of the year the total number of national banks in active operation was 3,796, with an authorized capital stock of \$683,598,120, represented by 7,450,000

shares, held by 300,000 shareholders.

On October 3, the date of their last report of condition, the total resources of the 3,781 banks then in operation was \$3,109,563,284.36, of which their loans and discounts aggregated \$1,843,634,167.51, and money of all kinds in bank \$369,862,636.97. Of their liabilities \$1,451,124,330.50 represented individual deposits, \$339,153,447.54 surplus and net undivided profits, and \$182,959,725.90 circulating notes outstanding. The total amount of circulation of national banks, October 31, as shown by the books of the office, was \$209,311,993, a net increase during the year of \$36,886,972 and a gross increase of \$40,775,165 on circulation secured by a deposit of bonds.

During the year 119 banks were organized in thirty-two States and Territories, with a capital stock of \$11,230,000. Of these 44, with a capital stock of \$5,135,000, are located in the Eastern States, 41 west of the Mississippi River, with a capital stock of \$2,340,000, and 34 in the Central and Southern States, with a capital stock of \$3,755,000.

The number of banks whose charters were extended was 40, distributed throughout twenty-five States, with a capital stock of \$5,046,000, and circulation to the amount of \$1,585,925. The charters of 4 expired, but in each instance the banks were succeeded by new associations.

Within the same period 158 banks suspended, with a capital stock of \$30,350,000. Of this number, however, 86, with a capital stock of \$18,205,000, resumed business. The number which passed into the hands of receivers was 65, with a capital stock of \$10,935,000. On October 31 seven remained in the charge of examiners, with prospects of speedy resumption. Forty-six banks, with a capital stock of \$5,735,000, went into voluntary liquidation.

By comparing the foregoing synopsis of the history of the banks for the year ended October 31, 1893, with that of the year ended October 31, 1892, as the same is set forth in the Comptroller's Report for that year, the following changes are noted: The number of banks organized decreased 44, receiverships increased 48, voluntary liquidations decreased 7, corporate extensions decreased 47, and expirations of corporate existence decreased 7. The total gain in the number of active banks was 8.

The varying condition of the banks throughout the year appears from the following abstract of the reports of condition, made in response to the five calls required by law.

SUMMARY OF THE STATE AND CONDITION OF EVERY NATIONAL BANK REPORTING DURING THE YEAR ENDED OCTOBER 3, 1893.

A comparison of the figures of 1893 with those of 1892 in the foregoing table will indicate to what extent and in what respect the national-banking interests of the country suffered from the severe and unusual monetary stringency which characterized the greater portion of the past year. Comparing their aggregate resources or liabilities on October 3, 1893, with those of September 30, 1892, it is found they were \$400,531,613 less, being but \$3,109,563,284 on the former date as against \$3,510,094,897 on the latter, the highest point ever reached in the history of the national-bank system. This unparalleled shrinkage in liabilities is accounted for by a decrease between the dates mentioned in the following items, viz: Capital stock \$8,032,677, individual deposits \$314,298,653, and bank and bankers' deposits \$181,338,125. An increase is shown in circulation outstanding to the amount of \$39,536,428, in liabilities of all kinds for money borrowed \$54,464,628, and in surplus and undivided profits \$9,701,265.

Not less marked is the decrease in the items making up the resources of the banks. It shows as follows: Loans and discounts, \$327,406,926; stocks, securities, etc., \$5,965,564, and due from banks and bankers, \$132,054,654. Cash of all kinds on hand increased \$21,991,191, including \$8,410,815 in gold, and United States bonds held for all purposes increased \$40,601,250. These figures illustrate the far-reaching effect of the year's financial depression and show that when panic-stricken depositors withdrew their money the banks of necessity, to meet the sudden and extraordinary demands made upon them, called in their loans and discounts, supplementing such amounts by borrowed money and the additional circulation which they were able to procure from the Govern-

ment through a deposit of bonds.

A closer examination of the figures contained in the reports of condition made to the Comptroller shows this shrinkage to have occurred chiefly between May 4 and October 3, 1893. Within this period of five months \$298,806,487 of individual deposits and \$79,313,076 of bank deposits, a total sum of \$378,119,563 was withdrawn from the banks. To meet this withdrawal loans and discounts were reduced to the amount of \$318,767,691; amounts due from banks and bankers, \$51,198,856, and stocks, securities, etc., \$2,177,912, and to provide against further danger of withdrawals of deposits, which strongly menaced them, the banks between the same dates increased their liabilities for money borrowed in various ways \$36,615,092, and through the taking out of additional circulation \$31,265,616, of which amount \$27,888,905 was taken out between July 12 and October 3, 1893.

The cash resources of the banks, which on May 4, 1893, amounted to \$343,901,803, were \$32,559,267 less on July 12, but between that date and October 3 increased \$59,520,100, amounting at the last-named date to \$369,862,637, the largest sum ever held by them. This was accumulated in the face of continued heavy withdrawals of deposits and is the most practical demonstration that could be had of the solvency of the banks as a whole and their ability in an emergency to rapidly con-

vert their assets into cash.

It is unnecessary to here enter upon a further or more specific analysis of these tables. They comply in detail with the requirements of the law, and show "a summary of the state and condition of every association from which reports have been received the preceding year, at the several dates to which said reports refer, with an abstract of the whole amount of banking capital returned by them, of the whole amount of their debts and liabilities, the amount of circulating notes outstand-

ing, and the total amount of means and resources, specifying the amount of lawful money held by them at the times of their several returns."

The careful and unbiased student of the facts shown in this summary must inevitably reach the conclusion that the cause which more than all others contributed to bringing about the stagnation of the past months in commercial business, the suspension of manufacturing and the closing of mills, was this unprecedented demand on the part of depositors for money which the banks had distributed through the channels of trade and which, to meet this demand, they were obliged to withdraw.

The situation made so dangerous for the banks by the action of depositors caused a sudden contraction of the volume of money needed and already employed for business wants, prevented the making of new loans and rendered it hazardous on the part of the banks to grant renewals of credit, already extended. It is to be said, however, that despite the dangers threatening them, the banks contributed in the largest measure by a wise, judicious and, under all the circumstances, generous course, to the prevention of a general commercial panic. In evidence of this is the fact that at no time throughout the prolonged monetary stringency was there complaint made to the Comptroller by any depositor, creditor, or patron of a national bank on account of the treatment accorded him, either as to cash payments of indebtedness, or for any other reason.

So, too, it is worthy of remark that, when there is taken into consideration the widespread feeling of distrust so prevalent throughout these months, the fact most deserving of comment is not that so many banks closed their doors, but that so many were able to continue in operation. No stronger evidence can be had of the honesty, conservatism, and ability of those active in the management of the banks than the comparatively few failures which occurred, and no greater tribute can be paid to the principles upon which the system as a whole is based and

administered.

Supplementary to the information which has already been given should be added that which bears upon the corporate existence of the banks of the system. The table on page 368 shows the title, capital, and circulation of associations whose corporate existence expired by limitation during the year, and of the associations which succeeded them, the new associations showing an increase in capital of \$5,000 and an increase in circulation of \$30,250.

The table on page 368 shows by States the number, capital stock, and circulation of the forty banks whose corporate existence was extended during the year. Their aggregate capital stock was \$5,046,000, and

their circulation \$1,585,925.

The table on page 369 shows the charter numbers, title, location, date of expiration, capital, bonds, and circulation of the forty-nine associations whose corporate existence will expire during the year ending October 31, 1894. These associations are located in twenty different States, with an aggregate capital of \$6,708,000, and circulation amounting to \$2,006,950.

The table on page 368 shows by States the number, capital, and circulation of associations whose corporate existence will expire during the period from 1894 to 1903. Of these there are 777, with an aggregate

capital of \$117,275,850, and circulation of \$32,467,992.

The table on page 367 shows by States the number and capital of the 1,466 banks, whose corporate existence has been extended since the beginning of the system, located in forty States and Territories, with an

aggregate capital of \$375,945,005. Of these, New York has 225, with a capital of \$72,872,460, Massachusetts 209, with a capital of \$88,612,500,

and Pennsylvania 174, with a capital of \$45,954,000.

Of the 119 banks organized, as shown in the table on page 71, Pennsylvania is first, with 25 banks, having a capital stock of \$2,375,000, New York next, with 11 banks, with a capital stock of \$2,050,000, Texas and Iowa have 10 each, with capital of \$610,000 and \$500,000, respectively. Wisconsin follows New York in amount of capital stock of newly organized banks, having \$1,750,000, although the number of banks organized was but 5.

The marked difference in the number of banks organized during the year ended October 31, 1893, as compared with the preceding year, arises largely from the changed monetary conditions, but is also due in a measure to the very rigid rules now enforced in the granting of charters. It has become the policy of this Bureau to more carefully scrutinize all applications for authority to organize new banks, as the Comptroller appreciates the necessity of discrimination to protect the system from the entrance of associations whose weakness would be an injury. To this end the Comptroller before approving an application for authority to organize, satisfies himself in detail as to the business experience and financial responsibility of each of the applicants, by information obtained through inquiries from sources believed to be reliable.

BANKS OTHER THAN NATIONAL.

That the general statement of the resources, liabilities, and condition of banks and banking companies other than national, namely, State, savings, private banks, and loan and trust companies, may be presented to Congress, as is required by law, the Comptroller, through the courtesy of State officers having supervision of these institutions, has obtained official returns from each State and Territory, excepting Delaware, Maryland, South Carolina, Arkansas, Tennessee, Kansas, Nevada, Oregon, Idaho, Montana, Arizona, and Oklahoma. A summary of this information is here given to complete a résumé of the various banking interests of the country throughout the past year. It will be found in detail in the tables which appear in the appendix.

At the close of the fiscal year ended June 30, 1893, there were in operation in the United States 5,024 incorporated banks, banking institutions, and savings banks, and from 4,837, or 96 per cent, reports of conditions were received, an increase of 419 over the number reporting last year. The number of private banks from which reports were received is 313 less than last year, but the net increase is 106.

In view of the fact that the returns from banks other than national show their condition in most of the States prior to the financial stringency of 1893, the effect of that depression does not appear in these statistics with respect to banks organized under State authority.

The total resources of the 4,837 incorporated and S48 private banks, as shown by the returns from both official and unofficial sources, amount to \$3,979,008,533, of which loans and overdrafts are \$2,348,193,077; United States bonds, \$149,982,221; State, county, etc., bonds, \$407,709,961; railroad bonds and stocks, \$133,729,231; bank stocks, \$45,752,014; all other bonds, stocks, and securities, \$272,430,923; due from banks and cash on hand, \$250,700,719 and \$205,645,203, respectively.

Of the liabilities the capital reported is \$400,007,240; surplus and undivided profits, \$346,206,287; individual deposits, \$1,285,311,723; savings deposits, \$1,785,150,957. The capital employed by the 3,579 State banks is \$250,767,709, and their deposits \$706,865,643. The re-

ported capital of the 228 loan and trust companies is \$94,867,268, and

deposits \$486,244,079.

The capital of the private banks is \$26,943,075 and deposits \$68,552,696. Nearly 51 per cent of the resources of the 5,685 banks is reported by the 1,030 savings banks, of which 614 are mutual and 381 stock savings institutions; the resources of the former, however, are over 84 per cent of those of both classes. With the exception of two banks in the Southern and 10 in the Western States, mutual savings banks are confined to the Eastern and Middle States. Excepting 17 in the Eastern and 7 in the Middle States, stock savings banks are located in the Southern, Western, and Pacific States and Territories.

It also appears that while the entire deposits in mutual savings institutions are "savings," the reports show that over 10 per cent of the deposits in the other class are not of that nature, and the presumption is that the percentage is much greater, as it is known that stock savings banks in certain States make no classification of deposits, and yet transact a commercial as well as a savings bank business.

In the table on page 522 is shown the resources and liabilities of both classes by States and geographical divisions, to which is appended a statement of the number of depositors and the average amount due

each, by States, etc.

The table on page 533 is a consolidated statement of both classes, showing the aggregate number of depositors, amount of savings deposits, and the average amount due each in each State. The average savings deposit in the Eastern States is \$359.48; in the Middle States, \$362.21; in the Southern States, \$168.21; in the Western States, \$328.11; in the Pacific States and Territories, \$661.22. The large average in the latter division is due to the fact that the average amount due depositors in the savings banks of California is \$771.28; the average amount due depositors in that division, exclusive of California, being but \$163.07.

On page 534 a table appears showing the growth of savings banks from 1820 to 1893, the interesting features of which are the average annual savings deposit and per capita deposit in each census year from 1820 to 1890, and annually since the latter date. The per capita deposit in 1820 was but 12 cents; in 1830, 54 cents; 1840, 82 cents; 1850, \$1.87; 1860, \$4.75; 1870, \$14.26; 1880, \$16.33; 1890, \$24.35; and in 1891, 1892, and 1893, \$25.29, \$26.11, and \$26.63, respectively. The number of savings banks in 1820 was 10; the number of depositors, \$,635; the amount of deposits, \$1,138,576; and the average deposit, \$131.86; the number of banks this year is 1,030; depositors, 4,830,599; deposits, \$1,785,150,957; the average deposit \$369.55; and per capita deposit, based on the estimated population on June 1, last, \$26.63.

The aggregate loans of savings banks amount to \$1,047,270,478, of which \$763,579,985 are secured by real estate, \$74,179,877 by collateral other than real estate, and the remainder, principally, by personal security. The stock and bond investments amount to \$799,372,476, of which \$129,610,783 are United States bonds, \$398,606,298 State, county, and municipal bonds, \$121,519,071 railroad bonds and stocks, \$44,466,725 bank stocks, and \$105,169,599 other stocks, bonds, and securities.

The capital stock of national banks on July 12 last, and of other banks, at date of latest returns to this Bureau, in each State and geographical division, is shown in the table on page 241. This table also shows the amount of capital stock per capita of population in each State. The total capital reported is \$1,091,793,959, and the average per capita \$16.29. By comparison with similar returns for 1892, it appears that there has been a shrinkage of capital to the extent of about \$20,000,000, the average per capita at that time being \$16.33.

In this connection data appearing in the table on page 242 showing the total amount of banking funds at the command of national and other banks, namely, capital, surplus, undivided profits and deposits, will be of interest, for, while as heretofore stated, their total capital is but \$1,091,793,959, their aggregate banking funds amount to \$6,412,939,954, and is an increase of \$22,845,826 over the amount held on the same date The estimated population of the United States on June 1 last was 67,021,000, making an average, per capita, of these funds of \$95.68, as against an average of \$97.42 in 1892.

The table referred to give the average of these funds per capita of population and the per capita averages in each class of banks, and in all. The averages in each class are: National banks, \$38.64; State banks, \$15.83; loan and trust companies, \$9.73; savings and private banks,

\$29.93 and \$1.55, respectively.

The amount of coin, paper currency, etc., held by national banks on July 12, last, and by all other banks on or about the same date is shown

in detail in the table to be found on page 240.

The aggregate reported is \$515,987,740, of which \$310,342,537 was reported by national banks and \$205,645,203 by other banks; the total holdings were: Gold coin, \$103,417,876; silver coin, \$15,315,656; specie not classified, \$15,093,221; paper currency, \$264,602,355; fractional currency and cash not classified, \$117,558,632.

In the appendix, pp. 516-547, will be found tables showing the condition at the date of latest returns of State banks, loan and trust companies, savings banks and private banks; State banks from 1872-73 to 1892-93; loan and trust companies, 1888-'89 to 1892-'93; savings banks, 1888-'89 to 1892-'93; number of depositors, amount of savings deposits, and average amount due each depositor in savings banks by States 1891-'92 and 1892-'93; growth of savings banks from 1820 to 1893; condition of private banks in 1889-'93; condensed statement showing the aggregate resources and liabilities of each and all classes of banks in 1892-'93; the capital of national banks on July 12, 1893, and of all other banks on or about the same date, and average per capita of population by States; the population of the United States by States, the capital, surplus, undivided profits, and deposits of national and other banks, the average of these funds per capita, and the per capita averages in each and all classes of banks; the cash holdings of national and other banks on or about July 12, 1893; the number, assets, and liabilities of State banks, etc., which suspended during the first eight months of 1893; the number, assets, and liabilities of suspended State banks, etc., which resumed business during the first eight months of 1893; the condition of the loan and trust companies of the District of Columbia on October 3, 1893, and the condition of the Canadian banks on August 31, 1893.

A condensation of the foregoing for the sake of comparison with national banks shows the principal items of resources and liabilities, and the total resources of banks other than national, as indicated by

the latest returns to the Comptroller, to be as follows:

Items.	State banks.	Loan and trust companies.	Savings banks.	Private banks.
Loans. United States bonds. Other Bonds Capital Surphus and undivided profits. Deposits. Total resources.	412, 654 76, 143, 722 250, 767, 709 103, 137, 836 706, 865, 643	110, 338, 265 94, 867, 268 70, 771, 477	\$1, 047, 270, 478 129, 610, 783 669, 761, 693 33, 429, 188 163, 473, 173 1, 808, 800, 262 2, 013, 775, 147	\$75, 047, 311 1, 472, 148 3, 378, 449 26, 943, 075 8, 823, 801 68, 552, 696 107, 843, 343

SUSPENSIONS OF NATIONAL BANKS.

In the introductory pages of this report is indicated the number of associations "whose business has been closed during the year." In the appendix will be found tables giving in detail names, location, circulation redeemed and outstanding, voluntary liquidations, failures, and temporary suspensions of banks as is required by the statute to be furnished to Congress, together with such other facts as are necessary.

It does not seem essential, nor would it be possible to enter into a minute statement of all the circumstances attendant upon the closing of the banks during the past year. It is sufficient to say that the cause which brought about the large proportion of such suspensions was the action of depositors who, becoming doubtful of the solvency of the banking institutions of the country, withdrew their deposits. The result was that many banks after paying out on the one hand all the money in their vaults and failing to collect their loans on the other, suspended and passed into the hands of the Comptroller. With a full knowledge of the general solvency of these institutions and the cause which brought about their suspension, the policy was inaugurated of giving all banks, which, under ordinary circumstances would not have closed, and whose management had been honest, an opportunity to resume business. This policy was one which seemed to commend itself to the Comptroller as proper to pursue under the circumstances, and it is believed the results have justified the experiment of its adoption.

In no instance has any bank been permitted to resume on money borrowed or for which as an association it has become liable. Whenever those active in the management of the banks resuming, either as executive officers or directors, have been debtors to such banks, their indebtedness has been paid or secured, and whenever impairment of capital stock has been found, such impairment has been made good, either by voluntary or enforced assessment on the shareholders. In a number of instances changes have been made in the directory and official corps of resuming banks. The criticism to be made upon the management of these banks was the improper distribution of their loans, a circumstance which greatly retarded the conversion of such loans into money at a time when it was needed to avoid suspension.

Of the banks which failed to resume many had long been under the continual criticism of this Bureau for violations of law and imprudent methods of banking, and the closing of them was only hastened by the general condition of financial affairs. Some failed because of criminal acts on the part of the officials in charge, and others because of a lack of proper appreciation of the purposes of a bank.

An analysis of the suspensions and failures which occurred shows that during the year 158 national banking associations, as heretofore stated, were compelled to suspend business, being 4.09 per cent of the number

of existing associations. Their capital stock aggregated \$30,350,000, or approximately 4.3 per cent of the paid-in capital stock of all the

banks in the system.

Of the banks which suspended 65, or 41.14 per cent, with a total capital stock of \$10,935,000, were insolvent, and required the appointment of receivers; 86, or 54.43 per cent, with a capital stock aggregating \$18,205,000, were able to resume business and 7, or 4.43 per cent, with a capital stock of \$1,210,000, were placed in charge of examiners in the expectation of resumption. Of the suspended banks two were located in the New England States, both in New Hampshire, with a total capital stock of \$250,000, for each of which a receiver was appointed.

In the Middle States there were three suspensions—two in New York, with a total capital stock of \$500,000, and one in Pennsylvania, with a capital stock of \$50,000. Those in New York were placed in the hands of receivers, and the one in Pennsylvania in charge of an examiner

pending proposed resumption.

There were 38 suspensions in the Southern States, the capital stock involved aggregating \$8,815,000. Of these 19, with a total capital stock of \$5,630,000, resumed business, and the same number, with a total capital stock of \$3,185,000, failed. In this geographical division, Texas furnished the greatest number of suspensions, namely 12, with a total capital stock of \$1,480,000, of which 6, with a total capital stock of \$430,000, resumed business, and the remainder, capitalized to the amount There were 6 suspensions in Kentucky and the of \$1,050,000, failed. same number in Tennessee. The total capital stock of those in Kentucky was \$2,300,000 and of those in Tennessee \$2,750,000. tucky all the banks that suspended, except one, with a capital stock of \$50,000, were permitted to resume business. Two of the banks in Tennessee, with a total capital stock of \$2,000,000, resumed business and 4 were placed in the hands of receivers. Four banks in Georgia suspended and the same number in Alabama, with a total capital stock of \$675,000 and \$550,000 respectively. Of these, 1 bank in Georgia, with a capital stock of \$250,000, and 3 in Alabama, with a total capital stock of \$400,000, resumed business. Two banks in North Carolina suspended, with a total capital stock of \$300,000, both of which were able to resume business, but the two which suspended in Florida, with a total capital stock of \$200,000, required the appointment of receivers, as did also the one in Mississippi, which had a capital stock of \$60,000, and the one in Arkansas, with a capital stock of \$500,000.

The Western States furnished 49 suspensions, with an aggregate capital stock of \$10,125,000. Of these 31 resumed business, 17 failed, and 1 was placed in the charge of an examiner pending resumption or the appointment of a receiver. The capital stock of the banks which resumed aggregated \$6,275,000, and of those which failed \$3,750,000. The greatest number of suspensions which occurred in this section was in Kansas, namely, 8, although the capital stock involved, \$880,000, was less than that of the banks in four other States. Four of the banks in Kansas, with a total capital stock of \$480,000, resumed, and three, with a capital stock of \$300,000, failed. Of the 7 banks in Indiana which suspended, 4, with a total capital stock of \$450,000, resumed, and 3, with a total capital stock of \$550,000, were placed in the hands of receivers. In Iowa 6 banks suspended, with a total capital stock of \$575,000, of which number but one failed, with a capital stock of \$50,000. The same number of banks in Nebraska suspended, three of which, with a total capital stock of \$350,000, resumed business, and

receivers were appointed for the remaining three, the total capital stock of which was \$450,000. Five banks suspended in Wisconsin, with a total capital stock of \$625,000, all of which resumed business, while in Illinois there were 4 suspensions, with a capital stock aggregating \$2,150,000. All of these were placed in the hands of receivers. In Missouri 3 banks suspended, with a total capital stock of \$1,300,000, all of which resumed. In Michigan there were the same number of suspensions as in Missouri, but the capital stock involved aggregated only \$215,000. But one of these banks resumed, the capital stock of which was \$65,000. The fewest suspensions which occurred in any State in this division was in Ohio, there being but 2, the aggregate capital stock of which was \$180,000. One of these banks, with a capital stock of \$80,000, resumed business and the other failed.

Sixty-six banks suspended in the Pacific States and Territories. being nearly 42 per cent of the total suspensions which occurred and represent capital stock amounting to 35 per cent of the total capital involved. Of these, 36 banks, with a capital of \$6,300,000, were solvent and resumed business; 25, with a capital stock of \$3,250,000, were placed in the hands of receivers, and 5, with a total capital of \$1,060, 000, in charge of examiners pending resumption. The greatest number of suspensions was in Colorado, involving the largest amount of capital stock of suspended banks of any State in the Union, the number being 16 and the capital \$3,600,000. All of these banks resumed, except two, the capital stock of which was \$300,000. The second greatest number of suspensions occurred in the State of Washington, 14 banks, with an aggregate capital stock of \$1,735,000. Of this number 4, with a capital stock of \$425,000, resumed; 3, with a capital stock of \$510,000, were placed in charge of examiners pending resumption, and 7 failed. The suspensions in Montana numbered 10, and their capital stock amounted to \$1,875,000. Of these, 2, with a capital stock of \$300,000, resumed, and 7, with a capital stock of \$1,075,000, were placed in the charge of receivers. Six suspensions occurred in Oregon, and the same number in California, the aggregate capital stock represented being \$800,000 and \$1,200,000, respectively. There was but one failure in each State, the capital stock in the case of the Oregon bank being \$100,000, and that of the California bank \$250,000. There were 3 suspensions in Utah, 3 in North Dakota, and 3 in South Dakota. three banks in Utah, with a capital stock aggregating \$250,000, resumed business, while the three in North Dakota, with a total capital stock of \$400,000, failed. Two of the banks in South Dakota, with a total capital stock of \$100,000, were placed in the hands of receivers, and one, with a capital stock of \$125,000, resumed. Two suspensions occurred in Wyoming, and the same number in New Mexico. One bank in Wyoming, with a capital stock of \$200,000, resumed, and one, the capital stock of which was \$50,000, failed. Of the banks in New Mexico, one, with a capital stock of \$175,000, failed, and the other, with a capital stock of \$50,000, was placed in the hands of an examiner pending resumption or the appointment of a receiver. The only other suspension in this geographical division occurred in Oklahoma, being that of a bank with a capital stock of \$50,000, which, being solvent, resumed.

In the appendix, page 375, will be found the information above referred to in tabular form.

The official records show that of 4,930 national banks organized since February, 1863, 246, or about 5 per cent, have been placed in the hands of receivers. In this number are included 9 banks which had

previously gone into voluntary liquidation, but upon failing to pay depositors the Comptroller appointed receivers to wind up their affairs. Of the 246 failed banks, 39 have paid their creditors, principal and interest in full, 7 have paid principal and a part of the interest, and 16 have paid the principal only. The affairs of 115 of the 246 banks have been finally closed, leaving 131 in process of settlement, of which 16 are virtually closed, with the exception of undetermined litigation. There are 115 receiverships in active operation. In four instances prior to October 31, 1893, the receiverships were terminated and the banks permitted to resume business.

The total amount thus far paid to creditors of insolvent national banks is \$50,943,147, upon approved claims aggregating \$81,963,207. The amount paid during the year was \$3,041,134.90. Assessments under the provisions of section 5151 of the Revised Statutes of the United States aggregating \$20,118,350 have been made upon shareholders of insolvent national banks. From this source the gross collections have been \$8,085,931, of which there was received during the past year \$462,171. The affairs of but five banks have been closed during the year and final dividends paid to creditors, while the titles of four on the inac-

tive list in 1892 have disappeared.

It is a source of regret that no better exhibit is made of dividends paid to the creditors of failed national banks during the past year, but the same conditions which produced so many failures seriously retarded the ability of receivers to collect the assets of their trusts, and consequently large dividends could not be declared. However, when are taken into consideration the many embarrassments of the year, the general average is good. In the appendix will be found a tabular statement of all dividends, expenses, and kindred matters connected with the trusts which are yet in process of liquidation.

SUSPENSION OF BANKS OTHER THAN NATIONAL.

The same causes which so seriously affected the national banks affected in like manner State, savings, and private banks, and loan and

trust companies.

During the year ended June 30, 1892, there were 69 failures of private banks and of those incorporated under State authority, with liabilities amounting to \$11,024,628 and assets to \$6,125,189. The failures included 24 State banks, with \$3,177,529 liabilities; 6 savings banks, with \$917,000 liabilities; 36 private banks, with \$6,505,099 liabilities; and 3 loan and trust companies, with \$425,000 liabilities.

The number of failures of this class during the last six months of 1892 was 35, of which 18 were State banks, 16 private banks, and 1 a loan and trust company. During the first eight months of the current calendar year the failures and suspensions, as reported by the Bradstreet Agency, numbered 415, the assets aggregating \$94,291,348 and the liabilities \$97,193,530. Of these institutions 79, or 19 per cent, with liabilities amounting to 14 per cent of the total liabilities of the suspended banks, resumed business.

The number, assets, and liabilities, by classes, of banks which suspended and of those which resumed, from January 1 to September 1, 1893, are shown in the following table:

Class.		Suspended	•	Resumed.		
Class.	Number.	Assets.	Liabilities.	Number.	Assets.	Liabilities.
State banks	172 47	\$41, 281, 848 17, 673, 938	\$36, 903, 266 16, 830, 809	44 10	\$10, 828, 088 3, 657, 013	\$7, 255, 885 2, 541, 936

* June 1, 1893.

In the appendix, pp. 540-542, will be found tables showing, by classes, States, and geographical divisions, the suspensions and resumptions of State banks, etc., from January to September, 1893. It appears from the first table that of the total suspensions 172 were State banks, 47 savings banks, 177 private banks, 13 loan and trust companies, and 6 mortgage companies. Of the ten suspensions in the Eastern States, 6 occurred in New Hampshire, 3 in Vermont, and 1 in Rhode Island. In the Middle States 15 suspensions occurred in New York, S in Pennsylvania, 1 in New Jersey, and I in Delaware. The Southern States had 61 suspensions, of which 12 were in Texas, 10 in Tennessee, 8 in Virginia, 6 in Georgia, 6 in Florida, 4 in Alabama, 4 in Kentucky, 3 in Arkansas, 2 in West Virginia, 2 in North Carolina, 2 in South Carolina, and 1 in Louisiana. The most severe effects were felt in the Western States, both in the number of suspensions, which were 232, and the amount of liabilities, which were \$51,777,665, or 56 per cent and 53 per cent, respectively. In Kansas, the largest number (32) occurred, though the liabilities were but 3 per cent of the total; Wisconsin, with 30 suspensions, followed, but theliabilities were over 14 per cent of the total; in Ohio 27 were reported, Minnesota 26, Illinois 24, Indiana 23, Iowa 22, Missouri 21, Nebraska 16, and Michigan 11. The number occurring in the Pacific States and Territories was 87, of which California furnished 21, with liabilities amounting to nearly 8 per cent of the aggregate of all the banks. Colorado followed California in number (20), although the liabilities were less than

half of those of the banks in California. Oregon furnished 13 suspensions, Washington 11, Montana 8, Idaho 4, Wyoming 3, North Dakota 3,

and Utah, New Mexico, Arizona, and Oklahoma 1 each.

The second table referred to gives similar information in detail with respect to banks which have resumed. Of the 79 resumptions, 44 were State banks, or 25+ per cent of the total suspensions; 10 savings banks, or 21 per cent; 2 loan and trust companies, or 15 per cent, and 23 private banks, or 13 per cent. Of the suspensions in the New England States, there was but one resumption, that of a private bank in Vermont. One savings and 2 State banks resumed in New York. Of the 61 banks which closed in the Southern States, 8 reopened: 2 in West Virginia and one each in South Carolina, Georgia, Florida, Alabama, Louisiana, and Texas. As the suspensions in the Western States were the most numerous, so also were the resumptions, 58 per cent of the total resumptions being reported from that division. In Minnesota, 10 occurred; in Ohio, Wisconsin, and Iowa, 6 each; in Missouri, 5; Indiana and Kansas, 4 each; in Michigan, 3, and Nebraska, 2. The resumptions in the Pacific States and Territories were confined to California (13), Colorado (7), and Montana (1).

The fright among depositors of the present year appears to have affected all classes of banking institutions alike. The shrinkage of deposits of national banks from May 4 to July 12 last exceeded \$190,000,000. Inorder to ascertain the extent of the shrinkage in banks other than national, the Comptroller requested each State officer charged with the supervision of banks organized under State authority to submit a statement showing similar information with respect to that class of banks. Replies were received from the officers of 23 States and 2 Territories indicating that the loss to banks of this character corresponded with that shown by the returns from national banks. Generally no information was given with respect to savings banks and much less regarding private

banks.

CLEARING-HOUSE LOAN CERTIFICATES.

The unprecedented condition of the money market from June to September called for extraordinary remedies, not only to avert general disaster to the banks but to prevent commercial ruin. This remedy was the issuing of clearing house loan certificates, which were brought into use as in 1873, 1884, 1890–'91, by the associated banks of New York, Boston, Philadelphia, Baltimore, and other cities where needed. The service rendered by them was invaluable, and to their timely issuance by the associated banks of the cities named is due the fact that the year's

record of suspensions and failures is not greatly augmented.

The form of these certificates, with the conditions under which they were issued in 1890-'91 (the form and conditions being the same during the late issuance of them as then), is described at length in the Comptroller's Annual Report for 1891. The subject is alluded to again only because it constitutes a very important part of the year's banking history, and for the additional reason that here and there are to be found those who entertain an entirely erroneous idea of the purpose for which these certificates were issued and what was accomplished by their issuance. Briefly stated, they were temporary loans made by the banks associated together as a clearing-house association, to the members of such association, and were available to such banks only for the purpose of settling balances due from and to each other, these balances under normal conditions of business being always settled in coin or cur-

rency. Each clearing-house association selected a committee charged with the issuing of the certificates to each bank desiring the same, such bank being required before receiving them to deposit with the committee its bills receivable, or other securities, as collateral for the loan. The amount of certificates issued to each bank was limited to 75 per cent of the value of the securities deposited. They bore interest at rates varying from 6 to $7\frac{5}{10}$ per cent. Immediately upon their surrender to the committee they were canceled and the securities held as

collateral were returned to the bank depositing the same.

At a time when vast sums of coin and currency were being withdrawn from the banks, to be hoarded, these loan certificates, by performing the functions of the currency or coin customarily required for settling daily balances at the clearing house, released so much currency or coin to the legitimate and current demands of business and unquestionably placed it within the power of the banks in the cities named to extend to outside banks the aid needed on the one hand and liberally granted on the other. In no instance were these certificates designed to nor did they circulate as money. They were but due-bills and their sole function consisted in discharging the single obligation at the clearing An attempt on the part of a bank in any of the associations issuing these certificates to use them otherwise would have incurred a fine and other penalties provided in the rules governing such associa-Their issuance at so early a date in the financial derangement of the country was most opportune in not only preventing an acute panic, but in tending to restore public confidence, such action demonstrating that by mutual agreement of all, the weak banks of the association would be, so far as depositors and other creditors were concerned, as strong as the strongest.

In inaugurating the issuing of certificates so promptly and in issuing them to so large an amount the Clearing-house Association of New York, in particular, rendered the country great service, and the associated banks of that city are entitled to the credit which the public gener-

ally accords them.

The following figures, showing the movement and amount of the issue of loan certificates in 1893 in the cities named, will indicate the measure of relief afforded by them:

	Date of issue of first cer- tificate.	Date of largest amount out- standing.	Largest amount outstanding.	Date of surren- der of last cer- tificate.	Amount outstand- ing Oct. 31.
New York	June 27	Aug. 29 to Sept. 6 Aug. 15 Aug. 23 to Sept. 1 Aug. 24 to Sept. 9 Sept. 15	\$38, 280, 000 10, 965, 000 11, 445, 000 1, 475, 000 987, 000	Nov. 1 Oct. 20	\$3,835,000
Total		•••••	63, 152, 000	٥	

The issue of loan certificates in 1893 greatly exceeded that of previous years. In 1873 * and 1884 they were issued only by the New York Clearing House Association, the total amount issued in 1873 being \$26,565,000 and in 1884 \$24,915,000.

^{*}It appears from information received since this report was printed, that the Philadelphia association also issued loan certificates in 1873, the total amount issued to 1880, when the last was retired, being \$6,785,000.

In 1890-'91 they were issued in New York, Boston, and Philadelphia, the largest amounts outstanding at any time being as follows:

			Date of first issue.	Largest amount out- standing at any one time and date of same.
New York			Nov. 12, 1890 Nov. 19, 1890	\$15, 205, 000, Dec. 13, 1890. 5, 065, 000, Dec. 6, 1890.
Philadelphia	· · · · · · · · · · · · · · · · · · ·	e	Nov. 19, 1890	8, 870, 000, Jan. 9, 1891.

LAWFUL MONEY RESERVE.

Not less attention has been attracted during the present year, and particularly during the closing months of the year, to the subject of lawful-money reserve to be held by the banks, than to that of clearing-house loan certificates, and the discussion provoked has been quite as widespread.

As the law now stands all national banks, outside of certain designated "reserve cities," are required to maintain a reserve fund equal to 15 per cent of the net deposits made with such banks by individuals and by other banks and bankers. They are permitted by law to deposit not over three-fifths of this 15 per cent (or 9 per cent) with such national banks located in the "reserve cities" as the outside banks may with the Comptroller's approval select. The remaining two fifths (or 6 per cent) must be kept in bank in lawful money, or more, if less than three fifths is kept with reserve agents. The national banks located in reserve cities are divided into two classes: (1) Those in the "central" reserve cities of New York, Chicago, and St. Louis being required to keep 25 per cent of their net deposits in bank in lawful money, with the privilege of acting as the reserve agents of any national banks located outside of these three cities. (2) Those located in the reserve cities, other than New York, Chicago, and St. Louis, being required to keep 25 per cent of their net deposits on hand, not over one-half of which may be deposited with any national bank or banks located in any of the three central reserve cities, while the remainder must be actually on hand in lawful money. The banks in the reserve cities of this class have the privilege of holding a part of the reserve of any bank or banks located outside of all reserve cities, viz, banks of the 15 per cent class.

In effect these requirements are not as onerous as they appear, for a national bank in New York City holding \$100,000 of the reserve of any other bank or banks on deposit must keep only \$25,000 of the amount on hand in money, while it is at liberty to lend or otherwise invest the remaining \$75,000. So a bank in a reserve city of the second class holding \$100,000 on deposit for other national banks may loan out or invest \$75,000 of the amount, and of the remaining \$25,000 must keep \$12,500 in bank in money and may deposit \$12,500 with its reserve agents, receiving a low rate of interest (usually 2 per cent) on the same. A bank of the 15 per cent class must keep only 6 per cent of its depositors' money actually on hand in bank, and is at liberty to deposit not over 9 per cent with its reserve agents, on which it usually receives a low rate of interest. To illustrate the operation of the law it will be found that with normal conditions of business the banks in reserve

cities (not central) held on December 9, 1892, net deposits amounting to \$495,196,952, against which they held \$77,869,593 cash in bank, or about 16 per cent, and the 15 per cent banks held net deposits of \$975,622,088, and against these \$108,012,546 cash in bank, or about 11 per cent. Again, a large portion of the reserve actually held by the banks can not be considered as taken out of circulation, or as hoarded through operation of the law, for much of it is paid out during each business day, other money coming in through deposits to take the place of that paid out.

In any view of the matter, however, the intent of the law is to compel a bank to retain always on hand a very moderate proportion of the money deposited with it for safe keeping by the depositor, who practically makes a loan to the bank payable on demand, for the use of which he ordinarily receives no interest. The entire effect is to exercise a wholesome restraint upon a tendency to an undue extension of business by a bank, and that this intent is recognized as an underlying principle of safe and conservative commercial banking is evidenced by the fact that those banks which are compelled by law to maintain but 15 per cent reserve have voluntarily for years past held an average of over 25 per cent, the proportion required for banks located in reserve cities.

The evident theory of the law is that a bank shall always have on hand such an amount of lawful money as will enable it under normal conditions of business to meet the current demands of its depositors. A careful examination of section 5191, United States Revised Statutes, as amended, will show that it is expected that emergencies will arise under which this fund will fall below the legal requirements. This contingency is distinctly recognized by the plain provisions contained in the section named, prescribing what shall be done "whenever the lawful money reserve of any association shall be below the amount" of the required percentage of its deposits. The provisions referred to are that the bank shall make no new loaus or discounts, except the discount of bills of exchange payable at sight, nor make any dividend of its profits until the required amount of reserve has been again accumulated. The reason for this is obvious. The depletion of a bank's reserve occurs either because the bank has loaned out or otherwise invested too great a proportion of the funds it has received on deposit, or that its depositors have withdrawn their money to an extent which produces a similar result. In either case the only safe and prudent course for the bank to pursue is to cease paying out money in any direction except to depositors until either through the collection of demand or maturing loans on the oue hand, or the receipt of deposits on the other, the required proportion has been restored. The discount of sight bills of exchange is excepted because money invested in this way will be repaid immediately, and in this branch of its business the bank's customers will be caused no inconvenience and the commercial interests of the country be thus protected from loss which otherwise might ensue.

The provision of law governing the time allowed a bank to make good a depleted reserve is most lenient. It provides that the Comptroller may notify the bank to make good its reserve, and further that if it fails for thirty days thereafter to do this the Comptroller, with the concurrence of the Secretary of the Treasury, may appoint a receiver for the bank. However, before the Comptroller can send notice to any bank he must have reliable information that its reserve is deficient, and as the source of such information is either the report of its examination heretofore made once a year, but hereafter to be made twice,

or its sworn report of condition made five times a year, some time may intervene before such condition becomes known to him. he is officially informed, the use of the word may both as to his sending notice and as to his appointing a receiver in a case of noncompliance with such notice, plainly leaves the enforcement of the law to the, discretion of the Comptroller in either or both of these particulars. This power thus conferred upon the Comptroller is one that ought to be used with great prudence and caution. It would be not only unwise but would work great injury to the business interests of individual communities and the general public to exercise the authority thus vested in him at a time when arbitrary action must necessarily result in general disaster, and therefore in the interest of the public the discretion-given to the Comptroller has always been used with moderation. It is this moderation which in an emergency has in numerous instances contributed in no small degree to averting widespread financial ruin. In this view there can be no question as to the legality and propriety of a bank's exhausting its entire reserve, if necessary, in an emergency, to pay its depositors, but for no other purpose, except to discount or buy sight bills of exchange, and where the withdrawal of deposits continues or is likely to continue no careful bank manager needs to be informed that not only must be cease to make new loans and discounts, but must replenish his exhausted stock of lawful money by converting his resources into cash through collections of loans and discounts or selling securities, or where this is not possible by using these assets to borrow the money needed to enable him to meet his lia-

Tabular statements showing deposits, reserve required, and reserve held, classification of reserve, and average percentage of same on or about October 1 of each year from 1874 to 1893, both inclusive, will be found on pages 425, 426 of the appendix, also a table, page 430, showing similar information at the date of each report of condition from December 9, 1892, to October 3, 1893. This last-named table is inserted to show the movement of the reserve during the financial stringency of the present year, both as to volume and average percentage of deposits. An inspection of these figures will show that the average percentage of reserve to deposits from December 9, 1892, to July 12, 1893, varied only between 26.42 per cent and 27.24 per cent, and that on October 3, 1893, the average increased to 32.66 per cent. In volume the amount of lawful money actually held by the banks was \$318,641,595 on December 9, 1892, decreased to \$289,244,850 on July 12, 1893, but increased by October 3, 1893, to \$346,433,212, an amount approximating \$57,000,000 greater than on July 12, 1893, when the panic was at its height, and almost \$27,000,000 greater than on December 9, 1892, when business was in a normal condition.

AMENDMENTS RECOMMENDED.

By provision of law it is made incumbent upon the Comptroller of the Currency to call the attention of Congress to "any amendment to the laws relative to banking by which the system may be improved and the security of the holder of its notes and other creditors may be increased." There are certain amendments which it is obvious ought to be made, and which, in their operation, would make the present system more nearly serve the purpose for which it was designed, and to a measurable extent give an increase in the volume of circulation, if such is desirable. The following amendments to the law as it now stands are recommended to be made.

(1) That every association be authorized to issue circulating notes

equal to the par value of the bonds deposited.

No good reason can possibly exist at present for depriving the banks or the business interests of the country of the additional circulation which would be added by such amendment. Whatever reason may have existed at the time of the enactment of the present provision does not now exist and its effect is to make circulation unprofitable and to lock up in bond investments the difference between 90 per cent and 100 per cent of this par value which, under the amendment suggested, would be adding to active circulation, under the present deposit of bonds, \$20,941,635.

(2) That the semi-annual duty on circulation be so reduced as to equal

one-fourth of 1 per cent per annum.

In support of this proposed amendment it is respectfully suggested that the present rate of tax takes from the banks a very large sum of money which is not used by the Government to meet the expenses for which the tax was originally laid. Its bearing upon the question of an increased circulation on the part of the banks is important, as the additional cost entailed by it of necessity so largely reduces the profits of circulation and adds to the cost of taking it out that banks will not, except under other circumstances, increase their issue.

Unwillingness on their part to add to the volume of currency, coupled with a tendency some years since to decrease the same, has subjected the banks to criticism. Such criticism, however, is unjust in this, that it is based on the idea that the banks are simply indifferent to the matter and are content to be banks of deposit and discount rather than banks of issue. The fact is banks ceased taking out circulation simply because until recently there was no profit in it. The high price of Government bonds necessary to be deposited, coupled with the tax upon circulation, and the refusal to grant more than 90 per cent of the par value of the bonds in currency return, has rendered circulation either without profit or profitable to so slight an extent as to offer no inducement to banks to take out circulation.

The Government can not relieve the banks of the additional expense to them by reason of the premium on bonds to be deposited, but it can materially lessen the cost of their circulation by enacting the amendments suggested, and in this manner offer an inducement, which is now wholly wanting, to the banks to add to the volume of bank-note circulation. The whole question is one of a business character. Banks are but business institutions, conducted upon the same lines and for the same purpose as other business undertakings. It can not be expected that they will do that which either entails a positive loss or warrants little or no profit, and if relief is to come through an expansion of the national bank currency, Congress must remove rather than erect unnec-

essary barriers.

The following amendments pertaining to the administration and con-

duct of banks are recommended:

(3) That the Comptroller of the Currency, with the approval of the Secretary of the Treasury, be empowered to remove officers and directors of a bank for violations of law, first giving such officers and directors an opportunity to be heard, leaving the vacancy so created to be filled in the usual way.

It is respectfully suggested that the powers now vested in the Comptroller do not accomplish the result that they otherwise would if the law permitted the removal of officers and directors for misconduct in office. Many banks would be saved from embarrassment, creditors

from loss, and shareholders from assessments if the Comptroller, upon learning of the misconduct of those charged with the management of a bank, could take positive action in the premises.

(4) That no executive officer of a bank or employé thereof be permitted to borrow funds of such bank in any manner, except upon appli-

cation to and approval by the board of direction.

This amendment is recommended with the knowledge that the House of Representatives, at the late special session of Congress, passed a bill (H. R. 2344), entited "An act for the better control of and to promote the safety of national banks," which bears upon the same subjectmatter, but differs in that it embraces in its provisions all directors of a bank, instead of confining them to the executive officers and em-

ployés only.

At the best the question as to what extent loans and discounts should be made by a bank to its directors and executive officers by reason of the various circumstances under which these are granted is a difficult one to satisfactorily legislate upon, and an equally difficult one upon which to make specific recommendations. Where money is borrowed directly by any such officer or director to an amount exceeding the limit prescribed by section 5200 of the Revised Statutes of the United States, the Comptroller's duty is as plain as in any other case where the law is violated, but the limit to which discounts should be granted them is a question involving consideration of safety and prudence. Holding this view, the Comptroller has, in cases where the aggregate of loans and discounts to executive officers and directors appeared to be out of proportion to the total loans and discounts made by the bank, addressed the following form of letter to the bank, with the request that all directors unite in a reply:

TREASURY DEPARTMENT,
OFFICE OF COMPTROLLER OF THE CURRENCY,
Washington, D. C., ——, 189

Cashier, ----,

SIR: Upon examination of your report of condition on ——, it is found that the "loans and discounts upon which officers and directors are liable" amount to \$——, out of total loans and discounts of \$——.

While recognizing the right of directors and officers to borrow within the limitations of law and safety, the Comptroller must insist most rigidly that directors and others connected with the bank in this fiduciary relation shall not avail themselves of the easy opportunity afforded them to borrow beyond this limit, either directly or indirectly, the funds intrusted to their keeping, in order to carry on enterprises outside of the banks with which they are connected.

Officers and directors should remember that the funds held by banks are in a large measure funds of others held in trust for the safe-keeping thereof, and, as trust funds, ought not to be loaned to the trustees of such funds, except upon the very

best collateral or other security.

In the matter of accommodations to them, directors and officers should be placed upon the same footing as other customers of the bank, except that their financial ability and standing should be the more rigidly scrutinized, for the reason that they act in the dual capacity of lenders as well as borrowers.

The continued experience of this office is that such loans in many instances result disastrously to all concerned, and therefore the danger attending upon such a course ought not to be risked. The Comptroller must insist that this condition of affairs be remedied with the least possible delay, by reducing the amount of these accommodations to safer and more reasonable limits.

Please bring this communication to the immediate attention of your board of directors for consideration, and request them to unite in making a prompt reply over their individual signatures.

Respectfully, yours,

Comptroller.

The information upon which this letter is based is found in the reports of condition made under oath to the Comptroller, in which appear the indebtedness of every kind and character of each director and officer of the bank.

Accompanying this letter is sent to directors a copy of such sections of the National Bank Act as prescribe their duties and the penalties

attaching for the nonperformance of them.

Beyond the substance of the amendment above set forth the Comptroller is not prepared to recommend any legislation upon this sub-

iect.

It seems that a difference should be made between loans to and overdrawn accounts of directors, who are simply directors, and of those who are the executive officers of a bank, and as such have and receive adequate compensation for the active management of its affairs. The abuse of the easy-privilege of loaning to themselves is generally on the part of the managing officers, and not on the part of directors who are only members of the board of direction, and hence the distinction which is drawn between the recommendation here made and the bill referred to.

So far as loans, through drafts or otherwise, to directors who are not executive officers of the bank, are concerned, there are strong reasons against the advisability of such legislation. Any positive restriction imposed by direct law might have the effect of deterring honest, intelligent, and substantial men from serving as directors. As a rule, men of this class are sought for these positions in order to obtain the benefit of their judgment and business capacity in managing the affairs of the bank, and to secure their own business for the bank. This business does not consist alone of deposits, but is largely made up of loans and discounts, by means of which the profits are chiefly earned. As a rule these directors receive no compensation for their services, which are rendered largely through motives of interest as shareholders, or of pride in holding a position supposed to give a certain prominence in business circles.

An inquiry as to the practice of banks paying directors for attendance upon meetings showed that in some cities this is in vogue. It would be better for all concerned if all banks adopted such policy. However small the compensation, it could not but result in benefit to the shareholders and more than compensate for the expense involved. The general criticism to be passed upon directors is their failure in so many instances to give to the business of the bank the attention their oaths and duties require. The sucessful administration of a bank's affairs depends upon the watchfulness and fidelity of the board of directors. When such conduct is wanting bank failures ensue, or if failures do not follow great loss to shareholders is entailed through want of profits or assessment to make good the impairment of capital stock caused by imprudent loans. The administration of the Comptroller, if supplemented by the watchful care of directors, would minimize even the comparatively few failures which occur.

(5) That the assistant cashier, in the absence or inability of the cashier of a national bank to act, be authorized and empowered to sign

the circulating notes of such bank.

This amendment is suggested in order to meet a difficulty which has arisen in numerous instances during the past months, there being no provision in the law for any one to sign currency for the cashier in his absence or inability to act, and banks are frequently put to serious inconvenience on this account.

(6) That the law be amended by appropriate legislation so as to empower some class of public officers to administer the general oaths

required by the provisions of the National Bank Act.

The necessity for this amendment is occasioned by the fact that the authority of officers empowered to administer oaths is now restricted under the Federal statutes to certain specific cases, and with the exception of the acknowledgment of the organization certificate and the verification of reports of condition, required by section 5211 of the Revised Statutes of the United States, no provision is made for administering the oaths required of the officers of national banks.

The following amendments bearing upon the subject of bank examiners would, the Comptroller believes, result in benefit, and are

therefore recommended:

(7) That bank examiners be required to take an oath of office before entering upon the discharge of their duties, and to give bond with proper conditions in such amount and with such sureties as the

Comptroller of the Currency may require.

An anomoly is presented in the case of bank examiners, which does not appear in that of any other public official. No position under the Government is more responsible in the duties attaching to it, and none requires a higher degree of integrity in the incumbent. The exception is rare where dishonesty has been found in examiners, but it is the opinion of the Comptroller that an oath, such as is required of other officers under the Government, should be taken and a bond given.

(8) That the Comptroller of the Currency, with the approval of the Secretary of the Treasury, be empowered to appoint two general examiners of conspicuous ability and experience to be paid out of the reimbursable funds, whose duty it shall be to visit, assist, and supervise the various examiners in their several districts, in order to secure uni-

formity in method and greater efficiency in work.

This amendment has been heretofore recommended by former Comptrollers, and the reasons for it suggested. It would aid in uniformity of method and give to the office of the Comptroller at all times officers who could do special and confidential work, which can not be done at present, because no compensation is provided.

(9) That the law be so amended as to provide that the compensation of all bank examiners be fixed by the Comptroller of the Currency,

with the approval of the Secretary of the Treasury.

This amendment is suggested in the interest of better examinations. Thoroughness in bank examinations is not to be expected under a system in which compensation is provided for and ascertained by a method that furnishes a constant temptation to the examiners to neglect their duty. Under the law as it now stands the compensation for bank examinations made outside of reserve cities, and the States of Oregon, California, and Nevada, and the Territories, is fixed at various amounts, ranging from \$20 in the case of a bank having a capital of less than \$100,000 to \$75 in the case of a bank having a capital of \$600,000 and over. As the earnings of the examiner are thus made dependent upon the number of examinations he makes, without regard to the amount of work he actually performs, it is obvious that he has a pecuniary interest in increasing the number of examinations by neglecting his duty to make them thorough.

Again, the law requires a bank which is properly conducted, and the examination of which involves but little time, to pay the same compensation therefor that is paid by a bank which is not properly conducted and which by reason thereof requires a much longer time for

its examination. These objectionable features could be remedied if the law were so amended as to provide that the compensation for all bank examinations be fixed by the Comptroller, with the approval

of the Secretary of the Treasury.

Many other amendments have been suggested to the Comptroller as proper ones to be made to Congress for action, but it is not deemed best to submit them. The foregoing are presented, with the earnest request that they receive consideration. Some of these amendments have been recommended by former Comptrollers in the belief based upon knowledge gained from experience in the Bureau that they would "improve the system and add to the security of the holders of bank notes and other creditors," but no action has been taken upon them. It is respectfully submitted that as the national banks are under the supervision of the general government, and as Congress is vested with the power to legislate upon all matters pertaining to their control and conduct, it should be the constant aim of Congress to so legislate as to enable them to meet the public needs.

CURRENCY LEGISLATION.

The Comptroller has been urged to make some specific recommendation with respect to a revision of the law so far as it pertains to the issuing of currency. After a careful consideration of the question the Comptroller is of the opinion that, aside from the amendments heretofore suggested, allowing banks to issue circulating notes to an amount equal to the par value of the bonds held to secure circulation, and abolishing a portion of the tax on national-bank circulation, the public good will be best subserved at this time by making no rad-

ical change in the provisions of the law.

The financial situation of the past months was not the result of either a lack in the volume of currency, of which there is now a plethora, or a want of elasticity in the present system of issuing it, but arose from a loss of confidence on the part of the people in the solvency of the distinctively monetary institutions of the country. It is worthy of note and of serious consideration that at the very time the scarcity of currency for business purposes was at its height, the country's volume of currency was increasing the most rapidly, and the amount per capita was much larger than in any recent years. Under the same peculiar condition of affairs which marked the monetary situation from May to September, no system, no matter how elastic, or volume of currency however large, could afford relief. As long as confidence is destroyed and credit wanting, money hoarding will go onand additional issues but add to the hoardings and give but little, if any, actual relief. On the other hand, when confidence and credit abound there exists little need for an abundant circulating medium, because under such a condition of affairs the amount of actual money required to transact the daily business affairs of life is reduced to a minimum.

The statistics show that the volume of business carried on through cash transactions is on an average but 8.7 per cent, and as the monetary conditions of the country become more fixed and confidence in them established, cash transactions will decrease and credit transactions correspondingly increase. This fact is to be considered in connection with all plans having as their sole object an increase of the volume of banknote or other paper currency, and coupled with this is the further fact that no issue is so dangerous to a people's prosperity as a large paper

Digitized for FRASER http://fraser.stlouisfed.org/ Federal Reserve Bank of St. Louis issue, unless such paper rests upon a proper foundation, is absolutely redeemable and convertible into coin upon the demand of the note-holder, and surrounded with every safeguard as to supervision of issue

and redemption.

In view of the fact that there is now a very great abundance of unemployed currency in the country, as shown by the daily money returns from the commercial centers, it would seem that whatever need appeared some months since for enlarging to any marked extent the circulating medium has now ceased to exist; and therefore Congress is afforded an opportunity of giving to the whole subject that careful research and investigation which its importance in all of its bearings demands. It will not do to place upon the statute books any experimental legislation upon this subject, but whenever a new law governing bank issues is enacted it must be one that immediately upon going into operation shall command in every respect the confidence of the whole people and insure to them a currency as safe in every respect as the present one, but with none of its defects.

In the meantime it is respectfully suggested that Congress, either through a monetary commission created for such purpose or through the appropriate committees, obtain detailed information of the various systems of banks of issue now in operation, and also such information as is to be ascertained from skilled students of finance and practical financiers, that it may be able to formulate a system complete and

harmonious.

CONCLUSION.

In concluding this report the Comptroller desires to bear testimony to the general efficiency of the employés in the Bureau, to the examiners in the field, and to the work accomplished by the receivers in relation to the trusts in their charge.

An extraordinary amount of work has been placed upon the employés of the Bureau, but it has been performed promptly and intelligently.

In the appendix will be found in detail the usual tables, together with a digest of legal decisions rendered by the various courts of the country involving questions affecting national banks.

In the second volume of this report will be found a detailed statement of the condition of all the national banks as shown by the report of condition of October 3, 1893, alphabetically arranged by States, and properly indexed.

James H. Eckels, Comptroller of the Currency.

The Speaker of the House of Representatives.

APPENDIX.
